George Mason University
College of Education and Human Development

EDRS 812
QUALITATIVE METHODS IN EDUCATIONAL RESEARCH
Fall 2010

Instructor: Joe Maxwell
Office: West 2004
Office hours: By appointment
Phone: 703-993-2119 (office)
Email: jmaxwell@gmu.edu; please use email for most communication
Class meeting: Thursday 4:30-7:10, Innovation 316 (tentative)
Prerequisites: Successful completion (with a grade of B or higher) of EDRS 810, or equivalent coursework or experience.

Expectations

Students are expected to exhibit professional behavior and dispositions. See gse.gmu.edu for a listing of these dispositions.

Students must follow the guidelines of the University Honor Code. See http://www.gmu.edu/catalog/apolicies/#TOC_H12 for the full honor code.

Students must agree to abide by the university policy for Responsible Use of Computing. See http://mail.gmu.edu and click on Responsible Use of Computing at the bottom of the screen.

If you are a student with a disability, please let me know how I can best adjust the course to your strengths and needs. Students with disabilities who seek accommodations in a course must be registered with the GMU Office of Disability Services (ODS) and inform the instructor, in writing, at the beginning of the semester. See http://www2.gmu.edu/dpt/unilife/ods/ or call 703-993-2474 to access the ODS.

Course Goals

1. Understand the most important characteristics of qualitative research, and the key ways in which this approach differs from other research strategies.
2. Understand the most important methods and strategies used in qualitative research, and how to use these in doing a qualitative study.
3. Be able to use these understandings to evaluate published qualitative research.
4. Be able to design and carry out a small-scale qualitative study.
5. Be able to effectively communicate the design, process, and results of such a study.
**Course Structure**

This class will be collaborative and interactive—be prepared for discussion! Questions are encouraged and expected, and alternative viewpoints are welcome. I value a diversity of contributions to our discussions, and I expect all of us to create an educational climate that is respectful of differences. You should also be familiar with the GMU Honor System and Code (http://catalog.gmu.edu/content.php?catoid=15&navoid=1039#Honor). Your participation as a class member will be evaluated, not by the *quantity* of your contribution, but by the *value* and *integrity* of your contribution (see Grading, below).

There are four main components of the course:

1. A class meeting once a week. The first part of each class will be devoted to mini-lectures on key topics, demonstrations, class exercises, and discussion of the readings and mini-lectures.

2. The final hour or so of most classes will be structured as a support group for your research project, during which you will receive **consultations** from me and the rest of the class on your own project, and provide feedback to others on their projects. More information on consultations is provided below.

3. **Assigned readings.** These readings are an essential part of the course; they provide necessary preparation for class lectures, activities, and discussions, and in addition they cover important aspects of qualitative research that there simply isn't time to discuss in detail in class. I expect you to come to class having thought about the readings assigned for that week and their implications for your research.

4. An individual (or collaborative) qualitative research project. A brief description of, and requirements for, this project are provided below; guidelines for the final project report, and for the assignments leading up to this report, will be given out in class and posted on the course Blackboard site (see Written Assignments, below).

**Required Books**

**Readings**

...
All of the required books should be available in the GMU bookstore. My chapter-by-chapter commentary on the first three of these is posted on the course Blackboard site.

**Recommended Books**

**Other assigned readings** will be placed either on electronic reserve or on Blackboard. These include assigned articles, unpublished memos, and my commentaries on the Glesne, Weiss, and Emerson et al. books. I will also put on electronic reserve three student project reports, which are assigned reading about midway through the course. **Reading assignments are listed for the day on which they will be discussed.**

The two most important journals specifically devoted to qualitative research in education are *Anthropology and Education Quarterly* and the *International Journal of Qualitative Studies in Education*. Many other educational research journals also publish the results of qualitative studies. The most important journals for papers dealing with qualitative methods in general are *Qualitative Inquiry* and *Qualitative Research*.

The major handbook for qualitative research methods is the *Handbook of Qualitative Research*, third edition, edited by Norman Denzin and Yvonna Lincoln (Sage Publications, 2005). Many particular fields within education also have research handbooks that include chapters on qualitative methods (for example, the *Handbook of Research on Teaching*).

**Research Project**

The research project is a major part of the work of this course, and 90% of your grade will be based on this. The range of possible projects that you can conduct is extremely broad, and the focus does not have to be specifically educational, since the main goal of the course is to learn how to do qualitative research. However, since one purpose of the project can be as a pilot study for your dissertation research, it is useful to think about how this project can inform your dissertation.

The primary requirement for the project is that it has to be genuinely qualitative in nature. (In the first class, we will discuss in detail what this means.) Almost any setting, or set of participants, is a potential source of data for your research, including a setting or topic with which you have a prior role or involvement. An initial “idea memo” for your project is due the third week of the course; I'll give you feedback on your ideas, and if I see any potential problems, we may need to meet to discuss these issues to make sure that you have a feasible project.

There are five additional specific requirements for your research project:

1. **No covert research.** This is 1) ethically problematic, 2) too difficult to manage for someone just beginning to learn qualitative research, 3) restricts your research options, and 4) doesn't allow you to learn the key skill of negotiation with those you study. You
must have the informed consent of the participants in your research. This does not necessarily require a signed consent form from participants, but it does require that you be open and candid about the purposes, nature, and possible consequences of the research. We will discuss this in more detail in connection with one of the assignments, developing a simulated proposal for Human Subjects approval for your study (in most cases you will not need actual HSRB approval for your project, unless you are collecting person-identifiable data from minors or plan to publish the results).

2. **No primarily comparative studies.** Your initial research question(s) can't focus on a difference between two groups or settings or between two categories of people. If your main interest is in such a question, I will usually recommend limiting your study to one of these settings or categories. (Differences that emerge from your study may be a legitimate focus; check with me.) While explicitly comparative studies are a valid and important form of qualitative research, they are not a good way to learn how to do qualitative research. Comparison is likely to 1) push you toward more quantitative research questions and modes of thinking, 2) reduce the depth of understanding you can gain of one group, setting, or category, and 3) make it more difficult for you to learn what is essential in qualitative research. In most cases, a course project based primarily on observation should be limited to a single setting.

3. **A minimum of**
   
   a) **3 hours of interviews,** or
   
   b) **3 hours of observations of a single setting,** plus at least one hour of interview data with one or more participants in that setting. For an interview study, you will need to record your interviews (using either audiotape or videotape), and to transcribe at least 3 hours of interview material. Normally, this will involve interviewing at least 3 different participants. In special circumstances, it may be possible to work with a single participant; check with me. For an observational study, you will need to do at least 3 hours of observations of your setting, taking written notes, and to reorganize, rewrite, and expand your rough notes to make them usable for analysis. Normally, this will involve at least 3 separate observations. The difference in the amount of material required for interview and observational studies is because interviews require more time to transcribe, and because they usually provide more material to work with for analysis. (Videotaped observations are a special case; if you plan to videotape some activity, talk to me about the amount of material required, which depends on the kind of analysis you'll be doing.) Copies of your transcripts or rewritten observational notes must be handed in with your final report.

4. **Data collection must take place through a significant part of the semester.** You can't rely mainly on previously collected data, or conduct all of your observations or interviews in a brief period (1 week or less). You need to be able to learn from your experiences, and to make corrections to your study design and techniques as you proceed.

5. **You will need to share your work for feedback.** Any arrangements that you make with participants in your study must not prevent discussing your fieldnotes and interview transcripts (with names deleted if necessary) in class. (Class members will be required to respect the confidentiality of this information; this is discussed in a separate handout on class participation.) Sharing your work in class is the only way that I can really assess
the actual process of your research, and is also an important part of that process. You can't do the work of this class in isolation.

If you are studying a setting where you have a prior role, or are interviewing people with whom you have a prior relationship, you need to discuss with me the special issues that this raises before contacting potential participants, and will need to address these issues in your final report. In addition, while getting an early start on selecting a setting and participants is desirable, you should not begin actual data collection before we’ve discussed your planned method (interviewing or observation) in class, except by special arrangement with me.

You are free to use as a setting for your research project the same site that you are using in work for another course or for an internship. However, if you do this, the amount of work involved must be appropriate for the total amount of credit—normally, you can't use the same work (e.g., turn in the same report) to get credit for two courses. In any case, if you are using the work to satisfy two different courses or requirements, you must submit, both to me and to the other instructor or supervisor, a written description of how you will use your work in this setting to satisfy the requirements of both courses, and get our signatures indicating our approval of your plans.

Written Assignments

A number of short written assignments reporting on your research project will be required during the course. These assignments are ungraded; I will return them to you with my feedback. Most of these assignments are intended, in part, as preliminary drafts of pieces that, with revision, can be incorporated in your final project report. The final written assignment for the course is a 6000-7000 word (24-28 page) project report that describes your fieldwork process and results. Guidelines for all of these assignments will be posted on Blackboard and/or given out in class. All assignments should be submitted electronically (Microsoft Word preferred), so I can insert comments using Track Changes.

If you don't complete the course assignments and project on time, you won't be able to participate adequately in class discussions, and you won't get as much out of the course. This also creates problems for me in giving you timely feedback on your work. For these reasons, late assignments and reports will not be accepted without prior permission.

Consultations

Beginning with the third class, the final hour or so of each class will be devoted to students’ consultations with the entire class on their research project. These consultations will normally be 15-20 minutes long; everyone will have the opportunity for three consultations during the semester. The purpose for these consultations is for you to get feedback on what you are doing in your project, and advice on dealing with questions or problems that you have. The first round of consultations (starting in week 2) will deal mainly with your ideas for a course project, selecting a setting and/or participants, and negotiating research relationships. The second and third rounds will deal more with data collection and analysis.
These consultations are not *presentations*, and will not affect your grade, except as described below under “Grading”. Their main purpose is to help you do a better job on your project, both through feedback in your own consultation and by learning from others’ consultations. Try not to spend too much of your allotted time talking about your project; at least half of your time should be used for getting feedback. (I’ll be a strict timekeeper, since any extra time you take will come out of someone else’s consultation.) Bringing in short handouts (planned research questions, a draft interview guide, short excerpts from interview transcripts or observation notes, examples of your data analysis methods, tentative conclusions, etc.) is helpful. **I recommend recording your consultations**, so that you can listen to others’ ideas and suggestions without having to try to write these down as they’re given.

**Grading**

Grading will be based primarily (90%) on your final project report, and secondarily (10%) on class participation. The guidelines for the final report (we’ll discuss this in class) are fairly detailed about what the report needs to cover and how this will be evaluated. Class participation will be assessed *not* on how brilliantly or how often you talk, but 1) on the value of your contributions to class discussion and of the feedback you provide to others in the class, and 2) how well you take account of feedback from others; attendance will be a factor in this part of the grade. Your grade for the course is essentially a measure of how well I believe you have achieved the course goals, based on the evidence you provide in your assignments, report, and class contributions.

The short assignments during the course, though required, are ungraded; their purpose is to give you feedback on what will become parts of your final project report. Written assignments can, however, *raise* your grade (not lower it) if an assignment clearly indicates that you had achieved a course goal that was not demonstrated in your final report. The passing grades given in the course are A+, A, A-, B+, B, and B-. (Because doctoral students are required to maintain a 3.0 grade point average, a B-, though technically a “passing” grade, must be balanced by a B+ or higher grade in another course.) If you receive a grade of B- or lower on the final report, you may rewrite the report to raise your grade, and your final grade on the report will be the average of the initial grade and the grade on the revised report.

**COURSE OUTLINE**

<table>
<thead>
<tr>
<th>Week</th>
<th>Topic and assignments</th>
</tr>
</thead>
<tbody>
<tr>
<td>1)</td>
<td><strong>Sept 2</strong> <strong>Introduction to the Course and to Qualitative Research</strong></td>
</tr>
</tbody>
</table>

Assigned:

“Introductory Notes” (emailed)
Glesne, *Becoming Qualitative Researchers*, Introduction and Chapter 1
Maxwell, *Qualitative Research Design*, Chapters 1 & 2
Becker, *Writing for Social Scientists*, Preface and Chapters 1-3 and 6
2) Sept 9    Doing Qualitative Research

Assigned:
Glesne, *Becoming Qualitative Researchers*, Chapter 2
Coles, "Method", in *The Spiritual Lives of Children* (on e-reserve)
Corsaro, "Entering the Child's World" (on e-reserve)
Strauss and Corbin, “Getting Started” (on e-reserve)

Recommended:
Hammersley and Atkinson, *Ethnography: Principles in Practice*

3) Sept 16    Site and Participant Selection, Research Relationships, Observation, and Ethics

*Project “idea memo” due*

Assigned:
Glesne, *Becoming Qualitative Researchers*, Chapters 5 & 6
Weiss, *Learning From Strangers*, pp. 33-37 and Appendix D
Maxwell, *Qualitative Research Design*, Chapter 5, sections on “Developing Research Relationships” and “Site and Participant Selection”
Simonds, “Talking with Strangers: A Researcher’s Tale” (on e-reserve)
Eckert, "Field Work in the High School" (on e-reserve)
Case: "The Unlucky Anthropologist" (Blackboard)

Recommended:
Joseph Maxwell, "Gaining Acceptance from Participants, Clients, and Policy-makers for Qualitative Research" (on Blackboard)
Tillman-Healy, “Friendship as method” (Blackboard)
Deborah Cegielski, “Research as relationship” (Blackboard)
Emerson, Fretz, and Shaw, *Writing Ethnographic Fieldnotes*, Chapter 4
Rosalie Wax, *Doing Fieldwork*, Part 1 and Chapter 31
Howard Becker, "Whose Side Are We On?" in Becker, *Sociological Work*
Deborah L. Tolman and Mary Brydon-Miller, *From Subjects to Subjectivities: A Handbook of Interpretive and Participatory Methods.*

4) Sept 23    Qualitative Interviewing

Assigned:
Glesne, *Becoming Qualitative Researchers*, Chapter 4
Weiss, *Learning From Strangers*, Chapters 1, 3, & 4, pp. 121-147, and Appendix D
Maxwell, *Qualitative Research Design*, Chapter 5, section on Data Collection
Nancy Flanagan Knapp, "Interviewing Joshua" (on e-reserve)
Recommended:
Dexter, Elite and Specialized Interviewing
Seidman, Interviewing as Qualitative Research, Chapters 6-7

5) Sept 30  Focusing Your Study

_HSRB approval form due_

Assigned:
Strauss and Corbin, “Theoretical Sensitivity” (on e-reserve)
Maxwell, Qualitative Research Design, Chapters 3-4
Goldenberg, The Limits of Expectations: A Case for Case Knowledge About Teacher Expectancy Effects (Blackboard)

6) Oct 7  Qualitative Research Project Reports: Three Examples

_Researcher Identity memo due_

Assigned:
Kristin Percy Calaff, “In El Salvador We Don’t Have Dreams” (e-reserve)
Roberta Morse, “Is it Good Enough? Student Perceptions of Project Based Learning” (Blackboard)
Enid Irwin Madaras, "The Right People to Stick By You" (e-reserve)

Recommended:
Sarah Daily, “‘Writing It Helps Me’: Young Children’s Metacognitive Awareness from the Perspective of Three Teachers” (Blackboard)
Patricia Kridler, “Being in the ‘Middle’ in Middle School” (Blackboard)
Kathleen Reilly, “From the Fourth Estate: Perspective of Three Education Reporters” (Blackboard)

7) Oct 14  Initial Analysis and Interpretation

Assigned:
Glesne, Becoming Qualitative Researchers, Chapter 7
Delamont, "The Basic Rules" (on e-reserve)
Lofland et al., “Developing Analysis” (on e-reserve)
Maxwell, Qualitative Research Design, Chapter 5, section on Data Analysis
Emerson, Fretz, & Shaw, Writing Ethnographic Fieldnotes, Chapter 6, “Processing fieldnotes: Coding and memoing”
Recommended:
- Geer, "First Days in the Field" (on e-reserve)
- Miles and Huberman, Qualitative Data Analysis, chapter 4

8) Oct 21  Interpretive, Narrative, and Case Analysis

*Research Relationship and Data Collection memo due*

Assigned:
- Weiss, Learning From Strangers, Chapter 6
- Emerson, Fretz, & Shaw, Writing Ethnographic Fieldnotes, Chapter 5, “Pursuing members’ meanings”
- Becker, “Understanding Strange Talk” (e-reserve)
- Maxwell and Miller, "Categorizing and Connecting as Components of Qualitative Data Analysis" (Blackboard)

Recommended:
- Seidman, Interviewing as Qualitative Research, Chapter 8, pp. 98-112 (e-reserve)
- Geertz, "'From the Native's Point of View': On the Nature of Anthropological Understanding" (e-reserve)
- Herbert Menzel, "Meaning: Who Needs It?" (e-reserve)
- Coffey and Atkinson, Making Sense of Qualitative Data

9) Oct 28  Drawing Conclusions and Developing Theory

Maxwell, “Theory” (Blackboard)
- Becker, Writing for Social Scientists, Chapter 8
- Chambliss, “The Mundanity of Excellence” (Blackboard)
- Case: "Summing Up a Qualitative Study" (Blackboard)

10) Nov 4  Presenting Qualitative Findings

*Data Analysis and Conclusions memo due*

Assigned:
- Glesne, Becoming Qualitative Researchers, Chapter 8
- Weiss, Learning From Strangers, pp. 42-45 and Chapter 7
- Emerson, Fretz, & Shaw, Writing Ethnographic Fieldnotes, Chapter 7
- Phelan, Yu, and Davidson, "Navigating the Psychosocial Pressures of Adolescence" (e-reserve)
- Phelan, Davidson, and Yu, "Donna Carlyle" (e-reserve)
Recommended:
Becker, Writing for Social Scientists, Chapter 3 & 7
Wolcott, Writing Up Qualitative Research, 3rd edition
Lofland & Lofland, Analyzing Social Settings, Chapter 10
Glesne, Becoming Qualitative Researchers, Chapters 9 & 10

11) Nov 11  Validity and Generalizability

Assigned:
Maxwell, Qualitative Research Design, Chapter 6
Weiss, Learning From Strangers, pp. 147-150
Glesne, Becoming Qualitative Researchers, pp. 32-33 and 151-152
Wolcott, “Emphasis on Interpretation” (e-reserve)

Recommended:
Maxwell, "Understanding and Validity in Qualitative Research" (Blackboard)
Dexter, "What Kind of Truth Do You Get?", in Dexter, Elite and Specialized Interviewing
Seale, The Quality of Qualitative Research

12) Nov 18  Critiquing and Revising a Qualitative Report

Deliver draft project report to your partner

Assigned:
Maxwell, “Reflections on rewriting my paper on ‘Diversity, Solidarity, and Community’” (Blackboard)
Becker, Writing for Social Scientists, Chapters 4 & 5
Emerson, Fretz, & Shaw, Writing Ethnographic Fieldnotes, Conclusion

Recommended:
Becker, Writing for Social Scientists, Chapters 6-7

Nov 25  Thanksgiving holiday

13) Dec 2  Feedback and Consultations; Looking Ahead

Return draft project report to your partner with feedback

14) Dec 9  Research Project Presentations

Final project reports due
Recommended Readings

Joseph Maxwell, "Gaining Acceptance from Participants, Clients, and Policy-makers for Qualitative Research", in D. Fetterman (Ed.), *Speaking the Language of Power* (on Blackboard)
