ANSWERS AND HINTS TO STUDY QUESTIONS (SQs)

CHAPTER 5: Basic Research Designs

SQ5-1: b, c, and e.

SQ5-2: c, d, and e.

SQ5-3: c, d, and e.

SQ5-4: a and e (to some degree) — see NOTE [5.2].

SQ5-5: Under the propensity score matching of treatment groups, the “propensity” score of a person is defined by the probability with which this person can be assigned to a specific treatment group. This probability is predicted from a set of characteristics that may affect the dependent variable of the experimental study.

SQ5-6: see NOTE [5.2].

SQ5-7: c.

SQ5-8: f.
