COURSE DESCRIPTION

A. Successful completion of EDIT 645 or instructor permission
B. This two credit hour course is designed to assist students in developing expertise with moderating student learning in online environments. The course will include attention to moderating in both synchronous and asynchronous environments to include discussion boards, bulletin boards, chat rooms, and virtual classrooms. Students will develop expertise with moderating strategies to include social dialogue, argumentative dialogue, pragmatic dialogue, community building strategies, questioning, prompting reflection, facilitating conceptual understanding, and serving as a generative guide.

NATURE OF COURSE DELIVERY

This course is an online course. Students participate in an ongoing process where the learner takes responsibility for structuring his or her time and decides, within a broader time frame, when it is appropriate to complete assignments. Each student registered for a course is a learner of one and is assigned an Online Mentor. The Online Mentor reviews all the assignments submitted, makes suggestions if the assignment is incomplete, responds to ideas, and/or makes suggestions for ways that students can refine their work to construct a more convincing argument or create more powerful learning opportunities. The online mentor asks questions about what students are thinking or learning about. The online mentor is the student’s online ally and is the contact point when an assignment does not make sense, when there are difficulties with technology, or if students are stuck for a good teaching idea. The course is web-based and uses a cluster of organized web pages. In addition, students will use phone, email, and synchronous chat functions to communicate with their mentor.

STUDENT OUTCOMES

1. Students will develop an understanding of and be able to apply protocols and strategies for effectively moderating in synchronous environments like DigiChat, Virtual Classroom, and AOL’s Instant Messenger;
2. Students will develop an understanding of and be able to apply protocols and strategies for effectively moderating in asynchronous environments like Blackboard and WebCT’s discussion boards;
3. Students will develop an understanding of and implement effective moderating principles;
4. Students will develop an understanding of and ability to apply facilitator roles – “guide on the side,” instructor and project leader, and facilitator of group process;
PROFESSIONAL STANDARDS

This course is designed to meet the standards established by the National Board for Professional Teaching Standards (NBPTS). The NBPTS Standards for every field and developmental level are centered on five core propositions that express the effectiveness, knowledge, skills, dispositions, and commitments of the accomplished teacher:

- Teachers are committed to students and their learning.
- Teachers know the subjects they teach and how to teach those subjects to students.
- Teachers are responsible for managing and monitoring student learning.
- Teachers think systematically about their practice and learn from experience.
- Teachers are members of learning communities.

REQUIRED TEXTS

There is one required text for this course. It is listed below.

COURSE REQUIREMENTS, PERFORMANCE-BASED ASSESSMENT, AND EVALUATION CRITERIA

A. Requirements

1. Students will complete readings as assigned.
2. Students will complete activities related to readings. These include:
   a. Creating a Moderator’s Oath;
   b. Writing a reflection on the role of moderator – “What Shall We Call Ourselves?;
   c. Analyzing transcripts from sample moderated discussions, identifying difficulties and recommending strategies for correction;
   d. Participating in four synchronous and four asynchronous moderated online discussions;

   f. Preparing a Reference sheet that establishes protocols, netiquette, and procedures for learners in moderated e-learning environments.
3. Students will create a Moderator’s Reference Guide to synthesize practices, protocols, and strategies for successful and effective moderating.
B. Performance-Based Assessments

This course includes two synthesizing performance-based assessments. First, students will create a Moderator’s Reference Guide to synthesize practices, protocols, and strategies for successful and effective moderating. Second, students will moderate one synchronous and one asynchronous online discussion and then prepare a reflective analysis of the transcript identifying strategies used and the impact (successful/not successful) of those strategies.

C. Criteria for Evaluation

Assessment of each of the six brochures will be guided by a rubric. There is also a rubric to assess their Award Speech. The rubrics follow:
