George Mason University College of Education and Human Development

EDUC 614: DESIGNING AND ASSESSING TEACHING AND LEARNING

Fall 2012 Prince William Cohort

Class Dates: Thursdays September 19, 26, October 3, 10, 17, 24, 31, Nov. 7, 14, 28

Class Time: 7:20 – 10:00pm

Location: Prince William Campus, Bull Run Hall, Room 246

Instructor: Debra Sprague, Ph.D

Email: dspragu1@gmu.edu
Office: Thompson Room 1807

Phone: 703-993-2069

Office Hours: By Appointment (before or after class)

CEHD Information: http://cehd.gmu.edu

Promoting Learning Development Across the Lifespan

I. COURSE DESCRIPTION:

Explores design and development of curricular, pedagogical, and assessment strategies responsive to needs and interests of students. Investigates factors that affect teaching and learning, and examines multiple ways of knowing that teachers bring to classrooms.

Prerequisite: Admission to Graduate School and ASTL Program

II. LEARNER OUTCOMES:

This course is designed to enable participants to:

- A. Examine different curricular frameworks to plan and deliver appropriate instruction, design valid assessment tasks and strategies, and ensure that curriculum, instruction and assessment are aligned.
- B. Illustrate the various Models of Teaching and appropriate use of the models to respond to the needs and interests of a diverse population of learners through appropriate lesson design and differentiated instruction.
- C. Differentiate and implement multiple measures of assessment of student learning.
- D. Analyze the effective use of technology as a tool to design, implement, and assess instruction to analyze impact on student learning.

III. RELATIONSHIP OF EDUC 614 TO ASTL PROGRAM GOALS AND NBPTS PROFESSIONAL ORGANIZATION PROPOSITIONS:

EDUC 614 is one of the five courses in the 12-credit, yearlong ASTL CORE. It is aligned with the following GSE Core Values: Research-Based Practices, Collaboration, Ethical Leadership, Innovation, and Social Justice. EDUC 614 is also aligned with the National Board for Professional Teaching Standards' (NBPTS) five core propositions, which provide the guiding principles for *what teachers should know and be able to do.*

PROFESSIONAL STANDARDS

National Board for Professional Teaching Standards II – Teachers know the subject they teach.

<u>National Board for Professional Teaching Standards III</u> – Teachers are responsible for managing and monitoring student learning.

<u>National Board for Professional Teaching Standards IV</u> - Teachers think systematically about their practice and learn from experience.

Advanced Studies in Teaching and Learning Outcomes (additional standards)

Outcome #6 - Teachers account for the needs of culturally, linguistically, and cognitively diverse learners

Outcome #8 - Teachers use technology to facilitate student learning and their own professional development.

The focus of EDUC 614 is to increase learners' ability to: 1: articulate, reflect on, and question how best to create and assess positive learning experiences appropriate for diverse student identities both collective and individual; and 2) effectively teach knowledge emanating from the various academic disciplines. This course provides

opportunities for participants to challenge, hone, and refine their ability to create constructive learning environments and appropriate assessment strategies for children.

As a result of participating and completing the requirements for the course, participants will engage in these learning experiences:

- Analyze a current lesson plan and adapt appropriately for inclusion of diverse learners, technology implications, model of teaching, and instructional design.
- Create a practical and effective assessment tool (rubric or performance checklist) to better assess student learning.
- Analyze current educational setting and practices by videotaping classroom interactions and synthesizing current research on effective instruction
- Respond in MyMason forums that will reflect learning, showing the ability to analyze teaching experiences and reflect upon those experiences in order to determine implications for future teaching.
- Collaboratively illustrate and model a selected Model of Teaching

The performance-based assessment for EDUC 614 is the following:

- Summative videotape and analysis of classroom practices, interactions, lesson plan and objectives based on two different teaching lessons

The performance-based assessment (PBA) MUST be uploaded and submitted to Taskstream for evaluation when the assignment is due. Only PBAs posted to Taskstream will be graded. NO final grades will be posted until all materials are on Taskstream.

IV. COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT

Student Expectations

- Students must adhere to the guidelines of the George Mason University Honor Code [See http://academicintegrity.gmu.edu/honorcode/].
- Students with disabilities who seek accommodations in a course must be registered with the George Mason University Office of Disability Services (ODS) and inform their instructor, in writing, at the beginning of the semester [See http://ods.gmu.edu/].
- Students must follow the university policy for Responsible Use of Computing [See http://universitypolicy.gmu.edu/1301gen.html].
- Students are responsible for the content of university communications sent to their George Mason University email account and are required to activate their account

and check it regularly. All communication from the university, college, school, and program will be sent to students solely through their Mason email account.

- Students must follow the university policy stating that all sound emitting devices shall be turned off during class unless otherwise authorized by the instructor.
- Students are expected to exhibit professional behaviors and dispositions at all times.

Campus Resources

- The George Mason University Counseling and Psychological Services (CAPS) staff consists of professional counseling and clinical psychologists, social workers, and counselors who offer a wide range of services (e.g., individual and group counseling, workshops and outreach programs) to enhance students' personal experience and academic performance [See http://caps.gmu.edu/].
- The George Mason University Writing Center staff provides a variety of resources and services (e.g., tutoring, workshops, writing guides, handbooks) intended to support students as they work to construct and share knowledge through writing [See http://writingcenter.gmu.edu/].
- For additional information on the College of Education and Human Development, Graduate School of Education, please visit our website [See http://gse.gmu.edu/].

NOTE: To determine whether the campus is closed due to inclement weather, call 703-993-1000 or go to www.gmu.edu.

V: Electronic Requirements:

Students **must have access to email** and the Internet, either at home, work or GMU campus. GMU provides students with free **email accounts** which **must be accessed for** information sent from the university or the Graduate School of Education. Go to http://mason.gmu.edu/ for information on accessing mail.

VI. MODE OF COURSE DELIVERY

Course delivery will be through mini-lectures, structured collaborative reflective groups based on teaching levels, videotape analyses, and discussion groups based on topics aligned with national standards and program/learner outcomes.

VII: Required Text:

Dell'Olio, J. M., and Donk, T. (2007). *Models of teaching: Connecting student learning with standards*. Thousand Oaks, CA: SAGE Publications.

Optional Texts:

American Psychological Association (2001). *Publication manual of the American Psychological Association* 6^{th} *ed.*). Washington, DC: Author

VIII: Required journal readings: Found in GMU's Electronic Reserves: http://oscr.gmu.edu/cgi-bin/ers/OSCRgen.cgi. When retrieving articles from the electronic reserves, choose EDUC 614 and Hardy, Shanon as the instructor. Password: Classroom

IX: GENERAL REQUIREMENTS:

- A. Class attendance is both important and required. If, due to an emergency, you will not be in class, you must contact your instructor via phone or email. Learners with more than two absences may drop a letter grade or lose course credit.
- B. It is expected that assignments will be turned in on time (the beginning of the class in which they are due). However, it is recognized that learners occasionally have serious problems that prevent work completion. If such a dilemma arises, please speak to the instructor in a timely fashion.
- C. The completion of all readings assigned for the course is assumed. Because the class will be structured around discussion and small group activities, it is critical for you to keep up with the readings and to participate in class.
- D. According to university policy, all beepers and cell phones should be turned off before class begins.

X: SPECIFIC COURSE REQUIREMENTS, ASSIGNMENTS, AND EVALUATION CRITERIA:

1. Blackboard Discussion, Ticket Out and Class Participation – 10%

Learners will reflect on their learning, their students and/or practice and respond to the readings and discussions both online and in-class discussions. This includes active participation in class discussions and in cooperative learning groups. Regular and thoughtful evidence of and the initiation of higher order questions related to class readings and discussions; regular and thoughtful participation in cooperative learning groups, and reflection to classroom practices will be the criteria for evaluation.

2. Videotaped Lessons and Analyses (55 %)

Each learner will videotape two class sessions, approximately 15-20 minutes duration, of a content lesson. The purpose for videotaping lessons is for the learner to understand what took place and try to explain why it occurred; an inquiry toward teaching – unlocking the knowledge of practice. This assignment includes 4parts – classroom demographics, lesson plan, videotape, and analysis of videotape.

- A. Classroom Demographics: Each learner will create a classroom description and set-up of the classroom that will be used in the videotapes. Included in the description will be student demographics and location of students' desks in the classroom (do not use names). The classroom description may be narrative or be a visual representation (i.e., classroom map). Information to be included:
- a. Race/ethnicity
- b. Gender
- c. IEP
- d. English language learners
- B. **Formative Videotape Analysis (20 points):** A videotape of a content lesson. The first videotaped lesson will provide a baseline of current teaching practices and teacher behaviors. The lesson can be of any *content* lesson or activity in the learner's current classroom. After viewing the videotape, the learner will:
 - a. Analyze interactions in the classroom.
 - b. Create a two column "T Chart." In the left column, learners will note what went well with the lesson and why POSITIVES; in the right column, learners will include incidences or learning experiences that appeared to negatively impact student learning of content CHALLENGES. The videotape and T column will be shared with a peer and a copy of T-chart will be sent to instructor. (10 points)
 - c. Self-assess the designed lesson plan of the videotaped content lesson (some examples of questions to consider in assessment):
 - i. Does the lesson project a coherent approach to the topic of lesson?
 - ii. Do the activities for students engage them in conceptual understanding?
 - iii. Do the activities represent appropriate variety and the best that we know regarding how students learn that discipline?
 - iv. Does the lesson address the different learning styles and background knowledge of the students described in classroom demographics?

You may also use the self-assessment checklist on p. 21 of the syllabus for the self-assessment or write a one-two page narrative of the rationale for lesson plan design. Handed into instructor also (**5 points**)

d. For the formative videotaped self-assessment, identify areas you may want to focus on changing and what evidences might you collect to indicate progress. For example, "I noted that only ten students really participated in the discussion. I will implement a response technique so all students will be engaged in the next Socratic seminar." One to two page narrative – may be included in the discussion of self-assessment of lesson design (5 points)

C. Summative Videotape Analysis – Performance Based Assessment (35 points): A second videotape of a content lesson. The second lesson to be selected for videotaping and analysis should demonstrate a lesson where the learner has altered some teaching practices based on the analysis and reflection of the previously taped lesson and peer discussion. After viewing the second videotape, the learner will:

- a. Note changes occurring from first videotaped lesson in student participation, teaching practices, student-teacher interactions, or student understanding;
 - b. Write a three-five page analysis of the videotaped lesson *using at least two references from class readings and discussions* to support statements in analysis, and provided rubric. Videotape and lesson plan will be turned in with written analysis. Embedded within the analysis should be statements related to design of the lesson; rationale for model of teaching employed, Bloom's level of objectives, and other relevant planning issues.
 - c. A rubric can be found on p. 19-20 of syllabus to assist with the analysis of teaching event and lesson plan.
 - d. The videotaped lesson will be turned in with written analysis.

Criteria for evaluation will include ability to analyze instructional lesson based on rubric. Analysis should include attention to description (context of content lesson), analysis/interpretations (questioning techniques, issues related to gender bias, responsiveness to linguistic and ability diversity, technology, feedback techniques, classroom discourse style, model of teaching, differentiated instruction, and student assessment/engagement). The video analysis must demonstrate graduate level writing and the inclusion of class resources and references. All relevant demographics for the classroom must also be included with analysis.

The performance-based assessment (summative videotape analysis) MUST be uploaded and submitted to Taskstream for evaluation when the assignment is due. Only PBAs posted to Taskstream will be graded. (VIDEOTAPE ANALYSIS WILL BE UPLOADED TO TWO LOCATIONS IN TASKSTREAM). This means NO final grades will be posted until all materials are on Taskstream. VIDEOTAPE DOES NOT NEED TO BE UPLOADED – ONLY WRITTEN ANALYSIS.

4. Model of Teaching (20%)

Learners will work collaboratively with a small group to develop and design a lesson on a selected Model of Teaching. The lesson will:

- a) describe the strengths and weaknesses of the Model of Teaching,
- b) explain when the Model of Teaching is appropriately used in the classroom, and
- c) provide for group reflection on the Model of Teaching, i.e. when; used in classroom, student response to the Model, responsive to diverse populations.

Additionally, the group will create an anticipation guide(reading guide) for the chapter on the selected model which will be distributed to classmates the week before the lesson/reading. Criteria for this assignment will be the accurate description of the Model of Teaching and group reflection.

5. <u>Technology</u> (15%)

Learners will select one of the following options to demonstrate knowledge and understanding of the effective use of technology for diverse learners. Rubrics will be provided for each of the choices.

- Two-three page critique of an article on technology effectiveness in classroom. Learners will state purpose of article, summary of content and critical comments/reflection on the article's implication for classroom practices.
- Join a blog relating to technology in K-12 classrooms. At end of the class, write a brief summary (one-two pages) of a) the topic of blog, b) synthesis of comments, and c) contribution to the blog. Include reflection on how the blog's topic impacts student learning.
- Create a "You Tube" or "Podcast" about how you use technology in your classroom to improve student learning.
- Learner may suggest a technology based alternative to the above options with instructor approval.

GRADING SCALE:

| 95-100 = A | 90-94 = A - | 86-89 = B + | 83-85 = B | 80-82 = B - | 70-79 = C | Below 70 = F |

ASTL Reflection Point 2 (Same as for EDUC 613- only turn in one Reflection Point 2):

In this section, you will focus on how coursework, related readings, and products in EDUC 613 and EDUC 614 have led you to think more deeply about the learning process and your own students and to focus more carefully on the teacher as designer of curriculum and assessment. You should also consider how you are incorporating technology into your teaching practice and your Core experience. As you reflect on your

own learning and your growth and change at this point in the Core, please address any of the applicable eight program learning outcomes and the ways in which the performance assessments included in this section provide evidence of your knowledge.

Suggested course products which may be provided as evidence of knowledge:

- 1. Case Study of a Learner (EDUC 613)
- 2. Learning Theory Group website (EDUC 613)
- 3. Video analysis of teaching practice with analysis of teaching and impact on student learning (EDUC 614)
- 4. Other, as selected by individual (be specific)

Tentative Class Schedule

This schedule may be changed at the discretion of the professor or as needs of the students or the ASTL Program dictate.

Video Analysis Rubric

Criteria	Accomplished	Competent	Evolving
Introduction: Description of Classroom Lesson – NBPTS Learning Outcome 3 ASTL Learning Outcome 3	county/state standards; alignment of objectives, assessments, and activities; rationale for teaching model used; rationale for differentiated instruction based on student demographics and lesson content; variety of assessments used to monitor student learning; and inclusion of technology if appropriate. the aspects to be included in lesson plan analysis. the aspects to be included in lesson plan analysis.		The analysis includes less than 4 of the aspects to be included in lesson plan analysis.
(10 Points)	10 points	5 points	2 points
Analysis, Interpretation of Classroom Lesson – NBPTS Learning Outcome 2 ASTL Learning Outcomes 2,6 (10 points)	The analysis thoroughly discusses strengths and weaknesses of the lesson. Strong interpretation and analysis of the importance/meaning/significance of the lesson on student learning. Best practices are noted (pace of instruction, differentiated instruction, multiple assessments, teacherstudent interactions). The analysis discusses outcomes of lesson (were objectives met?) and assessments provided evidence of student learning.	weaknesses of the lesson. Strong repretation and analysis of the ortance/meaning/significance of the on on student learning. Best practices are ed (pace of instruction, differentiated ruction, multiple assessments, teacherdent interactions). The analysis discusses comes of lesson (were objectives met?) assessments provided evidence of student or weakness of the lesson. Provides limited interpretation of the importance/meanings/significance of the lesson on student learning. Two or fewer best practices noted. Outcomes of lesson student learning is discussed.	
(10 points)	10 points	5 points	2 points
Self- Rich, thorough discussion of videotaped Curso		Cursory discussion of videotaped lesson and what was learned about	Reflection was minimally discussed and showed

NBPTS Learning Outcome 4 ASTL Learning Outcomes 4,8	student learning. *Future changes in instruction, assessment, and/or lesson design discussed. and impact on student learning. *No changes noted in instructional design and/or assessment. one's practional design and one's practional design and one assessment.		lack of understanding of one's practices and impact on student learning. Future changes not included.

Lesson Plan Self-Assessment Checklist Try to Avoid Lake Wobegon Syndrome*

Components	Accomplished	Developing	Beginning
Standards – the standards have guided the development of the content	_		
and are aligned with the objectives of lesson and reflect current			
standards of county/state			
Objectives – the objectives are aligned with the topic of lesson; a			
variety of Bloom's objectives are clearly evident. Objectives guided the			
creation of the activities and assessments.			
Assessments – a variety of assessments are included in lesson design;			
both formative and summative			
Pedagogical Content Knowledge (PCK) – evidence of knowledge of			
content and specific PCK practices are present in lesson design; for			
example awareness of concepts that may hinder student understanding is			
addressed in planning.			
Model of Teaching – a specific model of teaching is evident in lesson			
design and is appropriate for instruction of topic			
Activities – the activities are clearly aligned with the objectives and			
standards in lesson. The activities support the topic and provide practice			
for student understanding of topic. Both individual and group activities			
are included in lesson. Real-life activities, if appropriate, were included			
in lesson design.			
Differentiation of Instruction – the lesson design includes			
differentiation of instruction appropriate to backgrounds of students; for			
example for second language learners background knowledge is			
ascertained prior to instruction in order to include students in discussion.			
Technology – if appropriate to lesson, was technology considered as			
instructional resource.			

• Based on Garrison Keillor's books/radio show – everyone in Lake Woebegone is above average
