Introduces the profession of athletic training and the basic principles of preventative care commonly used in the profession. Topics will include athletic training facility organization and procedures; protective sports equipment; construction of protective devices; and application of protective taping, braces, wrapping, and protective pads. Areas to be studied include the role of the athletic trainer in sports medicine, mechanisms of athletic injuries, tissue response to injury, blood-borne pathogens, introductory techniques of the assessment and evaluation of athletic injuries and emergency procedures.

COURSE DESCRIPTION

COURSE OBJECTIVES

At the completion of this course students should be able to complete the following:

1. Select athletic taping, protective devices, or braces;
2. Apply prophylactic preventative athletic tape, protective devices, and braces;
3. Identify rules and requirements specific to sport or activity for athletic taping, protective devices, braces, etc.;
4. Design, fit, and apply custom protective devices;
5. Identify responsibilities of the sports medicine team and related disciplines;
6. Describe certification requirements for athletic training;
7. Describe legislative concerns related to athletic training;
8. List components of an athletic training room;
9. Demonstrate record keeping practices in athletic training;
10. Illustrate how tissues of the body respond to injury;
11. Classify basic musculoskeletal injuries and mechanisms;
12. Outline the process of injury evaluation; and
13. Identify the basic psychological components of injury.

COURSE OVERVIEW

This didactic course will be taught in the Athletic Training Clinical Simulation Laboratory. The focus of this course is to develop the cognitive competencies necessary for the safe, effective, and evidenced-based application of preventative care techniques in a physically active patient population. Students will become familiar with the profession of athletic training.

Attendance

Students are expected to be on time, attend all class meetings and be prepared for in class assignments and projects. Excused absences include the following: illness (must bring a receipt or note from a doctor), family death, athletic/academic event(contact instructor in advance), and others at the discretion of the instructor. For known upcoming absences, students must contact the instructor at least one week in advance to the missed class to make up work. In the case of illness or some other unforeseen absence, the student must contact the instructor via e-mail or telephone. At the next attended class meeting the student will discuss material that is to be completed. ***Students will have one week from the excused absence to complete any missed assignments.*** It is the student's obligation to pursue any make-up work.

Dress

During the laboratory section of the course, students will be asked to wear appropriate clothing to expose various body parts for the purposes of practicing the application of various emergency medical procedures. Tank tops, tee-shirts or sports bras/bathing suit tops will be required when topics focus on the upper body. Shorts will be required will be required when topics focus on the lower body. If there is a concern with , it is the student's responsibility to contact the instructor to make appropriate arrangements.

Special Requirements

This course requires a laboratory fee of \$110.00 payable to George Mason University. This fee is due at the beginning of the second class meeting. If you are paying by check you can make your check to George Mason University and in the Memo section write in "ATEP 150 Lab Fee." A receipt will be issued to you upon payment.

Technology Use During Class

As per GMU policy, all sound emitting technology is required to be turned off during the class meeting time. Additionally, *no laptop computers* will be permitted for use during class time; the exceptions are for use during presentations/projects, and technology deemed as necessary by the Office of Disability Services. Students utilizing various technology devices during class will be asked to leave class and will not be permitted to complete course work or receive any points for assignments that day.

E-mail Correspondence

Only messages that originate from a George Mason University address will be accepted. The following is an appropriate professional format:

Dear Dr. Mrs. Caswell (*Beginning salutation*)

I am looking forward to your class. (*Text body*)

Regards, (*Ending Salutation*)

Amanda Caswell (*Your name*)

Accreditation Standards

Upon completion of this course, students will meet the following Commission on Accreditation of Athletic Training Education (CAATE) competencies and proficiencies:

Code	Competency
PA-C5	Describe the etiology, pathogenesis, pathomechanics, signs, symptoms, and epidemiology of common orthopedic injuries, illnesses and diseases to the body's systems.
PD-C1	Explain the role and function of state athletic training practice acts and registration, licensure, and certification agencies including (1) basic legislative processes for the implementation of practice acts, (2) rationale for state regulations that govern the practice of athletic training, and (3) consequences of violating federal and state regulatory acts.
PD-C2	Describe the process of attaining and maintaining national and state athletic training professional credentials.
PD-C3	Describe the current professional development requirements for the continuing education of athletic trainers and how to locate available, approved continuing education opportunities.
PD-C4	Describe the role and function of the governing structures of the National Athletic Trainers' Association.
PD-C5	Differentiate the essential documents of the national governing, certifying, and accrediting bodies, including, but not limited to, the Athletic Training Educational Competencies, Standards of Practice, Code of Ethics, Role Delineation Study, and the Standards for the Accreditation of Entry-Level Athletic Training Education Programs.
PD-C6	Summarize the position statements regarding the practice of athletic training.
PD-C7	Describe the role and function of the professional organizations and credentialing agencies that impact the athletic training profession.
PD-C8	Summarize the current requirements for the professional preparation of the athletic trainer.
PD-C9	Identify the objectives, scope of practice and professional activities of other health and medical organizations and professions and the roles and responsibilities of these professionals in providing services to patients.
PD-C11	Identify and access available educational materials and programs in health-related subject matter areas (audiovisual aids, pamphlets, newsletters, computers, software, workshops, and seminars).
PD-C16	Summarize the history and development of the athletic training profession.
RM-C3	Identify and explain the epidemiology data related to the risk of injury and illness related to participation in physical activity.
RM-C4	Identify and explain the recommended or required components of a preparticipation examination based on appropriate authorities' rules, guidelines, and/or recommendations.
RM-C10	Interpret data obtained from a wet bulb globe temperature (WBGT) or other similar device that measures heat and humidity to determine the scheduling, type, and duration of activity.
RM-C12	Explain the components and purpose of periodization within a physical conditioning program
RM-C20	Recognize the clinical signs and symptoms of environmental stress.

RM-C16	Explain the basic principles associated with the use of protective equipment, including standards for the design, construction, fit, maintenance and reconditioning of protective equipment; and rules and regulations established by the associations that govern the use of protective equipment; and material composition.
RM-C17	Explain the principles and concepts related to prophylactic taping, wrapping, bracing, and protective pad fabrication
RM-C18	Explain the principles and concepts related to the fabrication, modification, and appropriate application or use of orthotics and other dynamic and static splints. This includes, but is not limited to, evaluating or identifying the need, selecting the appropriate manufacturing material, manufacturing the orthosis or splint, and fitting the orthosis or splint.
RM-P4	Select and fit appropriate standard protective equipment on the patient for safe participation in sport and/or physical activity. This includes but is not limited to:
RM-P4.1	Shoulder Pads
RM-P4.2	Helmet/Headgear
RM-P4.3	Footwear
RM-P4.4	Mouthguard
RM-P4.5	Prophylactic Knee Brace
RM-P4.6	Prophylactic Ankle Brace
RM-P4.7	Other Equipment (as appropriate)
RM-P5	Select, fabricate, and apply appropriate preventive taping and wrapping procedures, splints, braces, and other special protective devices. Procedures and devices should be consistent with sound anatomical and biomechanical principles.

REQUIRED READINGS

1. Prentice, W.E. (2010). Arnheim's Principles of Athletic Training: A Competency-based Approach, 14th Edition. McGraw Hill Publishers.
2. Beam, J. (2006). Orthopedic Taping, Wrapping, Bracing and Padding. F.A. Davis Publishers.

EVALUATION

Students will be evaluated on content standards (knowledge gained) and performance (demonstration of the content). Content standards will be assessed via written assignments, quizzes, and exams. Performance will be assessed through completion of class participation activities and competency testing.

Quizzes

As indicated on the Course Calendar, a quiz will be given at the beginning of class for the required reading. This will be a brief multiple choice and true-false assessment of your knowledge from the reading. ***You are required to bring a Scantron to each examination.*** If you are late to class, you cannot make up the quiz at the end of class.

Lecture Examinations

Four written examinations will be administered. The format of the examinations will be multiple choice, true/false, short answer, matching, and fill in the blank type questions. Each of the examinations will test material covered during the prior class meetings and previous reading assignments. Exams will also cover material in the textbook and activities completed during class sessions. ***You are required to bring a Scantron to each examination.***

Laboratory Assessment

Four assessments of various taping related psychomotor skills will be administered throughout the semester. The skills practiced in class will be assessed in a live practical examination format. This is a real time examination that will require the student to demonstrate various taping techniques. Students will be randomly scheduled for testing.

COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT

Student Expectations

- Students must adhere to the guidelines of the George Mason University Honor Code [See <http://academicintegrity.gmu.edu/honorcode/>].
- Students with disabilities who seek accommodations in a course must be registered with the George Mason University Office of Disability Services (ODS) and inform their instructor, in writing, at the beginning of the semester [See <http://ods.gmu.edu/>].
- Students must follow the university policy for Responsible Use of Computing [See <http://universitypolicy.gmu.edu/1301gen.html>].
- Students are responsible for the content of university communications sent to their George Mason University email account and are required to activate their account and check it regularly. All communication from the university, college, school, and program will be sent to students solely through their Mason email account.
- Students must follow the university policy stating that all sound emitting devices shall be turned off during class unless otherwise authorized by the instructor.
- Students are expected to exhibit professional behaviors and dispositions at all times.

Campus Resources

- The George Mason University Counseling and Psychological Services (CAPS) staff consists of professional counseling and clinical psychologists, social workers, and counselors who offer a wide range of services (e.g., individual and group counseling, workshops and outreach programs) to enhance students' personal experience and academic performance [See <http://caps.gmu.edu/>].
- The George Mason University Writing Center staff provides a variety of resources and services (e.g., tutoring, workshops, writing guides, handbooks) intended to support students as they work to construct and share knowledge through writing [See <http://writingcenter.gmu.edu/>].
