GEORGE MASON UNIVERSITY  
COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT  
SPECIAL EDUCATION PROGRAM  

EDSE 517: Computer Applications for Special Populations  
Spring 2004  
Section # 001: 4:30 to 7:10 pm Thursday  
Section # 002: 7:20 to 10:00 pm Thursday  
Location: Thompson Hall, Room 221 (Assistive Technology Lab)  

Instructors: Patti Lindstrom & Yoosun Chung  
Phone: 703-993-3670  
Email: plindstr@gmu.edu, ychung3@gmu.edu  
Office Hours: By appointment, Krug Hall, Room 105  

Most course information, lectures, and readings will be posted on Blackboard at http://blackboard.gmu.edu. Additional readings will be handed out in class. There is no required textbook.  

COURSE DESCRIPTION  

This course is a lecture/laboratory course providing understanding of computer technology and its implications for instructional programs and career skills for students with disabilities. Laboratory and demonstration experiences will enable students to better utilize devices and software in special education settings.  

OBJECTIVES/COMPETENCIES  

Students will be able to:  
Demonstrate an understanding of the history of assistive technology  
Describe and implement a comprehensive set of procedures for software review and evaluation for specific populations  
Describe and utilize key software for specific populations  
Demonstrate proficiency in a variety of technologies utilized to enhance written and/or spoken communication  
Demonstrate the use of technologies designed to aide in literacy activities  
Demonstrate the use of different classroom management tools and discuss their applicability in different settings  
Describe and utilize key devices and software tools designed to help individuals with sensory impairments  
Describe and utilize key devices and software tools designed to help individuals with physical impairments  
Describe and implement accessibility considerations for Internet design on own web page  
Design an appropriate technology integrated lesson plan for a specific special education population
NATURE OF COURSE DELIVERY

Learning activities in this class will include the following:
Class lecture, discussion, and participation
Software and hardware presentations
Group and independent laboratory activities
Class presentations
Written papers using the American Psychological Association format (5th edition)

COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT STATEMENT OF EXPECTATIONS:
The Graduate School of Education (GSE) expects that all students abide by the following:

Students are expected to exhibit professional behavior and dispositions. See gse.gmu.edu for a listing of these dispositions.

Students must follow the guidelines of the University Honor Code. See http://www.gmu.edu/catalog/apolicies/#TOC_H12 for the full honor code.

Students must agree to abide by the university policy for Responsible Use of Computing. See http://mail.gmu.edu and click on Responsible Use of Computing at the bottom of the screen.

Students with disabilities who seek accommodations in a course must be registered with the GMU Disability Resource Center (DRC) and inform the instructor, in writing, at the beginning of the semester. See www.gmu.edu/student/drc or call 703-993-2474 to access the DRC.

GRADING CRITERIA

A = 90-100%
B = 80-89%
C = 70-79%
D = 60-69%
F = <60%
ASSIGNMENTS AND EVALUATIONS

Students will be evaluated on the following:

Class and Lab Participation as demonstrated by participation and utilization of lab time in an effective and efficient manner, and completion of in-class assignments. Each lab assignment is worth 1 point. (15 points)

Software Review (Due 9/30): Students will choose a piece of software to review. A brief description of the software should precede a thorough review of the software and its possible application within a chosen environment. Late projects will be penalized. Please refer to the scoring rubric for additional information on this assignment. (15 points)

Tutorial (Due 10/21): Students will create a step-by-step tutorial intended for guiding a new user with software or hardware selected for this assignment. The tutorials will be presented in class. Late projects will be penalized. Please refer to the scoring rubric for additional information on this assignment. (20 points)

Web Page Design (Due 11/11): Students will be responsible for designing their own accessible web page using their George Mason University accounts. The web pages will be presented in class. Late projects will be penalized. Please refer to the scoring rubric for additional information on this assignment. (25 points)

Assistive/Instructional Technology Lesson (Due 12/9): Students will design a lesson using an instructional or assistive technology of their choice. The lessons will be presented in class. Late projects will be penalized. Please refer to the scoring rubric for additional information on this assignment. (25 points)

In addition to providing a hard copy of the assignments, all assignments must be emailed to the instructor or submitted to the Blackboard Digital Drop Box by the start of class on the due date.

Students are expected to attend class sessions on time and actively participate in group discussions and activities. Excessive absences will result in missed lab assignments and decreased class participation points.

All out-of-class assignments are to be completed prior to the beginning of class on the date that they are due. If you are absent, the due date does not change, and students are responsible to make sure that all assignments are handed in on time. Late assignments will result in a reduction in points.

ASSIGNMENTS

EDSE 517: Computer Applications for Special Populations
Scoring Rubric for Software Review

Software Review Paper (15 points): Due on 9/30

Choose a piece of software of interest to review; it should be a fairly recent version. Address the primary features of the software including accessibility and other topics addressed in class (content, user friendliness, adult management features, support materials, and value). The actual software review should be 1-2 pages that can be used as a reference for a potential software user. You may use any of the software review formats introduced in class, or you may feel free to use your own evaluation format. Following the review should be a one-page reflection of your thoughts about the software, including pros and cons, from your perspective. Late projects will be penalized.

Exemplary paper (13-15 points): Appropriate software chosen, thorough and thoughtful review of software, including clear description of primary features (content, user friendliness, adult management features, support materials, value) and overall accessibility. Graphic representing software included. Solid explanation of student’s opinions of software, good writing style, free of mechanical or stylistic errors. Detailed, yet concise reflection indicating personal thoughts about the software.

Adequate paper (10-12 points): Good overall paper, lacking in one or two of the criteria for an exemplary paper. Not entirely reflective or thoughtful, or minor writing style errors may be present.

Marginal paper (7-9 points): Overall acceptable paper, but with one or more significant problems. Contains some useful information, but may have substantial problems with evaluation, writing style, or design.

Inadequate paper (1-8 points): Paper with substantial problems in important areas such as writing, description of software, evaluation of software, overall thoughtfulness. Contains little or no information of value to special education practice.

Unacceptable/No paper (0 points): Paper with no value whatsoever relative to the assignment, or no paper turned in at all. May describe software of no value that was not approved for this assignment.

EDSE 517: Computer Applications for Special Populations
Scoring Rubric for Tutorial

Tutorial (20 points): Due on 10/21

Choose a piece of software (fairly recent version) or hardware of interest. Create a step-by-step tutorial for guiding a new user through the use of the software or hardware application. Use of screen shots or photographs to guide the user of the tutorial will enhance the tutorial. Clear concise wording is expected and a troubleshooting section is typically helpful when creating a tutorial. Tutorial should be prefaced with a one-paragraph description of the software/hardware. On the due date, students will present their tutorials to the class.

Exemplary tutorial (16-20 points): Appropriate software or hardware chosen, easy to follow tutorial prefaced by a clear, concise description of the software/hardware. Screen shots or photographs included, as well as troubleshooting information (if applicable). Good writing style, free of mechanical or stylistic errors.

Adequate tutorial (11-15 points): Good overall tutorial, lacking in one or two of the criteria for an exemplary tutorial. Not entirely easy to follow, or minor writing style errors may be present.

Marginal tutorial (6-10 points): Overall acceptable tutorial, but with one or more significant problems. Contains some useful information, but may have substantial problems with guiding a new user with the software/hardware.

Inadequate tutorial (1-5 points): Tutorial with substantial problems in important areas. May be difficult to follow and information may be inaccurate. Contains little or no information of value to special education practice.

Unacceptable/No tutorial (0 points): Tutorial with no value whatsoever relative to the assignment, or no tutorial turned in at all. May describe a project of no value that was not approved for this assignment.

ASSIGNMENTS

EDSE 517: Computer Applications for Special Populations  
Scoring Rubric for Web Page Design

Web Page Design (25 points): Due on 11/11

For this project, students will design and upload an accessible web page on their George Mason University accounts. Students may choose to use Dreamweaver, Front Page, Netscape Composer, or any other web designing software of their choice. However, it is the student’s responsibility to research and implement accessibility features for the software chosen. The web page may be about any topic of interest, however some suggestions for this page include:

Homework section for your class to visit to remind them of their assignments  
Review of daily/weekly activities for parents or students to visit  
Photographs and information about hobby or something of interest  
Family page that provides updates and information to family members

With regard to accessibility, each web page should include:
Alt tags on graphics and images  
Sans serif font  
Contrast and other visual considerations  
Table formatting (if applicable)  
Readability

With regard to creativity, each web page should be:
Inviting and easy to look at  
Contain at least one image or graphic  
Contain at least one paragraph of written information

With regard to content, each web page should contain:
Purpose of the site and site content  
Information to be used by fellow employees, students, or parents regarding school topics  
Should be easily readable and understandable  
Should have a “last updated” section and contact information

On the due date, students will present their web pages to the class and will submit the URL (web address) to the instructor. The web page must be uploaded to the web in order for the instructor to view and grade the assignment. Late projects will be penalized.

Hint: Do not wait to upload your web page until the due date; this process can often be confusing and waiting until the ‘last minute’ can often result in frustration!
Exemplary web page (20-25 points): Completely accessible web page that is easy to read and inviting to look at. The site meets the accessibility, creativity, and content criteria listed above. Good writing style, free of mechanical or stylistic errors.

Adequate web page (14-19 points): Good overall web page, lacking in one or two of the criteria for an exemplary web page. Not entirely reflective or thoughtful, or minor writing style errors may be present.

Marginal web page (9-13 points): Overall, acceptable but with one or more significant problems. Contains some useful information, but may have substantial problems with accessibility features, writing style, or design.

Inadequate web page (1-8 points): Web page with substantial problems in important areas such as writing, accessibility, and overall thoughtfulness. Contains little or no information of value to special education practice.

Unacceptable/No web page (0 points): Web page with no value whatsoever relative to the assignment, or no web page turned in at all.

ASSIGNMENTS

EDSE 517: Computer Applications for Special Populations
Scoring Rubric for Assistive/Instructional Technology Lesson

Assistive/Instructional Technology Lesson (25 points): Due and present on 12/9

Students will design a lesson using an instructional or assistive technology of their choice. Some examples of projects include:
Creating a history lesson using Powerpoint
Creating a set of communication boards using Speaking Dynamically Pro or Boardmaker
Creating a science lesson utilizing the digital microscope, digital camera, and Powerpoint
Adapting a book using Intellipics and Intellikeys
Creating a language arts lesson using Inspiration or Kidspiration

Include a lesson plan that provides a brief overview, in a list or paragraph format, of the following points:
Lesson Topic and Goal
Content Area and Grade Level
Student Activities and Materials required for lesson
Lesson Modifications for students with special needs (if the lesson is not specifically designed for students with special needs). What types of software or hardware would support the students in doing this lesson? Be specific as to what special needs you are addressing.

Exemplary lesson (20-25 points): Appropriate assistive/instructional technology chosen, use of advanced features of the software/hardware for lesson creation, thoughtful and creative method for presenting the lesson content material within the software/hardware; consideration of students with special needs.

Adequate lesson (14-19 points): Good overall lesson, lacking in one or two of the criteria for an exemplary lesson. Uses mostly basic software features.

Marginal lesson (9-13 points): Overall, acceptable but with one or more significant problems, no advanced features of software/hardware used. Contains some useful information, but may have problems with presentation, design, or explanation.

Inadequate lesson (1-8 points): Lesson with substantial problems in important areas such as content and ways in which software/hardware is used. Contains little or no information of value to special education practice.

Unacceptable/No lesson (0 points): Lesson with no value relative to the assignment, technology not approved, or no lesson turned in at all.
