Course Description

- A. Prerequisites: Admission to the Elementary Licensure Program.
- B. Co-requisite: Enrollment in EDCI 556.
- C. Course description: This one credit course studies the development and integration of technology in the Elementary Education Literacy curriculum.

Nature of Course Delivery

This course is structured around using computers for individual and group activities that focus on the integration of technology. Students will participate in large group discussions led by the instructor and in small group discussions and activities with their classmates. In addition, students will create and/or participate in the creation of three technology products: a blog, Wiki, and a digital story.

Student Outcomes

This course is designed to enable teacher candidates to:

1. plan interdisciplinary learning experiences that enable elementary students to integrate knowledge, skills, and methods of inquiry within the Literacy curriculum;
2. identify how students differ in their approaches to learning and create instructional opportunities that are adapted to diverse learners;
3. select appropriate materials, tools, and technologies to achieve instructional goals with all learners.

Standards:

This course addresses the following national and state standards:

INTASC Standards:

6. The teacher uses knowledge of effective verbal, nonverbal, and media communication techniques to foster active inquiry, collaboration, and supportive interaction in the classroom.

The Virginia State Technology Standards for Instructional Personnel:

Instructional personnel shall...

1. be able to demonstrate effective use of a computer system and utilize computer software.
2. be able to apply knowledge of terms associated with educational computing and technology.
3. be able to apply computer productivity tools for professional use.
4. be able to use electronic technologies to access and exchange information.
5. be able to identify, locate, evaluate, and use appropriate instructional hardware and software to support Virginia's Standards of Learning and other instructional objectives.
6. be able to use educational technologies for data collection, information management, problem solving, decision making, communication, and presentation within the curriculum.
7. be able to plan and implement lessons and strategies that integrate technology to meet the diverse needs of learners in a variety of educational settings.
8. demonstrate knowledge of ethical and legal issues relating to the use of technology.

International Society for Technology in Education (ISTE) National Educational Technology Standards 2008:

1. Facilitate and inspire student learning and creativity
2. Design and develop digital-age learning experiences and assessments
3. Model digital-age work and learning
4. Promote and model digital citizenship and responsibility
5. Engage in professional growth and leadership

Description of Assignments:**Assignment #1: Blog, 25 points, Ongoing:**

Students will create and maintain their own blog. Students will post to their blog by the designated deadlines as well as comment on other students' blogs. Postings will be graded on the quality and depth of entries as well as punctuality.

Assignment #2: Wiki, 20 points, Ongoing:

Students will contribute to a class Wiki. Students will add entries to the Wiki according to a pre-determined schedule. Wiki entries will be graded on quality, depth, accuracy, and punctuality.

Assignment #3: Digital Story, 40 points, due March 2:

Students will design and create an original digital story. The digital story will be graded on the quality of the product, originality, creativity, depth, and impact of the story. This assignment is the designated performance-based assessment.

Assignment #4: Class Participation, 15 points, Ongoing:

Students will read assignments prior to class meetings and will be prepared to participate in discussions as well as in-class activities. Points will be awarded for participation and completion of these activities.

Criteria for Evaluation:

Since this is a graduate level course, high quality work is expected on all assignments. Points for all graded assignments will be based on the scope, quality, depth, and creativity of the assignments. All online assignments are due by the deadline designated in the schedule. Late assignments will not be accepted without making prior arrangements with the instructor.

Mason Mission Statement

George Mason University will be an institution of international academic reputation providing a superior education enabling students to develop critical, analytical, and imaginative thinking and to make well founded ethical decisions. It will respond to the call for interdisciplinary research and teaching not simply by adding programs but by rethinking the traditional structure of the academy.

The University will prepare students to address the complex issues facing them in society and to discover meaning in their own lives. It will encourage diversity in its student body and will meet the needs of students by providing them with undergraduate, graduate, and professional courses of study that are interdisciplinary and innovative. The University will energetically seek ways to interact with and serve the needs of the student body.

The University will nurture and support a faculty that is diverse, innovative and excellent in teaching, active in pure and applied research, and responsive to the needs of students and the community. The faculty will embody the University's interactive approach to change both in the academy and in the world. The University will be a resource of the Commonwealth of Virginia serving private and public sectors and will be an intellectual and cultural nexus between Northern Virginia, the nation, and the world. (Adopted January 1991)
