

**College of Education and Human Development
Division of Special Education and disAbility Research**

Spring 2014
EDSE 627 681: Assessment
CRN: 17961, 3 - Credits

Instructor: Dr. Nancy Cerar	Meeting Dates: 01/07/14 - 03/11/14
Phone: (703)785-4089	Meeting Day(s): Tuesday
E-Mail: nirby@gmu.edu	Meeting Time(s): 4:30 pm-8:30 pm
Office Hours: By appointment	Meeting Location: OCL OCL

***Note:** This syllabus may change according to class needs. Students will be advised of any changes immediately through George Mason e-mail and/or through Blackboard.*

Course Description

Offers knowledge and experiential learning activities related to assessment of students with mild disabilities. Includes statistical and psychometric concepts in assessment. Addresses norm-referenced, criterion-referenced, curriculum-based, and informal assessment for instructional and placement decisions.

Prerequisite(s): None

Co-requisites: None

Advising Contact Information

Please make sure that you are being advised on a regular basis as to your status and progress through your program. Mason M.Ed. and Certificate students should contact the Special Education Advising Office at (703) 993-3670 for assistance. All other students should refer to their faculty advisor.

Nature of Course Delivery

Learning activities include the following:

1. Class lecture and discussion
2. Application activities
3. Small group activities and assignments
4. Video and other media supports
5. Research and presentation activities
6. Electronic supplements and activities via Blackboard

Learner Outcomes

Upon completion of this course, students will be able to:

- Provide the definition of assessment and the purposes and assumptions regarding assessment of exceptional children.
- Compare and contrast the terms assessment and testing.
- Describe relevant ethical standards, litigation, and legislation related to assessment.
- Describe the characteristics of norm-referenced, criterion-referenced, curriculum-based and informal teacher-made tests, their similarities and differences, and their respective roles in the assessment process.
- Demonstrate knowledge of basic measurement concepts and evaluate the psychometric properties of individual tests.
- Create graphic displays of data in appropriate formats including: stem and leaf plot, scatterplot, and line graph using a computer spreadsheet.
- Calculate descriptive statistics using a computer spreadsheet.
- Interpret test results, generate appropriate educational goals and objectives based upon these results, and report test results in a professional written format.
- Select, administer, and score of a variety of educational tests.
- Use assessment information in making eligibility, program, and placement decisions for individuals with exceptional learning needs, including those from culturally and/or linguistically diverse backgrounds. § Write assessment reports of academic achievement tests.
- Conduct curriculum-based assessments to guide instructional decision-making. § Explain the benefits and limits of different forms of assessment (e.g., individual, norm-referenced assessment vs. continuous progress measures).
- Explain the benefits and limits of different forms of data collected for assessment (e.g., standard scores vs. grade equivalents).
- Score and interpret behavior observation protocols from time sampling, event recording, and interval recording procedures.
- Describe the procedures and purposes of Response to Intervention (RTI).

- Critique assessment and instructional accommodations relative to specific learning characteristics.

Required Textbooks

Overton, T. (2012). *Assessing learners with special needs: An applied approach* (7th ed.). Upper Saddle River, N.J.: Merrill/Pearson. [ISBN: 9780131367104]

Digital Library Option

The Pearson textbook(s) for this course **may be** available as part of the **George Mason University Division of Special Education and disAbility Research Digital Library**. Please note that not all textbooks are available through this option. Visit the links below before purchasing the digital library to ensure that your course(s) text(s) are available in this format. The division and Pearson have partnered to bring you the Digital Library; a convenient, digital solution that can save you money on your course materials. The Digital Library offers you access to a complete digital library of **all Pearson textbooks** and MyEducationLabs used across the Division of Special Education and disAbility Research curriculum at a low 1-year or 3-year subscription price. Access codes are available in the school bookstore. Please visit <http://gmu.bncollege.com> and search the ISBN. To register your access code or purchase the Digital Library, visit:

<http://www.pearsoncustom.com/va/gmu/digitallibrary/education/index.html>

- 1 year subscription \$200 ISBN-13: 9781269541411
- 3 years subscription \$525 ISBN-13: 9781269541381
- Individual e-book(s) also available at the bookstore link above or at <http://www.pearsoncustom.com/va/gmu/digitallibrary/education/index.html>

Additional Readings

Jim Wright (1992). *Curriculum-based measurement: A manual for teachers*. Syracuse (NY) City Schools. Retrieved from: <http://www.jimwrightonline.com/pdfdocs/cbaManual.pdf>

Other readings will be posted on the class Blackboard site.

Course Relationships to Program Goals and Professional Organizations

This course is part of the George Mason University, Graduate School of Education (GSE), Special Education Program for teacher licensure in the Commonwealth of Virginia in the special education areas of Special Education: Students with Disabilities who Access the General Curriculum K-12. This program complies with the standards for teacher licensure established by the Council for Exceptional Children (CEC), the major special education professional organization. The CEC standards that will be addressed in this class include Standard 4: Instructional Strategies and Standard 8: Assessment.

GMU POLICIES AND RESOURCES FOR STUDENTS:

- a. Students must adhere to the guidelines of the George Mason University Honor Code [See <http://oai.gmu.edu/honor-code/>].
- b. Students must follow the university policy for Responsible Use of Computing [See <http://universitypolicy.gmu.edu/policies/responsible-use-of-computing/>].
- c. Students are responsible for the content of university communications sent to their George Mason University email account and are required to activate their account and check it regularly. All communication from the university, college, school, and program will be sent to students solely through their Mason email account.
- d. The George Mason University Counseling and Psychological Services (CAPS) staff consists of professional counseling and clinical psychologists, social workers, and counselors who offer a wide range of services (e.g., individual and group counseling, workshops and outreach programs) to enhance students' personal experience and academic performance [See <http://caps.gmu.edu/>].
- e. Students with disabilities who seek accommodations in a course must be registered with the George Mason University Office of Disability Services (ODS) and inform their instructor, in writing, at the beginning of the semester [See <http://ods.gmu.edu/>].
- f. Students must follow the university policy stating that all sound emitting devices shall be turned off during class unless otherwise authorized by the instructor.
- g. The George Mason University Writing Center staff provides a variety of resources and services (e.g., tutoring, workshops, writing guides, handbooks) intended to support students as they work to construct and share knowledge through writing [See <http://writingcenter.gmu.edu/>].

PROFESSIONAL DISPOSITIONS

Students are expected to exhibit professional behaviors and dispositions at all times.

CORE VALUES COMMITMENT

The College of Education & Human Development is committed to collaboration, ethical leadership, innovation, research-based practice, and social justice. Students are expected to adhere to these principles. [See <http://cehd.gmu.edu/values/>]

For additional information on the College of Education and Human Development, Graduate School of Education, please visit our website [See <http://gse.gmu.edu/>]

Course Policies & Expectations

Attendance.

Students are expected to: (a) attend all classes during the course, (b) arrive on time, (c) stay for the duration of the class time, and (d) complete all assignments. Attendance, timeliness, and professionally relevant, respectful and active participation are expected and required in order to earn weekly participation points.

Class attendance is crucial to course competence; however, there may be an instance when you are not able to attend class. ***Please do not request permission to miss a class***—you must make your own decision.

For any absence, please notify the instructor by email prior to the start time of the missed session. For the *first* absence, a student does not earn credit for the participation points for that session and takes on the responsibility of obtaining all missed information from another student. Students who are absent are held responsible for the material covered and assignments given and due.

A *second* absence will result in the final grade dropping by 5 points.

Three absences will result in a base grade of 70 points, from which unearned points will be deducted.

If there are truly extenuating circumstances, it is your responsibility to consult with the instructor.

Participation.

Active participation includes:

- Listening to and participating in class discussions
- Taking notes
- Listening to instructor presentations and feedback
- Checking your gmu email
- **Completing all readings and other assignments prior to the start of each class session**
- Coming to class with materials including textbooks and relevant materials from the class website
- Submitting all assignments prior to or on the assigned date and time

Active participation does not include:

- Sleeping in class
- Surfing the web, doing email, and otherwise engaging in non-instructional activities during class time
- Holding conversations with your classmates during whole class instruction
- Taking cell phone calls during class
- Other off-task behaviors that are not relevant to instruction.

Behaviors in the list above are not only non-indicators of participation, they are contra-indicators. That is, if you are doing those things, you are not participating in class. Students will fail to earn points for coming late, leaving early or non-engagement in the instructional activities during the time that they are in class. Repeated violations of these standards of deportment will be referred to the George Mason University Special Education Department faculty as evidence that the individual lacks the “disposition to be a teacher.” Such a finding can result in dismissal from the education program.

Late Work.

Ten percent of the available points for the assignment will be deducted for late submissions during the **first week after the due date. After one week** from the due date, assignments will be penalized **an additional 10% of the total available score for each week they are late.** Thus an assignment that is three weeks late is able to obtain only 75% of the points for the assignment regardless of the quality of the work. After three weeks, the assignment will no longer be accepted and a score of zero will be entered into the grade book for that assignment.

The point deduction will be made after the grading is complete. In the case of an assignment that earned 90 out of 100 points, the student grade would be a score of 65 (90-25). The points are deducted for each week at the time that the assignment was originally due.

The date that the assignment was loaded into the Blackboard Assignment folder will be the date of record. Partially completed or inadequate assignments loaded into the Blackboard Assignment folder will be the assignments of record for the student.

Submitting an assignment late does not alter the due dates of the other assignments and prevents timely feedback regarding their work that may be of value in later assignments. Strive to keep up with the assignment schedule so that you will be able to have appropriate formative evaluation and feedback from your instructor across the semester.

TaskStream Submission

Every student registered for any Special Education course with a required performance-based assessment is required to submit this assessment, (NO ASSESSMENT REQUIRED FOR THIS COURSE) (regardless of whether a course is an elective, a onetime course or part of an undergraduate minor). Evaluation of the performance-based assessment by the course instructor will also be completed in TaskStream. Failure to submit the assessment to TaskStream will result in the course instructor reporting the course grade as Incomplete(IN). Unless the IN grade is changed upon completion of the required TaskStream submission, the IN will convert to an F nine weeks into the following semester.

If you have never used TaskStream before, you **MUST** use the login and password information that has been created for you. This information is distributed to students through GMU email, so it is very important that you set up your GMU email. For more TaskStream information, go to <http://cehd.gmu.edu/api/taskstream>

Grading Scale

- 95 – 100% = A
- 90 – 94% = A-
- 80 – 89% = B
- 70 – 79% = C
- < 70% = F

Assignments*	Possible Points
1) Attendance & Participation	30 pts
2) Statistics Homework	40 pts
3) Standardized test: guided report/interpretation	50 pts
4) IRIS Module	40 pts
5) CBM proposal	10 pts
6) CBM Project	100 pts
7) Midterm Exam	80 pts
Total	350 pts

*Ten percent of assignment total points will be deducted for late work

**See rubrics posted on Blackboard

Assignments

Performance-based Assessment (TaskStream submission required).

NONE

Performance-based Common Assignments (No TaskStream submission required).

Curriculum Based Measurement (CBM) Project

Each student will complete a curriculum-based measurement project including at least three baseline measures and six instructional probes for a total of eight separate measurements of the student's performance. Any academic curriculum area is acceptable for the project; however, the curriculum taught must be appropriate for continuous progress monitoring and the tasks selected must be an academic learning task.

Practicing teachers are encouraged to select curricular areas for which they currently bear instructional responsibility. Students in the class may also create their lessons for other college-aged students or friends and family members.

Project Required for this Course

Since this project was conceived and developed, a number of other courses have begun to use this idea as a class project. Students often ask if they may simply submit the project completed in another class to fulfill the requirements of this assignment. The answer is no.

There are a number of reasons for requiring a new project for this submission. Chief among them is my belief that students should take every opportunity to expand their repertoire and refine their skills while working with the class instructor as a mentor. Resubmitting a previously completed assignment gains you nothing but a very small amount of free time and provides no benefit for your own students.

Second, the requirements for this project are probably different from the requirements of the project you completed in your other classes. Students who have resubmitted projects from other classes have been disappointed in the grades they received in this class.

Third, resubmitting projects limits the number of artifacts that you will have for your portfolio review. It may make things easier now, but it is like running up credit card debt. Very painful when it finally catches up with you!

Penalty for violating this policy. Students who resubmit projects completed in other classes to fulfill this requirement will have the grade for this major assignment reduced to ZERO for the assignment. This project is one fifth of the grade for the course; consequently, having a grade of zero means that you can earn no grade higher than a B for the course and that can only happen if you have 100% on every other assignment (a very unlikely scenario because of my emphasis on formative evaluation). Don't take the risk. You'll be a more competent teacher and I'll be a happier instructor if you do something new and original for this class. Be creative!

Types of Instructional Outcomes Best Suited for CBM

Academic curriculum. Your CBM project must target instruction of tasks from the academic curriculum such as those that would be used to support students in schools. For example, measures of reading or calculation fluency, identification or matching of facts from a curriculum area, spelling tasks, mathematical calculation, or vocabulary (English or other language). Developing motor skills used for sports or games, playing musical instruments or other nonacademic tasks are very difficult to measure and are not appropriate or acceptable for your project in this class. There are, however, academic tasks in every aspect of athletics and the arts and you may use one of those tasks for your project.

Think about what the choice of target area says about you as an educator to the reader of your portfolio. This project is a required artifact for the portfolios of degree-seeking students. Teaching your roommate to play guitar hero demonstrates a high level of disinterest in the welfare of your present and future students. Projects that target important and demanding aspects of the curriculum are more impressive to portfolio evaluators and potential employers than are projects devoted to more tangential aspects of schooling.

Continuous progress monitoring. Curriculum-based measure assumes a variable appropriate for continuous progress monitoring. Tasks that are appropriate for continuous progress monitoring require the individual to be both accurate and fast in their responses. Such

tasks are called fluency tasks. Fluency tasks require practice for mastery; therefore, they can be assessed repeatedly to show progress toward a pre-identified goal. Single trial, discrete learning tasks are better measured by single-administration of a criterion-referenced measure.

Discrete response tasks. Curriculum-based measurement lends itself most directly to behaviors for which fluency (the union of rate and accuracy) is the primary determinant of competence. Elements such as reading fluency, arithmetic computation, recall of factual information, and so on are easily monitored through CBM because they are composed of discrete behaviors which can be scored binomially (i.e., right or wrong) and must be executed automatically in order for them to be usable in higher-order tasks that rely upon them. This allows one to consider the child's proficiency of the target behavior to be judged in terms of "hits and misses" exhibited during a certain time period. Behaviors that are scored holistically or qualitatively do not lend themselves as easily to CBM. Also, behaviors that are complex or deliberative are poor choices for CBM.

Specific Steps for Completing the CBM Project and Report

1. Specify reason for assessment. A variety of legitimate reasons for assessing learning and performance exist. Find something better than: "I had to do project for a class."
2. Make sure that the content you are teaching is appropriate for continuous progress assessment. That is, do not set up a series of discrete criterion referenced tests that could be administered independent of each other and without reference to each other. *Such projects can receive grades no higher than 70%, even if everything else is perfect!*
3. Analyze curriculum to determine the content and skills necessary to complete the task.
4. Formulate behavioral objectives. What does the person have to do to show that they know the skill how well and how fast do they have to be able to do it? Even though the word objectives is plural, you only need one for the project.
5. Develop appropriate assessment procedures (i.e., probes). A clear objective leads directly to a logical probe. Look back at your objective. What do you want the student to do? In what format? How well? How fast?
6. Create your probes ensuring that each probe is of the same difficulty, same number of items, same format, and same tool skills as the others. *The first probes (baseline measures) should be as difficult as the last probes that you will use.*
7. Obtain baseline data. One data point is not sufficient. Collect a *minimum of three baseline measures*, if the baseline measures are stable, then proceed to the next step. If the first three measures show instability, collect a fourth measure. If the fourth point is similar to either of the first measures, select a measure of central tendency to represent the overall baseline score for the left side of your aimline. If the addition of a fourth measure shows a trend, consider selecting a different topic or continue to probe until a stable baseline is obtained.

8. Conduct instruction and collect assessment data (6-10 lessons of ten to fifteen minutes in duration are sufficient for this exercise). You will need in addition to data indicating a stable baseline, data from a *minimum of six instructional probes*.
9. At each probe, load you data on the computer-generated graph that describes your project and apply the data decision rules so that you may adjust your instruction as needed.
10. Repeat steps as necessary.
11. Create a summary written presentation of your project. Each written summary should include the following headings:
 - a. Student Information
 - b. Content Description and Reason for Selection
 - c. Behavioral Objective
 - d. Description of the Probe(s) and measurement format including time limits
 - e. Description of the instructional methods/materials employed
 - f. Performance graph
 - g. Discussion of results including:
 - o summary of the student responses to instruction
 - o any decisions made using the data decision rules
 - o recommendations for others or to be implemented on a repeated implementation (i.e., what would you do different next time?)
12. Submit your report, including the computer-generated CBM graph through the Digital Dropbox.

CBM Proposal (10 points)

I give three grades on this project. Two of them are alterable but require resubmission of the proposal.

- A *zero* means that your idea won't fit the project parameters at all. With a zero, you need a completely new idea.
- A score of *five* means that you are in the ballpark but some things need to be changed. If you write to me with questions about how to change the proposals, I still need the proposal form to be revised to reflect the final decision and uploaded again so that we have a record of the agreed upon project. When we have agreement and the revised proposal form is uploaded, I change the grade to a ten.
- A score of *ten* means good to go. Suggestions might appear in the proposal form but they are up to the author when the score is already a ten. You can let me know about your decision or ask questions, but you are ready to proceed without further input from me.

Finally, and this is important. There are two places on Blackboard labeled CBM. One is for the *proposal*, the other is for the *project*. Please select the proper option. Proposals uploaded in the project slot will be deleted without comment so that the system will allow your project to upload in that slot.

Other Assignments.

Standardized Test Report & Interpretation

(This will be started in class and will be finished outside of class either with a partner or alone)

Download the files. You will be required to write a reports given data collected for you and available on the class website. There are three files necessary for the report assignment. They will appear in the folder labeled **Test Report** under the Assignments button on the Blackboard site. The three files you will need to download for this assignment are:

- ACH-Test-Report1-Data.pdf
- ACH-Test-Report1-Info.doc
- Ach-Test-Report-Template.doc

How to Use the Files

ACH-Test-Report1-Data.pdf. This file contains a computer printout of scores from the test given to this student. The printout should be attached to the end of a report; *however*, most laypeople and many professionals find this printout to be overwhelming. Therefore, your job will be to extract various pieces of information from this printout and insert them into the test report template provided for you.

ACH-Test-Report1-Info.doc. This document contains the notes that the test administrator made in giving the test. Information about student test behavior is described here as well as information from the student's referral, educational history and several reports from classroom teachers regarding the student's performance in their classes. Your job is to extract the relevant information from this document and insert them in the appropriate places on the template provided for you.

Ach-Test-report-Template.doc. The template contains the major headings and shell of a data table that are required for this report. Your job in this part of the assignment is to insert the data from the other two documents into the template and make a coherent report.

Under each heading, you will find a short description of what is to be done for that section *in italics* (To make things a little easier for you, I have also loaded a document containing only the headings. You might download the one with the instructions and then write your report on the blank version so that you do not have to worry about italics and font color.). Delete the italicized instructions for the version that you submit in class. Also, make sure that the italics are turned off in the text that you write for your report. The instructions form the basis for

the scoring rubric that appears later in this syllabus. That means that I will be specifically looking for the things for which the instructions ask.

ONLINE SUBMISSION OF STUDENT WORK REQUIRED

All student work *must* be submitted through the **Blackboard Assignment** function on the class website. Due dates are posted on the syllabus schedule and also on the blackboard site. On time submissions are required to be in the class Assignment box *by the beginning of the class session on the due date*. Only submissions through the assignment box will be accepted. **Assignments sent as email attachments will be deleted without opening them.**

Each scoring rubric contains points for on-time submission of assignments. All assignments are due at the beginning of the class period on the date indicated. The points for on-time submission are no longer available after the submission deadline passes.

Submitting an assignment late does not alter the due dates of the other assignments and prevents timely feedback regarding their work that may be of value in later assignments. Strive to keep up with the assignment schedule so that you will be able to have appropriate formative evaluation and feedback from your instructor across the semester.

Graded assignments will be returned to you through the class assignment box feature as well. I suggest that you download and preserve the returned assignments with the comments and suggestions for use in your portfolio. The required portfolio artifact for this course is the CBM project.

File Names for Online Submission

You must include your name in the file name when you submit to Blackboard. I will deduct five points from each submission (nonrefundable) if your file downloads without your name in the title. Non-refundable means that even if you send the file early for feedback purposes, you lose the five points for the assignment if it does not contain your name *in the file name*.

Blackboard will not add your name to your submission as is required for this class. It will label it on the server but when it downloads, only the name of the file *as it appears on your computer* will be transmitted. The name must be assigned to the file on your computer before you send it to Blackboard.

The format for the file name is:

<your last name-assignment name>

If I were submitting homework assignment 1 through the Dropbox, I would call it:

Cerar-Homework 1

Note: If the file name on your computer does not look like my example, it will not look like my example in dropbox or when it downloads to my computer and you will lose points.

Schedule

Tentative Class Schedule*

Class	Date	Topic	Preparation
1	1/7	Introduction and Course Overview Legal, professional, and ethical requirements relative to assessment	Overton Chapters 1 & 2
2	1/14	CBM, and Progress Monitoring	Overton Chapters 6 & 7 Espin (2000) Fuchs & Fuchs (1986b) Hosp & Hosp (2003)
3	1/21	Quantitative Measurement Concepts I Computers in assessment data management*	Overton Chapter 3 Excel instruction on website CBM Proposal Due
4	1/28	Quantitative Measurement Concept II	Overton Chapter 4 Daub (1996) Fuchs & Fuchs (1986a)
5	2/4	Achievement Tests	Overton Chapters 5 & 8 Statistics Homework Due
6	2/11	Analyzing tests & writing reports	Overton Chapter 13 Midterm via Blackboard Due, Monday 2/17 by 11:59p.m. (Individual effort, no collaboration with classmates)
7	2/18	Behavior Intelligence and Adaptive Behavior RTI	Overton Chapter 9 Overton Chapter 10 Brigham (2010)

8	2/25	Alternative assessments	Thurlow (2001) Conderman (2010) Test Report 1 Due
9	3/4	Classroom testing, grading, etc. Test accommodations	Bateman (2009) Byrnes (2008) IRIS Module Due
10	3/11	CBM presentations	CMB Report Due

*This syllabus may change according to the class needs.

Grading the Major Assignments

Scoring protocols for the assignments in this class appear on Blackboard under Assignments.
