

# EDIT 563 – Teaching with Graphics

(1 credit hour)

Name: Dawn Hathaway

Office phone: 703-993-2019

Office location: Thompson Hall, L041

Office hours: T/TH 2:00 – 4:00 pm

Email address: [dhathawa@gmu.edu](mailto:dhathawa@gmu.edu)

\* Coding in **bold** reflects ISTE NETS Standards for all teachers.

## 1. Course Description

This one credit hour course is designed to assist students in exploring and developing expertise with the various graphic programs available for constructing visual images. The course will address draw and paint programs, scanning and editing images, and using visual communication to support K-12 learning.

## 2. Nature of Course delivery

The course is structured around class projects, discussions and activities, and participation in a series of model lessons designed to reflect strategies for the integration of telecommunications with the teaching/learning process. Using this collection of activities, the methodology of the course seeks to build clear bridges between technology know how and classroom practice.

## 3. Objectives

The following objectives have been established for the course:

1. Students will develop comprehensive understanding of the mechanics associated with using a variety of graphics programs; **I-A, I-B**
2. Students will develop comprehensive understanding of the mechanics associated with importing, exporting, and editing images; **I-A, I-B**
3. Students will be able to use graphics tools to support their own learning and their professional development; **I-B, V-A, V-B, V-C, V-D**
4. Students will become familiar with curricular and instructional models related to using graphics to promote student learning; and **II-A, II-B, II-C, II-D, II-E, III-A, III-B, III-C, III-D, VI-A, VI-B, VI-C, VI-D, VI-E**
5. Students will design one lesson plan for their grade and/or subject matter interests that incorporates graphics as part of the learning activity. **II-A, II-C, IV-A, IV-B, IV-C, VI-A, VI-B, VI-C, VI-D, VI-E**

## 4. Texts and Materials

1. Students are expected to obtain and bring to class appropriate materials and supplies to include 3 ½ “ disks and note taking materials.
2. Read Chapter Three – Computer Graphics by Norton & Sprague (2001) distributed in class.

## 5. Course Requirements

1. Attendance in class is mandatory, as discussions, lectures, and hands-on activities are important parts of the course.
2. Each student is expected to complete all readings and participate in all discussions.
3. Each student is expected to participate in and complete all classroom projects.
4. All written assignments must be completed on a word processor.

## 6. Course Assignments

1. Portfolio (10 points): Throughout the certificate program, students will be required to create and continually revise a professional portfolio. This portfolio should not be a collection of what the student has done, but rather a reflection of what they have learned. A section will be added to the portfolio reflecting student learning related to graphics and the teaching/learning process. **Performance-based outcome for objective 3.**
2. Graphics Lesson Plan (20 points): Students will create a lesson plan that includes some aspect or aspects of graphics as part of the overall design. A format for the lesson plan will be provided to students in class. **Performance-based outcome for objectives 1, 2, 4, & 5.**
3. Time Capsule (10 points) With a team of four others, students will pick a culture and a time period within that culture and create a time capsule comprised of objects and documents produced with graphics programs. This time capsule will be presented in the final class. **Performance-based outcome for objectives 1, 2, & 4.**
4. Class Participation (10 points): The class depends heavily on class participation and completion of in class activities. Points will be awarded for participation and completion of these activities.
5. Mentor-Mentee Discussions (50 points): On-going email discussions with mentor about the activities and connection to professional practice are an integral part of this course.

## 7. Evaluation

Since this is a graduate level course, high quality work is expected on all assignments and in class. Points for all graded assignments (see section 6) will be based on the scope, quality, and creativity of the assignments. All assignments are due at the beginning of class. Late assignments will not be accepted without making arrangements with the instructor.

Points will be assigned to all graded assignments using a rubric process. Both class participants and the course instructor will be involved in assessment of graded assignments. Prior to the due date for any assignment, the class will participate in the development of an assessment rubric. This rubric will result from a discussion of applicable course objectives and an elaboration of qualities and components associated with excellence in completion of the assignment.

When assignments are presented on the designated due date, class participants and the instructor will complete an assessment of the assignment using the rubric created in class. Class participants' ratings on the rubric will be averaged. Then the class participants' average will be averaged with the

instructor's ratings on the rubric to compute a final point value for assignments. In this way, the development of the rubric will inform the final completion of the assignments as well as serve as the instrument for assessment and determination of points awarded.

### 8. Grading Scale

Requirements	Percentage
Portfolio	10%
Graphics Lesson Plan	20%
Time Capsule	10%
Participation	10%
On-Going Discussion with Mentor	50%

Grade	Point Range
A	94-100
A-	90-93
B+	86-89
B	80-85
C	70-79
F	69-below

### COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT STATEMENT OF EXPECTATIONS

All students must abide by the following policies:

Students are expected to exhibit professional behavior and dispositions. See <http://gse.gmu.edu> for a listing of these dispositions.

Students must follow the guidelines of the University Honor Code. See [http://www.gmu.edu/catalog/apolicies/#TOC\\_H12](http://www.gmu.edu/catalog/apolicies/#TOC_H12) for the full honor code.

Students must agree to abide by the university policy for Responsible Use of Computing. See <http://mail.gmu.edu> and click on Responsible Use of Computing at the bottom of the screen.

Students with disabilities who seek accommodations in a course must be registered with the GMU Disability Resource Center (DRC) and inform the instructor, in writing, at the beginning of the semester. See [www.gmu.edu/student/drc](http://www.gmu.edu/student/drc) or call 703-993-2474 to access the DRC.

## 9. Schedule of Class Topics

Class	Class Topics	Weekly Assignments
Week One	Introduction to Syllabus Da Forms, Da Forms Introduction to graphics tools Introduction to Draw Programs Making a geometric mask Adding Color and Texture Downloading Images from the Internet	Add a 3 <sup>rd</sup> Dimension to your mask and bring to class Find an Internet image and save it on a disk
Week Two	Activity/Discussion on reading Introduction to Paint Programs Take off your shoe! Print Loading and Editing Images Print Introducing a Time Capsule and Dividing into Groups	Read Norton & Sprague chapter on graphics
Week Three	Discussion of Readings - A Concept Map Importing Images – Scanning and/or Digital Cameras Work on Time Capsule	Begin working on lesson plan Begin work on Portfolio
Week Four	Work on Time Capsule Create a rubric for assessing Time Capsules	Finish Portfolio Finish lesson plan
Week Five	Finish Time Capsule Analysis and Presentation of Time Capsules <b>Lesson Plan Due</b> <b>Portfolio Due</b>
