Instructor: Cynthia Feist
Course Dates: Saturdays, September 24, October 15, and November 12 from 9:30 am – 3:00 pm
Course Location: Session 1 and 3: Krug Hall, Room 108
          Session 2: Thompson Hall, Room 221, the Assistive Technology lab
Phone: Home (703) 777-5095
Email: cfeist@gmu.edu or FeistyOT@aol.com
Office Hours: By appointment

Course Materials
Course information, lectures, and readings will be posted on Blackboard at http://blackboard.gmu.edu. Additional readings will be handed out in class. There is no required textbook, but there is a $40 lab fee (check payable to George Mason University) for tools and project materials.

Course Description
A focus will be made on functional applications of low-technology solutions within the areas of self-care; mobility and transfer; communication; stability and support; sports, recreation, and leisure; and academic and work environments. The course will include exploration and opportunities to design and create low-tech devices for children and adults.

Course Objectives
At the completion of the course students will:
1. Have knowledge of the continuum of high to low-tech assistive technology solutions
2. Be able to identify potential needs within six areas of function
3. List potential low-tech solutions within each of the six areas of function
4. Be able to plan, design and build appropriate low-tech solutions

Relationship of Course to Program Goals and Professional Organizations
This course is part of the George Mason University, Graduate School of Education, and Special Education Program for teacher licensure in the Commonwealth of Virginia in the special education areas of Emotional Disturbance and Learning Disabilities. This program complies with the standards for teacher licensure established by the Council for Exceptional Children, the major special education professional organization. As such, the learning objectives for this course cover
many of the competencies for curriculum and methods for teaching individuals with emotional disturbances and learning disabilities, kindergarten through grade 12.

**Council for Exceptional Children's Professional Technology Standards**

2K1: Impact of technology at all stages of development on individuals with exceptional learning needs.

7S4: Design, fabricate, and install assistive technology materials and devices to meet the needs of individuals with exceptional learning needs.

**GSE Syllabus Statements of Expectations**

The Graduate School of Education (GSE) expects that all students abide by the following:

Students are expected to exhibit professional behavior and dispositions. See [http://gse.gmu.edu](http://gse.gmu.edu) for a listing of these dispositions.

Students must follow the guidelines of the University Honor Code. See [http://www.gmu.edu/catalog/apolicies/#TOC_H12](http://www.gmu.edu/catalog/apolicies/#TOC_H12) for the full honor code.

Students must agree to abide by the university policy for Responsible Use of Computing. See [http://mail.gmu.edu](http://mail.gmu.edu) and click on Responsible Use of Computing at the bottom of the screen.

Students with disabilities who seek accommodations in a course must be registered with the GMU Disability Resource Center (DRC) and inform the instructor, in writing, at the beginning of the semester. See [www.gmu.edu/student/drc](http://www.gmu.edu/student/drc) or call 703-993-2474 to access the DRC.

Assignments and Evaluations

Students will be evaluated on the following:

1. **Low-tech, make-and-take class projects** (15 points per project for a total of 45 points)
   Students will make assigned projects that are to be completed in each class (total of 3).
   - Notebook switch
   - Adapted battery-operated toy/device
   - Adapted book/communication/educational activities

2. **Store exploration assignment** (20 points)
   Send an electronic copy to Blackboard Assignments section. Make copies to share with the class on October 15.
   Visit a store of your choice (toy, dollar, hardware, kitchen, office supply, electronic, etc.) and compile a list of items that are not designed to be used adaptively, but could be useful in a specific situation as a low-tech solution for an individual with a disability. The list should include 10 different entries including:
   - Store name and location
   - Item name and description (if possible, provide a picture or drawing)
   - Description of a situation for potential need and use of this item
   - Description of how the item could be used adaptively as a low-tech solution

3. **Final project** (35 points)
   Design and create a low-tech assistive device for an individual with a disability. Do a PowerPoint presentation to the class, including a demonstration of the device, on November 12 that:
   - Describes the user
   - Describes the purpose of the device and how to customize the device to meet the user’s needs
   - Describes how to create the device
   - Discusses a potential implementation plan to use the device with the user
   Send an electronic copy to Blackboard’s Assignment section prior to class on November 12. Make copies of your PowerPoint presentation to share with the class.

---

**Grading Scale**

A = 90-100
B = 80-89
C = 70-79
D = 60-69
F = <69
