I. Description and Overview
A. EDUC 522, Foundations of Secondary Education (3:3:0)
   Education 522 offers an analysis of the philosophical assumptions, curriculum issues, learning theories, and history associated with current teaching styles. Emphasis is on applications to all disciplines taught in secondary schools. Current educational trends and issues are examined in relation to the sociology of secondary school settings. Lecture/discussion/simulation.

II. Student Outcomes
A. Students should be able to analyze teaching behaviors and categorize them according to their relationships to the following major educational philosophies: Behaviorism, Perennialism, Essentialism, Experimentalism, Existentialism, and Reconstructionism. [KB 4.3, 4.4, 5.1, 5.3]
B. Students should be able to examine the relationships among philosophy, curriculum issues, learning theories, history, and teaching styles. [KB 1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 2.4, 2.5, 2.6, 2.7, 4.4, 5.1]
C. Students should be able to state their own philosophical positions in regard to the following questions:
   1. What is the nature of the learner?
   2. What is the nature of one subject matter area you wish to teach?
   3. What are the possibilities of that subject matter area for guiding students toward meaningful learning experiences?
   4. What kinds of teaching behaviors will you exhibit to exemplify your philosophical position?
   5. What approaches to classroom management do you prefer? [KB emphasis 1; 2; 3; 4; 5]
D. Students will be able to take positions on selected issues in education and analyze how those positions relate to teaching style preferences. [KB emphasis 1; 2; 3; 4; 5]

[Relationship to Program Goals and Professional Organizations: In addition to relationships indicated by knowledge base [KB] numbers throughout this document (which are referenced to a position statement on file), the course emphasizes the following standards developed by Interstate New Teacher Assessment and Support Consortium (INTASC).]
II. The teacher understands how students learn and develop and can provide learning opportunities that support a student’s intellectual, social, and personal development.

III. The teacher understands how students differ in their approaches to learning and creates instructional opportunities that are adapted to diverse learners.

IV. The teacher uses an understanding of individual and group motivation and behavior to create a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.

IX. The teacher is a reflective practitioner who continually evaluates the effects of his or her choices and actions on others and who actively seeks out opportunities to grow professionally.

Through position papers, sample lessons representing six teaching styles, and de-briefing activities, the course secondarily emphasizes the following INTASC standards.

I. The teacher understands the central concepts, tools of inquiry, and structures of the discipline he or she teaches and can create learning experiences that make these aspects of subject matter meaningful to students.

VII. The teacher plans instruction based upon knowledge of subject matter, state and national standards, students, and the community.

Through on-line discussion the course also attends to the following INTASC standard.

VI. The teacher uses knowledge of effective verbal, non-verbal, and media communication techniques and appropriate technology to foster active inquiry, collaboration, and supportive interaction in the classroom.

Field Experience Guidelines
The following suggested field experience activities are designed to help you prepare for writing your paper analyzing teaching styles and classroom management preferences.

1. Observe a discussion session for the kinds of student participation that occur. How often are students asked to participate in divergent thinking? How often are students asked to participate in convergent thinking?
2. Observe teaching techniques to determine which ones involve students in convergent thinking and which ones involve students in divergent thinking activities.
3. Observe a lesson and determine how many academic disciplines the teacher has decided to use in that lesson. How are these various disciplines integrated?
4. Observe a “discovery” lesson to determine the nature of the investigation and its outcome.
5. Observe an “inquiry” lesson to determine the nature of the investigation and its outcome.
6. Observe a lesson in which individualization of instruction is a major focus. How does the instructor plan for helping students at different skill levels improve their expertise?
7. Talk with the cooperating teacher about the kinds of controversial issues which his/her students may be studying. Ask permission to observe a session in which a controversial issue is being examined so that you can determine what the issue is and its resolution(s).
8. Talk with the cooperating teacher to find out which method(s) he/she prefers to use and why: “discovery,” “inquiry,” problem-solving discussion, simulations, lectures, directed reading of primary sources, directed reading of secondary sources, “practice” exercises, learning centers, cooperative learning, individual research, group research/labs, activities using software and/or the internet, etc.
9. Observe rules and procedures to determine potential preferences for relationship/listening, confronting/contracting, or rules/consequences approaches to classroom management.

NOTE: ALL PROPER NAMES SHOULD BE OMITTED FROM YOUR PAPER. REFERENCES SHOULD BE MADE TO METHODS AND CLASSROOM SITUATIONS IN GENERAL.

Ask your cooperating teacher if you may talk with students briefly and at appropriate times about the activities they are pursuing.
