EDLE 618, Section 601, Spring, 2012  
Supervision and Evaluation of Instruction

Instructor: Dr. Angela Gwynne-Atwater  
Phone: 703-957-4370 (w)  
703-853-4603 (c)  
Website:  
Email:  
Mailing Address: Liberty Elementary  
25492 Riding Center Drive  
South Riding, VA 21025  
Office Hours: 8:00AM-3:00PM

Schedule Information:  
Location: Prince William County Admin. Building  
Meeting Times: Wednesdays, 4:30-7:30PM  
March 14th-May 25th

Course Description: EDLE 618 (Supervision and Evaluation of Instruction)  
This course will provide a theoretical and practical overview of the supervision and evaluation of instruction. It introduces supervision and inquiry into current issues, and best practices in supervision. We use practical, interactive exercises to develop skills in the clinical process and developmental approach to supervision.

Nature of Course Delivery  
Class sessions will consist of brief lectures, discussions, and role playing. We will utilize several videos for training/development as we observe classroom teachers at work. Students will benefit from and contribute to the learning experience to the extent that they are prepared and ready to participate in each class setting.
Learner Outcomes

Upon completion of this course, students will be able to: 1) Demonstrate the ability to identify and define effective instructional practice 2) Engage with classroom teachers in applying the principles of clinical supervision and the developmental approach to supervision 3) Demonstrate the ability to apply supervision consistent with adult learning theory, the characteristics of effective professional development, and the research on effective schools 4) Articulate a working knowledge of current issues and best practices in supervision.

Learning Objectives:

Students enrolled in this course will understand the research on adult learning theory, and how it connects with effective professional development. They will understand the five phases of clinical supervision, and how they relate to the supervisory styles and approaches. Students will observe classrooms and understand the variety of observation methodologies that can be used to collect data. And students will practice data informed decision making as a means to improve teaching and overall student learning.

Professional Standards:

ELCC Standards:
2.2.a - Candidates demonstrate the ability to facilitate activities that apply principles of effective instruction to improve instructional practices and curricular materials.
2.2.b - Candidates demonstrate the ability to make recommendations regarding the design, implementation, and evaluation of a curriculum that fully accommodates learners’ diverse needs.
2.2.c - Candidates demonstrate the ability to use and promote technology and information systems to enrich curriculum and instruction, to monitor instructional practices and provide the staff the assistance needed for improvement.
2.3.a - Candidates demonstrate the ability to assist school personnel in understanding and applying best practices for student learning.
2.4.a - Candidates design and demonstrate an ability to implement well-planned, context-appropriate professional development programs
2.4.b - Candidates demonstrate the ability to use strategies such as observations, collaborative reflection, and adult learning strategies to form comprehensive professional growth plans with teachers and other school personnel.

VA DOE Competencies:
a.1 - Knowledge and understanding of student growth and development, including applied learning and motivational theories
a.3 - Knowledge and understanding...(above), including principles of effective instruction, measurement, evaluation and assessment strategies
a.5 - Knowledge and understanding...(above), including the role of technology in promoting student learning
b.2 - Knowledge and understanding of systems and organizations, including information sources and processing, including data collection and data analysis strategies
b.5- Knowledge and understanding…(above), including effective communication including consensus building and negotiation skills

Relationship of EDLE 618 to the Internship (EDLE 791)

Although the internship is a separate course, the Education Leadership Program has integrated “embedded experiences” into course work. This means that some of the work in this class is related to your internship. You may write about embedded experiences (such as the Clinical Supervision project) in your internship journal and collective record, but they can only count over and above the minimum 320 hours required for the internship. The professional development project is another example of such an embedded experience.

Course Materials

Readings- Required

Readings- Highly Recommended:

Schmidt, Laurel. (2002) Gardening in the minefield: A survival guide for school administrators, Portsmouth, NH: Heinemann Publishing (selected sections will be used during class)

Readings-Recommended as reference only:

Videos Utilized in Class
PD 360

Online access is vital to success in this course and is important if we experience school shutdowns because of the weather or other problems. All students are now required to activate and monitor their GMU e-mail accounts. If you are uncertain about how to do this, please see me. It is my expectation that you will be fully competent to send and receive e-mail messages with attachments. If your computer at school or home has spam blocking that will prevent you from seeing messages with attachments, you are responsible for addressing this problem immediately.

All students are required to use http://www.taskstream.com as a part of this course. This is an Internet site in which I will post vital information for the course. Samples of student work will be archived on this site for purposes of course, program and college assessment. It is my expectation that all students have access to standard word processing software that can be read by Microsoft Office 2007.

Course Requirements, Performance-based Assessment and Evaluation Criteria

Attendance:
Students are expected to attend every class for its entirety. Maximum class participation points can only be earned by students who attend all classes, are on time, and do not leave early.

General Expectations:
Consistent with expectations of a master’s level course in the Education Leadership Program, grading is based heavily on student performance on written assignments. Overall, written work will be assessed using the following broad criteria:

1. Application of concepts reflected in class discussion and readings
2. Original thinking and persuasiveness
3. The ability to write in a clear, concise, and organized fashion.

Additionally, a portion of the class grade will be based on participation and the contribution you make to class discussions. The overall weights of various performances are as follows
Class Participation (10 points)

Students are expected to participate actively in class discussions, and in serving as critical friends to other students. Attendance is expected for all classes. If you must be absent, please notify me by e-mail or telephone. More than one absence will result in a reduction in participation points. Arriving at class late or leaving from class early may result in the loss of points. There will be numerous opportunities for students to demonstrate initiative during EDLE 618. Some examples include: Volunteering to lead small group class time activities; Reporting out small group findings to the entire class; Verbally challenging others’ assumptions during class discussions; Specifically citing and using previously learned materials; and initiating discussion and student-to-student interaction.

Written Assignment #1---The Clinical Supervision Project (40 points)

Students will explain the clinical supervision process to their school principal, and solicit advice as to who might be observed for the purpose of this assignment. Using the overview described in the text, and the discussion, role plays and video observations conducted during class, students will apply the five phase model in an authentic classroom setting. A written report will complete this project, consisting of the following components:

1) Context---How was the teacher selected? Describe his/her level of expertise, commitment and development, per discussion in class.

2) Description of the five phases of clinical supervision--- Describe and defend the supervisory style that you selected and utilized.
   a-Phase 1--- Include all required elements of a pre-observation conference
   b-Phase 2---Describe the classroom that you observed, generally discussing student and teacher behaviors, the length of your observation, and any challenges that you had with applying the observation methodology (ies) that you selected.
   c-Phase 3—Describe the data that you collected and specifically discuss the trends and patterns that were revealed (“analysis”). Then interpret the patterns and trends in terms of how they might help the teacher to improve his/her instructional practice (“interpretation”). And, finally, determine and defend the supervisory style that you will use in your phase 4 conference.
   d- Phase 4—Apply the supervisory style that you selected, and specifically discuss your interactions with your classroom teacher. You do not need to include a plan for improvement in your phase 4 write up.
   e-Phase 5---Conduct the critique, specifically requesting teacher input as to how the previous four phases of the clinical process might be improved.

3) Comparison of the clinical model with the actual practice at your school---Compare and contrast the five phases of the clinical model with the observation model utilized in your school. Be specific as you review the five clinical phases---for example, in phase 1, is there a pre-observation conference in your school? Provide sufficient detail and reach a conclusion as to whether or not a formative (as opposed to summative) evaluation model is being employed in your school.
Written Assignment #2—The Professional Development Project (30 points)

Students will complete a professional development proposal, focusing on the essential elements of a pd plan. This proposal should be authentic in nature, providing your school with a research-based approach to providing growth opportunities for professional staff. Students will solicit buy-in from school leaders as they consider topics and options for this proposal.

There will be four required components for this project:

1) Context--- Briefly describe your school, and if relevant for your project, the department/grade level in which you work.

2) Needs Assessment, Analysis and Interpretation—Based on class discussions and text readings, determine and defend your selection and use of no fewer than two “ways of assessing need.” Describe the assessments that you selected and your method of collecting data. Then identify patterns and trends (“analysis”), and reach conclusions as to what they mean (“interpretations”). Specifically connect your data-informed trends and interpretations to the professional development proposal that you develop in component 3 below. NOTE: During this component of this project, you will be engaged in assessing need. (authentic in which you are taking the lead, as opposed to describing how others in your school may have addressed need for a previous or current pd activity)

3) Prepare a professional development proposal that includes the essential elements of such plans (per class discussion). Be specific when addressing these essential elements, with emphasis on the proposed “learning activities.” This proposal should be authentic in nature--something that could be used in your school. NOTE: It is not expected that you will implement the proposal that you develop during the semester that you are enrolled in EDLE 618.

4) Use the readings and class discussion to connect your proposal with the research-based traits of effective professional development. For maximum credit under this component in the rubric, you should also discuss and connect the three phases of professional development (orientation, integration, and refinement) with your proposed professional development plan. NOTE: This professional development project is due on May 23, 2012, and may not exceed nine (9) double-spaced pages. You must include in an appendix a copy of the data assessment methodologies/tools that you selected and used. (for example, if you used a “review of official documents, you should include one or two pages of such docs in your appendix. If you used a survey, include a copy of the blank survey in your appendix, etc).
Students will work in small groups to plan and lead a discussion on topics that relate to the themes being addressed in class. A list of available topics is posted below, and will be reviewed at the first class meeting. The discussions will usually be conducted at the beginning of class, and will be no fewer than 60 minutes and no longer than 70 minutes in duration. Students may use the Glickman text to provide background information as they prepare for this assignment. However, the text should not be relied on as the only or most utilized source of information. Professional journals (NASSP, NAESP, ASCD, PDK, etc), official school records and documents, interviews with school leaders, local school forms and procedures, and other course texts may be used to inform the discussion.

Successful completion of this activity will result in the engagement of classmates on the selected topic. A list of references must be presented to students and the instructor at the time of the presentation.

NOTE: Unlike some “presentations” to classes, the emphasis for this activity should be on the active involvement of classmates. It will be acceptable to devote some time to context—but even this part of the assignment should be done as interactively as possible. The vast majority of the time should be devoted to guided small group activities in which everyone actively participates.

List of Topics---Spring, 2012

1st- “Walkthrough observations”--- Students will lead a discussion in which classmates are exposed to and can practice a variety of walkthrough models. Discussion leaders will make use of Downey’s work on walkthroughs, as well as others that are used in local schools. Emphasis will be placed on the espoused purposes of walkthroughs, as well as the actual/authentic procedures that are used by school administrators. It is highly recommended that the latest developments be reviewed and discussed, including the use of electronic devices to collect and analyze classroom data.

2nd- “Supervisory behaviors”--- Students will research and lead a discussion on supervisory behaviors. The Glickman text may be useful in informing this discussion. The emphasis will be on supervisory behaviors, verbal and nonverbal, as they are demonstrated by school leaders during interactions with teachers, students, and community.

3rd- “Professional development”--- Students will lead a discussion on pre-K 12 professional development. Emphasis will be placed on the research-based traits of effective pd, and how they connect with examples of professional development that the group selects and shares. The phases of professional development will be explored, including the work of Joyce and Showers.

4th- “Data informed decision making”--- Students will discuss current practices in their schools as to how data are informing the decision-making process. Discussion leaders will provide
authentic examples of data sharing and utilization in local schools. Classmates will be engaged in reviewing, analyzing and interpreting data.

5th- “Group dynamics and development”--- Students will provide opportunities for classmates to engage in identifying and explaining the behaviors of individuals in group settings, with a focus on task, person and dysfunctional roles. Tuckman’s stages of group development will also be discussed as a point of emphasis during this session.

6th- “Action research”--- Students will share authentic examples of action research as it occurs today in local schools. Emphasis will be placed on the phases/steps of action research, and on differences between action and traditional research.

NOTE: To best exceed the minimum expectations regarding the required submission of a reference list at the completion of each discussion activity session, it is recommended that the group develop an annotated reference list as a user-friendly way to expose students to the resources that were selected and utilized.

Electronic Discussion (20% of class participation grade)

Students will participate in an electronic discussion in which they work within pre-assigned groups to explore three issues relating to the second major assignment for EDLE 618---the professional development project.

Forum/Issue#1—Which issues/topics are you considering for your pd project? How have you used data to determine the possible topics that you will address? Are your school administrators aware and supportive of any of your suggested topics? Discuss possible topics within your group, and consider pros and cons before deciding on one specific area of focus.

Forum/Issue#2- Which “ways of assessing need” (text and class discussion) might be most useful with the topic(s) that you are considering? Defend your choice of assessment within your group discussion, and consider alternatives that may be suggested.

Forum/Issue#3- What “traits of effective professional development” have been in evidence in your schools during its pd programs? Provide specific examples of the research-based traits (from class discussion and text), and describe how they have been observed and used.

For taskstream electronic discussions, you may introduce comments in one of two ways:
1) “create new topic”---when you are the first person to introduce a general idea or theme and
2) “post new reply”--- when you are adding to and/or building on others’ comments. Use this option when you are asking a classmate to clarify or expand on something that he/she stated.

The pre-assigned groups will have the opportunity to discuss and determine the best time frame (within certain parameters provided by the instructor) within which they will be actively participating in the discussion. Once a decision is made and reported to the instructor, it will be expected that each member participates in and contributes to the discussion. Each student will be
expected to initiate new discussion by occasionally “creating a new topic.” It is expected that multiple comments by each student be posted within each of the three forums noted above. However, the nature of the comment is much more important than the frequency in which postings occur. Added value will be placed on comments that challenge others’ assumptions and the status quo. Students should be able to defend their own comments, and be ready to reply to suggestions from classmates.

ALL ASSIGNMENTS must be submitted electronically through taskstream. Taskstream is an online assessment system used by the college to collect student work, provide feedback to students, and maintain an ongoing record of student assessment data. You will be provided with a Taskstream account and use taskstream to submit work for courses, as well as to prepare and submit your internship portfolio.

LATE WORK: It is expected that all students submit (through taskstream) work on time, no later than midnight of the due date. Late projects may be accepted in extenuating circumstances, and will result in a minimum of a one letter grade reduction.

FEEDBACK: Rewrites of graded work will not be possible in EDLE 618. However, papers may be submitted in advance of the due date for feedback from the instructor. You may submit a complete paper, or any portion of it for feedback, but must allow at least one week in advance of the due date for the instructor to review your work and contact you electronically with feedback.

NOTE: Submit papers for feedback to the instructor using an e-mail with attachment---do not use taskstream for this purpose.

Once your paper has been submitted to taskstream, it will be assessed and given a final grade.

COMMUNICATING WITH INSTRUCTOR: Feel free to discuss any/all concerns about the class with me. You may do so using e-mail…but a personal contact (before class, during break, after class or a scheduled office visit) is preferred. IMPORTANT: When using e-mail you may use my GMU email account (aatwater@gmu.edu) or my school account (angela.gwynneatwater@lcps.org) and not the taskstream email system.

GRADING SCALE:
A+=100
A=95-99
A-=90-94
B+=87-89
B=83-86
B-=80-82
C=75-79
F=0-74
College of Education and Human Development Statement of Expectations

Students must adhere to the guidelines of the George Mason University Honor Code [See http://academicintegrity.gmu.edu/honorcode/]
-Students with disabilities who seek accommodations in a course must be registered with the George Mason University Office of Disability Services (ODS) and inform the instructor, in writing, at the beginning of the semester. [See http://ods.gmu.edu/]
-Students must follow the university policy for Responsible use of Computing[See http://universitypolicy.gmu.edu/1301gen.html]
-Students are responsible for the content of university communications sent to their George Mason University email account and are required to activate their account and check it regularly. All communication from the university, college, school, and program will be sent to students solely through their Mason email account.
-Students must follow the university policy stating that all sound emitting devices shall be turned off during class unless otherwise authorized by the instructor.
-Students are expected to exhibit professional behaviors and dispositions at all times.

Campus Resources

The George Mason University Counseling and Psychological Services (CAPS) staff consists of professional counseling and clinical psychologists, social workers, and counselors who offer a wide range of services (e.g., individual and group counseling, workshops, and outreach programs) to enhance students’ personal experience and academic performance [See http://caps.gmu.edu/]
-The George Mason University Writing Center staff provides a variety of resources and services (e.g. tutoring, workshops, writing guides, handbooks) intended to support students as they work to construct and share knowledge through writing [See http://writingcenter.gmu.edu/]
-For additional information on the College of Education and Human Development, Graduate School of Education, please visit our website [Seehttp://gse.gmu.edu/]

- Core Values Commitment: The College of Education and Human Development is committed to collaboration, ethical leadership, innovation, research-based practice, and social justice. Students are expected to adhere to these principles.

</table>
Summary of phase three (A&I) of the clinical process (8%) ELCC 2.2.c

Summary includes the required elements, with appropriate attention placed on both analysis and interpretation. The determination of supervisory style, if not previously discussed, is addressed. The analysis component includes charts, tables and/or graphs to display results.

Summary of phase four (post-observ conf) of the clinical process (8%) ELCC 2.3.a

Summary describes in detail the supervisory style and interactions between supervisor and teacher. Specific examples are included of teacher and observer comments and/or reactions.

Summary of phase five (critique) of the clinical process (8%)

Summary describes in detail the critique of the previous four phases. Teacher reaction and comments are clearly described.

Summary of phase three (A&I) of the clinical process (8%) ELCC 2.2.c

Summary includes the required elements, with appropriate attention placed on both analysis and interpretation. The determination of supervisory style, if not previously discussed, is addressed. The analysis component includes charts, tables and/or graphs to display results.

Summary of phase four (post-observ conf) of the clinical process (8%) ELCC 2.3.a

Summary describes in detail the supervisory style and interactions between supervisor and teacher. Specific examples are included of teacher and observer comments and/or reactions.

Summary of phase five (critique) of the clinical process (8%)

Summary describes in detail the critique of the previous four phases. Teacher reaction and comments are clearly described.

Summary omits or fails to address two or more of the required elements.
Comparison of the clinical supervision model with the local school and/or system's process (30%)

| Comparison is thorough and provides detail regarding the practices used in the local system. Each of the five clinical phases is addressed (compared and contrasted) | Comparison includes some description contrasting the five clinical phases with local practice | Comparison does not adequately address local school system process...the phase-by-phase review is incomplete | Comparison is omitted or is superficial |

Observation tool (10%) The actual observation tool (as completed) is provided and described, and its selection is discussed and defended

| The tool for observation is included and described | The tool is included but is not described or defended | The actual observation tool is not included as required |

Mechanics (5%)

| Completed without errors | Nearly error free. May include minor word choice and grammatical issues. | Occasional errors in grammar and punctuation | Frequent errors in spelling, grammar and punctuation |

focus on major themes, as noted in the syllabus description.

Participation by each member of activity group (15%)
(see meets expectations) …and did so enthusiastically, involving classmates in an appropriate manner
All activity group members participated in a shared manner
All participated, but the load for leading the discussion and engaging classmates was uneven
It is unclear as to whether or not all members participated

Use of outside resources & submitted list of references (15%)
(see meets expectations) …and referred to during the discussion, providing user-friendly connections for classmates
A wide variety of outside relevant resources are used… and Reference list is submitted at time of discussion
Significant emphasis on the text… and/or References are incomplete with errors and/or omissions
No demonstration of out-of-text sources… and/or References not submitted at time of discussion

Professional Development Project-Spring 2012
