We know that...

Transition and international mobility are recognised as unique features of international schools.

And did you also know that...

Recent research suggests that creativity, a 21st century skill for all individuals, also has particular relevance in the international school context?

Drawing on the internationally-acclaimed creativity research of Kyung Hee Kim, as well as research on the characteristics of internationally-mobile students (Third Culture Kids or TCKs), and theory and practice surrounding Transition Education, we will apply Dr. Kim’s findings to enhance our work with international school students by developing an understanding of:

* international mobility and the transition experience
* the characteristics of creative individuals
* ways to nurture creativity in our international schools
* strategies to support students, parents, and colleagues in transition

Participants will collaborate with each other and workshop leaders to develop strategies that help facilitate change in their school as we explore and share ways to best support and nurture TCKs and others in transition in our schools.

Workshop Leaders

Dr. Kyung Hee Kim, Associate Professor of Educational Psychology,
The College of William and Mary in Virginia; ECIS and NESA keynote speaker on Creativity

Mary Langford, Author and presenter on TCKs and International Schools

Debra Rader, Author and presenter on Transition Education
