GEORGE MASON UNIVERSITY COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT

EDRS 827 Development and Validation of Assessment Scales

SUMMER – A, 2013

Meeting Time/Days: MWF (7:00pm – 10:05pm) Location: Thompson Hall, Room L014 PROFESSOR: Dimiter Dimitrov Office phone: 703-993-3842 Office location: West Building, Room 2007 Office hours: Monday and Thursday (3:00pm-4:00pm) Email address: ddimitro@gmu.edu

COURSE DESCRIPTION:

A. Prerequisites: EDRS 811

B. Focusing on the acquisition of knowledge and skills related to development of assessment scales and validation of assessment scale data in the context of education, psychology, and related fields.

NATURE OF COURSE DELIVERY:

Lectures, large group discussion, in class activities, and individual/group assignments

LEARNER OUTCOMES:

This course is designed to enable students to:

- Understand concepts, procedures, and methodological principles involved in the development of assessment instruments and validation of assessment scale data.
- Understand the contemporary treatment of reliability and validity of assessment scale data.
- Apply procedures and methodological principles underlying the development of assessment instruments.
- Conduct exploratory factor analysis for the validation of assessment scale data using the statistical packages SPSS and Mplus (Muthén & Muthén, 2008)¹.
- Conduct confirmatory factor analysis for validation of assessment scale data using Mplus.
- Apply classical and modern procedures for scale analysis and validation.
- Read and evaluate scientific articles related to development assessment instruments and validation of assessment scale data in education, psychology, and related fields.

¹ Muthén, L. & Muthén, B. (2008). *Mplus user's guide*. Los Angeles, CA: Muthén & Muthén (available also at: <u>http://www.statmodel.com</u>).

PROFESSIONAL STANDARDS:

The student outcomes are informed by the Standards for Reporting non Empirical Social Science Research in Publications of the American Educational Research Association (AERA; *Educational Researcher*, Vol. 35, No. 6, pp. 33–40). Those standards deemed most relevant to addressing the learning targets for the course are those that state that *educators will have the knowledge, skill and disposition to:*

- 1. Apply basic principles of research practices for specific educational needs
- 2. Design and operationalize steps for the development of assessment instruments in education research and related fields
- 3. Evaluate the reliability of assessment scale data in the context of education and related fields
- 4. Evaluate validity of assessment scale data in the context of education and related fields
- 5. Conduct classical and modern analysis of assessment scales using contemporary statistical software and interpret the results
- 6. Use validation research results to disseminate and advance understanding and knowledge related to assessment in education and related fields
- 7. Recognize the implications of adequate validation of assessment scales for social justice in schools and other professional organizations.

REQUIRED TEXTS:

Dimitrov, D. M. (2012). *Statistical Methods for Validation of Assessment Scale Data in Counseling and Related Fields*. Alexandria, VA: American Counseling Association.

COURSE REQUIREMENTS, PERFORMANCE-BASED ASSESSMENT, AND EVALUATION CRITERIA:

A. Requirements

- 1. In class/Homework Assignments (10%): Students will be asked to work individually on homework assignments throughout the semester.
- 2. Class Attendance and Participation (5%): Students are required to attend all classes, to be on time, prepared, follow outlined procedures in case of absence, actively participate and support the members of the learning group and the members of the class. The scoring rubric for class attendance and participation in provided in Appendix 1.
- **3.** Midterm Examination (15%): Students will take a midterm examination (closed books and notes) to demonstrate understanding and knowledge of course content covered to date of examination.
- 4. Pilot Research Study (50%): This course requires students to develop and conduct a pilot-research study related to development and/or validation of an assessment scale in the context of education. This study is intended to reflect what you have learned from this course. It should be written in a way that one would submit for a national professional conference paper presentation.

5. Final Examination (20%): Students will take a final examination (closed books and notes) to demonstrate understanding and knowledge of course content covered throughout the coursework.

Other requirements for this course are designed to build up bases for the final pilot research proposal. Research papers must be handed in on time and must adhere to the APA Publication Manual Guidelines.

This pilot research study will be divided into 4 sequential parts.

- 1. Identify a topic of scale development and/or validation in educational context; conduct a literature review; discuss significance of the proposed study; state the purpose of the study and related research questions.
- 2. Methods describe the study sample, constructs targeted by the assessment instrument, procedures of data collection, and methods of scale development and validation of assessment scale data.
- 3. Write the results section.
- 4. Discussion and Conclusion.

The presentation of the final paper will take place the last day of class in a research paper format (APA style, see also guidelines posted on the AERA website, <u>www.aera.net.org</u>.) After completing the research study, reflect on that experience. What did you learn from it? How do you think course material helped you carry out the study? [Scoring rubric for the research paper is provided in Appendix 2].

B. Performance-based assessments

All of the student products specified under course requirements will require performancebased assessments guided by grading rubrics. The scoring rubrics associated with the assessment of (a) class attendance and participation and (b) pilot research project ate proposal development assignment is provided in Appendices 1 and 2, respectively.

C. Criteria for evaluation

There are 100 total points for the course, distributed among the homework assignments (10%), class attendance and participation (5%), midterm examination (15%), pilot research project (50%), and final examination (20%).

D. Grading scale

Letter grades will be assigned as follows:

A+	97.5 - 100%,	Α	92.5 - 97.49%,	А-	89.5 - 92.49%,
B +	87.5 - 89.49%,	B	82.5 - 87.49%,	В-	79.5 - 82.49%,

- C 70-79.49%, and
- **F** below 70%

COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT

Student Expectations

- Students must adhere to the guidelines of the George Mason University Honor Code [See http://academicintegrity.gmu.edu/honorcode/].
- Students with disabilities who seek accommodations in a course must be registered with the George Mason University Office of Disability Services (ODS) and inform their instructor, in writing, at the beginning of the semester [See http://ods.gmu.edu/].
- Students must follow the university policy for Responsible Use of Computing [See http://universitypolicy.gmu.edu/1301gen.html].
- Students are responsible for the content of university communications sent to their George Mason University email account and are required to activate their account and check it regularly. All communication from the university, college, school, and program will be sent to students solely through their Mason email account.
- Students must follow the university policy stating that all sound emitting devices shall be turned off during class unless otherwise authorized by the instructor.
- Students are expected to exhibit professional behaviors and dispositions at all times.

Campus Resources

- The George Mason University Counseling and Psychological Services (CAPS) staff consists of professional counseling and clinical psychologists, social workers, and counselors who offer a wide range of services (e.g., individual and group counseling, workshops and outreach programs) to enhance students' personal experience and academic performance [See http://caps.gmu.edu/].
- The George Mason University Writing Center staff provides a variety of resources and services (e.g., tutoring, workshops, writing guides, handbooks) intended to support students as they work to construct and share knowledge through writing [See http://writingcenter.gmu.edu/].
- For additional information on the College of Education and Human Development, Graduate School of Education, please visit our website [See http://gse.gmu.edu/].

PROPOSED CLASS SCHEDULE

Session	Topic/Learning Experiences	Readings and Assignments
May 20	Introduction to development and validation of assessment scales. Types of scales and scaling process.	Text (Ch. 1)
May 22	Reliability of scale data	Text (Ch. 2)
May 24	Validity of scale data	Text (Ch. 3)
May 27	Memorial Day (No classes)	
May 29	Steps in development of an assessment instrument	Text (Ch. 4)
May 31	Exploratory factor analysis in scale validation – part 1	Text (Ch. 5)
June 3	Exploratory factor analysis in scale validation – part 2	Text (Ch. 5)
June 5	Midterm Examination	
June 7	Confirmatory factor analysis in scale validation – part 1	Text (Ch. 6)
June 10	Confirmatory factor analysis in scale validation – part 2	Text (Ch. 6)
June 12	Multitrait-Multimethod analysis in scale validation	Text (Ch. 7)
June 14	Conventional scale analysis	Text (Ch. 8)
June 17	Modern scale analysis	Text (Ch. 9)
June 19	Review and examples of scale analysis and validation	Text
June 21	FINAL EXAMINATION	

Note: **Text** = Required text (Dimitrov, 2012); **Project due on June 20th**

APPENDIX 1

RUBRIC FOR PARTICIPATION AND ATTENDANCE

		LEVEL OF PERFORMANCE		
ELEMENT	Distinguished	Proficient	Basic	Unsatisfactory
	(4-5 pts.)	(3 pts.)	(2 pts.)	(1 or 0 pts.)
Attendance	The student	The student attends	The student is	The student is
&	attends all classes,	all classes, is on	on time,	late for class.
Participation	is on time, is prepared and follows outlined procedures in case of absence. The student actively participates and supports the members of the learning group and the members of the class.	time, is prepared and follows outlined procedures in case of absence; the student makes active contributions to the learning group and class.	prepared for class, participates in group and class discussions. The student attends all classes and if an absence occurs, the procedure outlined in this section of the syllabus is	Absences are not documented by following the procedures outlined in this section of the syllabus. The student is not prepared for class and does not actively participate in discussions.

APPENDIX 2

EDRS 827

RUBRIC FOR RESEARCH PAPER

GENERAL EVALUATION CRITERIA:

- Clarity and organization
- Comprehensiveness of content
- APA style

TOTAL SCORE: **MAX = 50 pts.**

Performance Elements	Quality Points	
Introduction Section	max = 9 points	
Statement of the nature and importance of the problem and literature review related to the issues.	 4-5 points: The study problem is (a) related to development and validation of assessment scales, (b) described in a parsimonious and complete manner, (c) channeled towards the purpose of the study, and (d) embedded in a literature review on related theory and research. 2-3 points: The study problem is related to 	
	development and validation of assessment scales and overall well described, but it is not channeled towards the purpose of the study or the literature review is not quite on target.	
	0-1 points: The study problem is not clearly described, poorly channeled towards the purpose of the study, and not supported well by the literature review.	
Justification of the need for this study	2 points: The justification of the study is well described and stems from a necessity to fill up an existing gap in previous development and validation of assessment scales.	
	0-1 points: The justification of the study is not well described and/or does not stem from a necessity related to development and validation of assessment scales.	
Statement of the purpose of the study	2 points: The purpose of the study is connected to the statement of the problem and the research questions are properly described.	
and related research questions.	0-1 points: The purpose of the study is not well connected to the statement of the problem and/or the research questions are not properly described.	

Method Section	max = 13 points	
Description of the study sample	 4 points: Provided is clear, accurate, and complete description of the study sample — sampling method (e.g., random selection, volunteers, etc.), relevant demographic characteristics, sample size (total and by subgroups), and judgments about representativeness of the sample for the targeted population. 2-3 points: The description of the study sample is relatively complete, but there are drawbacks related to the description of sampling method, relevancy of demographic characteristics, sample size, or sample representativeness. 0-1 points: Provided is a poor description of the study sample, with missing elements related to method of sampling, demographic characteristics, and 	
Description of the data (instruments, scales, and score reliability)	 representativeness. 2-3 points: Provided is clear, accurate, and complete description of the assessment scale data and reliability of scores obtained for the study sample. 0-1 points: The description of the data sources is incomplete (or missing) and there is no report on score reliability for the study sample. 	
Description of the data collection method	 2 points: Provided is clear, accurate, and complete description of the data collection method. 0-1 points: The description of the data collection method is incomplete (or missing). 	
Description of data analysis methods and procedures used to address the research questions in the project	 4 points: Provided is clear, accurate, and complete description of an <i>appropriate</i> design for development and/or validation of an assessment scale. 2-3 points: The design for development and/or validation of an assessment scale is appropriate, but there is no sufficient clarity, accuracy, and/or completeness in the description of the design. 0-1 points: The design for development and/or validation of the targeted assessment scale is not entirely (or at all) appropriate. 	
Results Section	max = 14 points	
	8 points: Provided is clear, accurate, and complete presentation of relevant results in APA style by project research questions.	

	6-7 points: Provided is clear, accurate, and complete		
	presentation of relevant results by project research		
	questions, with some deviations from the APA style.		
	5-6 points: Provided is an accurate presentation of		
	relevant results by project research questions, with		
Within-text presentation of results	some deviations from clarity, completeness, and the		
obtained with the statistical data analysis	APA style.		
for each research question	4-5 points: Presented are relevant results by project		
	research questions, with some deviations from clarity,		
	accuracy, completeness, and the APA style.		
	2-3 points: Some results are irrelevant and/or there		
	problems with clarity, accuracy, completeness, and		
	APA style.		
	0-1 points: Some results are irrelevant and there are		
	serious problems with clarity, accuracy,		
	completeness, and APA style.		
	2-3 points: The tables include all necessary		
Presentation of tables	information presented in APA style.		
	0-1 points: The tables do not include all necessary		
	information and /or there APA style problems.		
	2-3 points: The figures are clear and provide relevant		
	information in APA style.		
Presentation of figures	0-1 points: There are serious problems with clarity		
	of the figures, their relevance, and/or APA style.		
Discussion Section max = 14 points			
	8 points: Provided are clear, accurate, and complete		
	conclusions drawn from the study results,		
	comparisons with findings in previous studies on the		
Conclusions drawn from the results,	topic of interest, plausible explanations of the study		
findings and implications for theory	findings, and implications for theory and/or practice.		
and/or practice	6-7 points: Provided are conclusions drawn from the		
	study results, but there are some minor problems in		
	accuracy and/or sufficiency related to comparisons		
	with findings in previous studies, plausible		
	explanations of the study findings, implications for		
	theory and/or practice, and APA style.		
	5-6 points: Provided are conclusions drawn from the		
	study results, but there are relatively serious problems		
	in accuracy and/or sufficiency related to comparisons		
	with findings in previous studies, plausible		
	explanations of the study findings, implications for		
	theory and/or practice, and APA style.		
	I IIIEOIV AIIU/OI DIACIICE, AIIU AFA SIVIE.		

	 4-5 points: Some conclusions are not well connected to the study results and there are relatively serious problems in accuracy and/or sufficiency related to comparisons with findings in previous studies, plausible explanations of the study findings, implications for theory and/or practice, and APA style. 2-3 points: Some conclusions are not based on the study results and there are more serious problems in accuracy and/or sufficiency related to comparisons with findings in previous studies, plausible explanations of the study findings, implications for theory and/or sufficiency related to comparisons with findings in previous studies, plausible explanations of the study findings, implications for theory and/or practice, and APA style. 0-1 points: The conclusions are not connected to (or not based on) the study results and there are serious problems in accuracy and/or sufficiency related to comparisons with findings in previous studies, plausible explanations of the study findings, implications for theory and/or sufficiency related to comparisons with findings in previous studies, plausible explanations of the study findings, implications for theory and/or sufficiency related to comparisons with findings in previous studies, plausible explanations of the study findings, implications for theory and/or practice, and APA
	style. 2-3 points: Provided is clear, accurate, and complete description of limitations of the study and their
Limitations of the study	 implications for the study findings and generalization. 0-1 points: There are serious problems in clarity, accuracy, and completeness of the study limitations and their implications for the findings and their generalization.
Recommendations for future research	 2-3 points: The recommendations for future research are clearly presented and stem from logical necessity for meaningful replications and/or further extensions of the study design and analyses. 0-1 points: The recommendations for future research
	are <i>not</i> clearly presented and do not address (or justify) the necessity for replications and/or further extensions.
