Office Hours: Wednesday, 4:00-6:00 or by appointment

Introduction:

This course is offered as one of the strands in the UTEEM Early Childhood Education Program, providing an integrated approach to preparing teachers to work with young children. Teachers are prepared to work with children with diverse learning needs and their families in a variety of inclusive community settings. This strand is offered in conjunction with three other courses and linked to a full-time field placement with diverse young children. Students participating in this course are enrolled as a cohort full time in the UTEEM project or by permission of the program coordinators.

Course Description:

This course provides students with an understanding of developmentally appropriate programs and practices for culturally, linguistically, and ability diverse young children. The students will explore, plan, and implement curriculum and environments using individually responsive, age-related, and culturally appropriate methods and materials. This strand will provide student interns with an understanding of the important role of play, active exploration, the construction and representation of knowledge, social interaction with peers and family members, and peers and families as significant others in children's intellectual and linguistic development. Interns will develop an appreciation for curricular adaptations unique to a variety of settings. Interns will also begin to practice the use of critical reflection as a teacher research strategy for work with culturally and linguistically diverse young learners.

Objectives:

At the completion of this course, students will:

1. Demonstrate the ability to plan curriculum activities that are responsive to the interests, preferences, motivation, interaction styles, developmental status, learning history, cultural variables, and levels of participation of three to five year old children.
2. Demonstrate the ability to plan curriculum activities that are respectful of family identified outcomes, preferences, interaction styles, and cultural lifeways.
3. Demonstrate the ability to apply current research on effective developmentally appropriate practices to teaching diverse young children.
4. Demonstrate the ability to select culturally, linguistically, and ability responsive materials that have multiple purposes, are adaptable and varied, and promote play and learning.
5. Demonstrate the ability to construct learning environments appropriate to the many settings (classroom, home, community) in which young children function so that children can learn through active exploration and interaction with other children, materials and adults.
6. Demonstrate the ability to plan and implement integrated and meaningful learning activities for diverse young children.
7. Demonstrate the ability to utilize systematic problem solving strategies to address dilemmas encountered in diverse educational and community settings.
8. Demonstrate an understanding of the varied theoretical frameworks guiding early childhood curriculum approaches and practices.
9. Begin the process of becoming a reflective practitioner.

Required Books:

Ballenger, C. (1999). Teaching other people's children. New York: Teacher's College Press. ISBN 080 77 37 895.

Course Format:

This class will meet on Thursday's from 9:00 to 4:00 for seven sessions. There will be one half-day session mid-way through the full time teaching internship on November 4, from 1:00-4:00 p.m. Students will continuously link what they are doing in their field sites with what they are learning in this class. The class will have a seminar format that requires active participation of all students and will utilize guest lecturers from the community to support content from readings.

Course Requirements:

1. Attend all class sessions (unless prior arrangements have been made with the instructors).
2. Prepare for class by completing all assigned readings.
3. Actively participate in all class discussions and activities.
4. Complete all written assignments and projects on time. These will be discussed in class, and

it essential that you come prepared. A pattern of late assignments will affect your grade.

5. Maintain an interactive, reflective, dialogue journal to be read by full time UTEEM faculty.

Note:

If you require accommodations or modifications due to a disability or other circumstances, please consult with the course instructors. The University is required by the Americans with Disabilities Act to provide support and offers resources through the Disability Resource Center and the Writing Center. Students with disabilities who seek accommodations in a course are encouraged to register with the GMU Disability Resource Center (DRC). See www.gmu.edu/student/drc or call 703-993-2474 to access the DRC. Additional resources are available through the university's assistive technology center.

Course Grading:

- | | |
|---|-----|
| 1. Participation and Preparation for Class (See rubric) | 10% |
| 2. Meaningful Dilemmas (due 9/23, 10/7, 10/21, 11/4, 12/2) | 20% |
| 3. Environment Analysis (10/8) | 15% |
| 4. Pluricultural thematic plan (preliminary ideas 10/21 – 5%, draft plan 11/04 – 10%, reflections – 15% 12/2) | 30% |
| 5. Teacher research: Memos, Video, and Reflective Analysis (12/9 – 12/16) | 25% |

First day to turn in teacher research paper and video

Dec 16 Semester Reflection and program evaluation

Last day to turn in teacher research paper and video

Description of Assignments

1. Meaningful Dilemmas

Select a situation from your internship experience that has perplexed you, caused you anxiety, or made you wonder. Describe the situation using the forms you have been given. Always retain one copy. One will be returned to you, and one will be retained by the program. This will be used in class for discussion and for practicing systematic problem solving strategies (4 points each, 20 points total). **Note: for Dilemma 5, please focus on a dilemma related to an issue centered around behavior or discipline. Topics for other dilemmas are at your discretion, based on what is meaningful for you.**

2. Environment Analysis

Draw a model of the room arrangement in your site. First, analyze the environment from your own socio-cultural perspective, through your own lens (as if you were a child). How does the environment reflect you? Then, look at it from the point of view of a child from a culture other than your own or that of the teacher. What messages are conveyed to that child? Does the child “see” him or herself in the classroom? Is there a way to connect to his or her cultural community? How welcoming is this environment for all children? What features support learning? What is this room like from the perspective of a child? What adaptations would you recommend? Discuss the room arrangement or setting from the perspective of the readings. Come to class October 7 with a detailed room arrangement and a brief reflection about what you think about this environment from the perspectives above. After the guest speaker, complete the paper with any additional reflections and recommendations. **Due no later than Oct. 8.** Typed and double-spaced (15 points).

3. Integrated Pluricultural Thematic Unit

“The teaching of culture and cultural diversity at the early childhood level is an important step in developing a sense of pride and awareness about one’s culture. It is also the first step toward the individual’s realization about the existence of diversity.” (NCSS, 1994) According to Derman Sparks and de Melendez, the time of year in which you are doing your full time internship provides particular challenges to maintaining a pluricultural perspective. During your full time internship, you will be expected to take into account your classroom community and consider how to create a culturally responsive curriculum.

Develop a two-week thematic unit appropriate for the children in your site. Use your readings and resources to develop this multicultural unit following developmentally appropriate practices. Analyze your classroom and consider the ways in which your activities can support and reflect the cultural, linguistic, and ability diversity of your classroom.

On **Oct. 21**, be prepared to share what you have learned about children’s interests and styles from your assessment assignments and possible topics for this pluricultural thematic unit.

On **Nov. 4**, be prepared to submit a draft plan which includes the following: (a) a description of how the theme was selected to consider interests of the children, their developmental status, individual differences/class profile, environmental analysis, and planning web; b) proposed room arrangement and materials; c) description of children’s literature you will use with annotations and discussion of how literacy will be incorporated throughout the theme; d) objectives – group and individual; e) description of adaptations for diverse learners; f) suggested strategies for including families and community members; g) daily schedule; and h) overview of weeks’ activities. Use resources from class handouts and readings.

On Dec. 2, be prepared to submit the final plan for the pluricultural thematic unit, as you implemented it. Attach to the plan your reflection on unit implementation, including feedback from children, major adaptations, daily reflective log addressing what happened, what went well, what you would have changed. Specifically discuss your focus child and describe individual adaptations made for him/her as a learner. What worked, what did not? Provide links to what you have learned about the child and his needs from assessment and language classes. As an early childhood multicultural educator, consider how successful you were and what was difficult; link to the issues and recommended practices presented in your readings. Please provide two copies of the paper, one to be returned, one to be retained by the program, and a disc containing the paper. **(Bring plan, products, daily log notes, and your reflection to class Dec. 2).**

5. Teacher Research: Video Analysis and Reflection

Videotape yourself as you interact with children over the course of the semester, for a total of at least 15 minutes. The time may be spread out over the semester, in different contexts, or all in one setting. Use your videotape to reflect on your role as an early educator. Use all the readings; provide specific references, to help you understand your interactions with children. Thinking of where you are in your development as a teacher at the time of the video, what goals would you set for yourself? Refer to the final chapter in Ballenger, as well as to Chapter 8 in Hull, and to your dilemmas over the whole semester to help you think about yourself as a teacher researcher. What patterns do you notice about yourself? How have you changed? What still feels like a challenge? What do you notice about your interactions with children, your pacing, your voice, your use of materials, your use of culturally appropriate practice? I need a copy of the video to view along with the paper. Please use VHS full-sized tape. If you have a mini-tape, please provide an adaptor. Please turn in two copies of the paper and a disc with the paper on it. I will return one copy and maintain one copy for my records. **May be turned in beginning December 9. Must be turned in no later than December 16.**
