PREREQUISITES: Graduate status OR Permission of Instructor

COURSE DESCRIPTION: Studies environmental laws such as the National Environmental Policy Act, and regulatory issues such as the Clean Water and Clean Air Acts. Emphasizes critical evaluation of alternatives to unresolved issues in environmental policies.

COURSE OVERVIEW: Through the case study method, this course examines the role of the federal courts and agencies courts in addressing a variety of environmental law and policy issues.

COURSE OBJECTIVES:

At the completion of this course, students should be able to:

1. Describe the limited role of the courts in resolving environmental law issues, particularly the level of judicial deference afforded to agency discretion and expertise under the Administrative Procedure Act and the Constitution.
2. Analyze the relevance and significance of specific facts cited by a court in a particular case to resolve issues/questions of environmental law.
3. Describe the role scientific and economic data in determining the social costs and benefits of environmental law and policy.
4. Identify the applicable rules of law used by courts to resolve issues of environmental law and policy.
5. Describe the legal analysis and methodology applied by courts to resolve environmental law issues, including the role of relevant case law, agency regulations, and legislative history.

REQUIRED TEXT:

Farber, Freeman and Carlson's *Cases and Materials on Environmental Law*, 8th ed. (American Casebook Series) West Law School 2009 1082 pp. ISBN-13:9780314908834

EVALUATION:

3 exams ("take home, open book", weighted equally 33.3% each)

Exams in PRLS 670 will be computer based on Blackboard., including multiple choice and True/False questions.

The exams are based on required readings and video lectures.

To prepare for the exams, students will be required to focus on the applicable rules of law illustrated and distinguished by the case reports and court opinions in the required readings. Each exam will test students' understanding of general principles of environmental law and case examples described in the required readings and lectures. Exam questions will measure students' abilities to identify general legal principles used by the court to resolve questions of environmental law generally and in particular cases.
