

**GEORGE MASON UNIVERSITY
COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT
GRADUATE SCHOOL OF EDUCATION
Elementary Education Program**

EDCI 553.001: SCIENCE METHODS FOR THE ELEMENTARY CLASSROOM

3 Credits

Mondays, 4:30-7:10 Thompson 2020

Instructor: Dr. Erin Peters-Burton, NBCT
Phone: (703) 993-9695
Email: epeters1@gmu.edu
Office hours: By appointment only

This course is only open to students in the Intensive Program of Elementary Education.

COURSE DESCRIPTION

A. Prerequisites/Corequisites

Admission to the Elementary Education program

B. University Catalog Course Descriptions

Develops skills and abilities in science teaching methods, applications of technology, safety practices, and creation of integrated science curricula. Examines science teaching based on contemporary theory, practice, and standards. Prerequisite(s): Admission to elementary education licensure program.

Notes: Requires field experience in public schools.

C. Expanded Course Description

Science and health are everywhere around us. Turning on our lights at night, baking a cake, throwing a basketball while expecting someone to catch it, and taking care of our bodies are just a few examples of how we use concepts in science and health on a daily basis. Research on student learning and motivation shows that effective teaching is *grounded in students' prior experiences* and provides ample opportunities for students to *explore* more of their natural world in a *social* context. Through these opportunities, students gain new conceptual knowledge and skills while increasing their overall interest in the science/health disciplines. In this course you will be exposed to a variety of content, curricula, and methods designed to shape your future teaching practices so that your future students will be motivated learners in your classroom.

Further research on the effects of increased conceptual knowledge and skills shows that education is a tool of empowerment. The aim of this course is to provide you with numerous experiences in science/health teaching to empower you as you strive to become an effective elementary classroom teacher. As you utilize experiences gained in this course while continuing in your life-long learning and development of your teaching practices, you will become more and more capable of providing experiences in your classroom that, in turn, will empower your own students to make informed decisions, seek new opportunities, and continue in their progress as life-long learners.

LEARNER OUTCOMES

This course will enable students to:

- A. Further develop your content knowledge base in science and health through a hands-on, inquiry-based approach that includes investigative problem-solving
- B. Develop a series of interdisciplinary lesson plans utilizing a variety of science and health education materials and technology resources
- C. Predict safety issues when preparing for a hands-on classroom experience
- D. Collect a variety of materials for future use in your classroom via the course, field site, and community resources
- E. Examine science and health curricula and methods with respect to “Science for All” and standards documents at local, state, and national levels
- F. Develop an annotated bibliography of resources aligned with Virginia’s Science and Health Standards of Learning
- G. Develop an assessment tool for use in the science and health classroom

PROFESSIONAL STANDARDS

INTASC (2011):

#1. Learner Development. The teacher understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.

#2. Learning Differences. The teacher uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.

#3. Learning Environments. The teacher works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self motivation.

#4. Content Knowledge. The teacher understands the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make the discipline accessible and meaningful for learners to assure mastery of the content.

#5. Application of Content. The teacher understands how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.

#6. Assessment. The teacher understands and uses multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher’s and learner’s decision making.

#7. Planning for Instruction. The teacher plans instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.

#8. Instructional Strategies. The teacher understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.

#9. Professional Learning and Ethical Practice. The teacher engages in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.

#10. Leadership and Collaboration. The teacher seeks appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

ACEI:

2.2 Science— Candidates know and understand fundamental concepts of physical, life, and earth/space sciences as delineated in the National Science Education Standards. Candidates can design and implement age-appropriate inquiry lessons to teach science, to build student understanding of personal and social applications, and to convey the nature of science. (INTASC #1 Subject Matter Knowledge)

2.6 Health education— Candidates know, understand, and use the major concepts in the subject matter of health education to create opportunities for student development and practice of skills that contribute to good health. (INTASC #1 Subject Matter Knowledge)

3.1 Integrating and applying knowledge for instruction— Candidates plan and implement instruction based on knowledge of students, learning theory, connection across the curriculum, curricular goals, and community. (INTASC #7 Planning)

3.4 Active engagement in learning— Candidates use their knowledge and understanding of individual and group motivation and behavior among students at the K-6 level to foster active engagement in learning, self- motivation, and positive social interaction and to create supportive learning environments. (INTASC #5 Management)

3.5 Communication to foster learning— Candidates use their knowledge and understanding of effective verbal, nonverbal, and media communication techniques to foster activity inquiry, collaboration, and supportive interaction in the elementary classroom. (INTASC #6 Communication)

5.2 Professional growth, reflection, and evaluation—Candidates are aware of and reflect on their practice in light of research on teaching, professional ethics, and resources available for professional learning; they continually evaluate the effects of their professional decisions and actions on students, families, and other professionals in the learning community and actively seek out opportunities to grow professionally. (INTASC #9 Reflection)

VA Health Education Standards of Learning:

Goal 1: Knowledge and Skills: Act with skill and reason to demonstrate an understanding of the concepts and behaviors that reduce health risks and enhance the health of self and others.

Goal 2: Information Access and Use: Demonstrate the ability to access, evaluate, and use health information, products and services that influence health and well-being in a positive manner.

Goal 3: Community Health and Wellness: Demonstrate the use of appropriate health practices and behaviors to promote a safe and healthy community when alone, with family, at school, and in other group settings.

Technology (ISTE NETS):

I. Teachers use their knowledge of subject matter, teaching and learning, and technology to facilitate experiences that advance student learning, creativity, and innovation in both face-to-face and virtual environments.

II. Teachers design, develop, and evaluate authentic learning experiences and assessments incorporating contemporary tools and resources to maximize content learning in context and to develop the knowledge, skills, and attitudes identified in the NETS•S.

III. Teachers exhibit knowledge, skills, and work processes representative of an innovative professional in a global and digital society.

IV. Teachers understand local and global societal issues and responsibilities in an evolving digital culture and exhibit legal and ethical behavior in their professional practices.

V. Teachers continuously improve their professional practice, model lifelong learning, and exhibit leadership in their school and professional community by promoting and demonstrating the effective use of digital tools and resources.

Student Outcomes Referenced to Selected National Standards

Learning Outcomes	INTASC Standards	ACEI	VA Health	ISTE NETS
A	4	2.2, 2.6	1, 2, 3	I, II, III, IV, V
B	1, 2, 3, 4, 5, 6, 7, 8, 9	2.2, 2.6, 3.1, 3.4, 3.5, 5.2	1, 2, 3	I, II, III, IV, V
C	1, 2, 8, 9	2.2, 2.6, 3.5, 5.2	1, 2, 3	I, II, III, IV, V
D	5, 7, 10	2.2, 2.6, 3.1	1, 2, 3	I, II, III, IV, V
E	1, 2, 5, 7, 9, 10	2.2, 2.6, 3.1, 5.2	1, 2, 3	I, II, III, IV, V
F	1, 2, 3, 4, 5, 7, 9, 10	2.2, 2.6, 3.1, 3.4, 5.2	1, 2, 3	I, II, III, IV, V
G	4, 6, 7, 9	2.2, 2.6, 3.1	1, 2, 3	I, II, III, IV, V

Key: ISTE NETS = International Society for Technology in Education National Education Technology Standards 2010; INTASC = Interstate New Teacher Assessment and Support Consortium 2011; ACEI = Association for Childhood Education International; VA Health = Virginia Health Education Standards

REQUIRED TEXTS & READINGS

Achieve, Inc. (2013). *Next generation science standards*. Available online:
<http://www.nextgenscience.org/print/121>

Board of Education, Commonwealth of Virginia. (2010). *Standards of learning for Virginia Public Schools: Science* Available online:

1. Inquiry-Based Unit Project

40%

Utilizing problem-based learning, develop the detailed lesson plans for an integrated unit (at least five lessons) that includes the content areas of science, health, and one additional content area. Use the lesson plan format located in your program manual. You will also need to develop the student sheets and any other supporting materials needed for each of your lesson plans. Do not use student sheets “as is” because you will need to tailor these to fit the particular theme of your unit. Additionally, you will complete either a NEW webpage or PowerPoint presentation to be used during the unit and a culminating assessment of student learning for your unit.

During EDCI 553, you will teach 5 minutes of a lesson plan from your unit (the hands-on science/health portion of the lesson) and will be evaluated by the course instructor using the “Summary Observation Report.” The lesson that you select to teach must use hands-on science/health materials.

As your *Performance-Based Assessment* for EDCI 553, the following chart can be used to track your mastery of competencies as documented by your work on this assignment:

Standard	Rubric Item
INTASC 1. Learner Development	Not Applicable
INTASC 2. Learning Differences	Not Applicable
INTASC 3. Learning Environments (ACEI 3.4)	H, K, S, T
INTASC 4. Content Knowledge (ACEI 2.2, 2.6)	I1, I2, J1, J2, L1, L2, M
INTASC 5. Application of Content	I1, I2
INTASC 6. Assessment	Not Applicable
INTASC 7. Planning for Instruction (ACEI 3.1)	A, B, C, D, E, F
INTASC 8. Instructional Strategies (ACEI 3.5)	N, O, P, R
INTASC 9. Professional Learning and Ethical Practice (ACEI 5.2)	G, Q, U
INTASC 10. Leadership and Collaboration	Not Applicable

2. Investigation Project 25%

To complement your observation of science instruction in elementary school, you will participate in our in-class investigation experiences and submit an experiment report based on the experience. Additionally, for one grade level you observe, answer the following questions:

- Ask three teachers at your field placement to find out their opinion of "what science is" in general and at their school. From these data, analyze your responses and compare and contrast their opinion with their own using an infographic.
- What are the investigative skills that students are to learn during your selected grade level according to the grade level's science SOLs?
- How are each of these particular skills used during the design, performance, and/or reporting of a controlled experiment?
- According to local curriculum information you are able to find online or through other resources for that grade level, describe the opportunities students have to learn and practice these skills during the school year.
- To what extent did you observe children learning and practicing these skills? A. Describe what you saw OR B. Describe opportunities in which the instruction you observed could be modified to enhance students' learning of investigative skills described in the grade level's SOLs or local curriculum guide.
- Based on your response to the fourth bullet, A. What were the safety hazards involved and how did you see the teacher prevent them? OR B. What would be the safety hazards involved and how could you prevent them?
- For the science investigation in EDCI 553 that you wrote an experiment report on, what are the safety hazards involved and what could you do to prevent them?

Detailed project descriptions and rubric expectations (including length of essays) can be found on the class website.

3. Science/Health Journal 20%

Complete a journal documenting your participation during EDCI 553 class in eight inquiry-based activities and two visits you make to science/health-related community resource sites (total of 10 entries). For all activities and community visits, identify one standard from the K-6 science/health Virginia SOLs and its corresponding performance expectation from the *Next Generation Science Standards* that could serve as the science/health content focus of the activity/visit. For each activity and visit, illustrate your **knowledge and understanding** of the content of this science/health standard through a mode of your choice (examples include: bulleted

list, poetry, concept map, sheet you design for students with answer key, skit for students to enact, story for students to read, brochure for students, etc.). For all activities/resources, identify and explain how the activity/resource relates to an aspect of the nature of science as identified by VMSC/NGSS and how you could make this aspect of the nature of science explicit to elementary children via this activity/visit. **Upon conclusion of this assignment, your ten entries should include all eight of these areas: physics, chemistry, biology, health, meteorology, geology, oceanography, and space sciences.** Detailed project descriptions and rubric expectations (including length of journal entries) can be found on the class website.

4. Annotated Bibliography Project

15%

Select **one** science or health SOL for a particular grade level. For the SOL you selected, find **one** example of a developmentally-appropriate book to use during the teaching of that particular topic/theme. For the book you select, you will need to provide the following information:

- a. Topic and SOL:
- b. APA citation:
- c. Summary of the book:
- d. Summary of the science/health concepts addressed via the book including your assessment of its accuracy using a reputable science/health content resource text (cite your resource):
- e. Your ideas about HOW the book can be used in the classroom to teach the science/health concepts:
- f. One example of an anticipated naïve idea or misconception of students regarding these science/health concepts that the book might propagate:
- g. Your strategy for how to prevent this:
- h. Your description of how the content of the book relates to a cross-cutting concept in science (see NGSS):
- i. Your description of how the content of the book relates to the nature of science (see VMSC/NGSS):

Detailed project descriptions and rubric expectations (including length of essays) can be found on the class website.

Special Note for All Projects:

Descriptions of expectations for each project can be found on the class website - <https://sites.google.com/site/edci553fall2014petersburton/>. Project work will be evaluated according to rubric expectations. All products must be submitted in word-processed format electronically by email with the exception of the Inquiry-Based Unit Project that is submitted on TaskStream. With the exception of the Inquiry-Based Unit Project, projects may be resubmitted based on instructor feedback and resubmitted once for re-scoring. Correct grammar and mechanics are expected of graduate students; work submitted with numerous errors may be returned to the student for editing before grading. APA style is required. All work must be submitted on the date due by 11:59PM unless prior arrangements are made with the instructor due to a documented excused reason (illness, illness in family, etc.). Work that is submitted late without consulting the instructor or due to unexcused reason will have 10 percent subtracted per day.

The following grade scale is used to assign course grades:

A = 94% - 100%

A- = 90-93%

B+ = 85-89%

B = 80-84% (no B- grades)

C = 70-79% – does not meet licensure requirements

F = Does not meet requirements of the Graduate School of Education

TASKSTREAM REQUIREMENTS

Every student registered for any Elementary Education course with a required performance-based assessment is required to submit this assessment (*Inquiry-Based Unit Project*) to TaskStream (regardless of whether a course is an elective, a onetime course or part of an undergraduate minor). Evaluation of the performance-based assessment by the course instructor will also be completed in TaskStream. Failure to submit the assessment to TaskStream will result in the course instructor reporting the course grade as Incomplete (IN). Unless the IN grade is changed upon completion of the required TaskStream submission, the IN will convert to an F nine weeks into the following semester.

GMU POLICIES AND RESOURCES FOR STUDENTS

- a. Students must adhere to the guidelines of the George Mason University Honor Code [See <http://oai.gmu.edu/the-mason-honor-code/>].
- b. Students must follow the university policy for Responsible Use of Computing [see <http://universitypolicy.gmu.edu/policies/responsible-use-of-computing/>].
- c. Students are responsible for the content of university communications sent to their George Mason University email account and are required to activate their account and check it regularly. All communication from the university, college, school, and program will be sent to students solely through their Mason email account.
- d. The George Mason University Counseling and Psychological Services (CAPS) staff consists of professional counseling and clinical psychologists, social workers, and counselors who offer a wide range of services (e.g., individual and group counseling, workshops and outreach programs) to enhance students' personal experience and academic performance [See <http://caps.gmu.edu/>].
- e. Students with disabilities who seek accommodations in a course must be registered with the George Mason University Office of Disability Services (ODS) and inform their instructor, in writing, at the beginning of the semester [See <http://ods.gmu.edu/>].
- f. Students must follow the university policy stating that all sound emitting devices shall be turned off during class unless otherwise authorized by the instructor.
- g. The George Mason University Writing Center staff provides a variety of resources and services (e.g., tutoring, workshops, writing guides, handbooks) intended to support students as they work to construct and share knowledge through writing [See <http://writingcenter.gmu.edu/>].

PROFESSIONAL DISPOSITIONS

Students are expected to exhibit professional behaviors and dispositions at all times.

CORE VALUES COMMITMENT

The College of Education & Human Development is committed to collaboration, ethical leadership, innovation, research-based practice, and social justice. Students are expected to adhere to these principles. <http://cehd.gmu.edu/values/>

For additional information on the College of Education and Human Development, Graduate School of Education, please visit our website <http://gse.gmu.edu/>.

**PROPOSED FALL 2014 CLASS SCHEDULE
DOCUMENTATION OF FIELD EXPERIENCE REQUIRED**

Session	Topic/Learning Experiences	Readings & Assignments
FALL	Mondays, 4:30 PM – 7:10 PM	
Monday, Aug 25	<ul style="list-style-type: none"> • What is Science? • Standards for teaching elementary science • How might we best teach science to young children? • Course requirements and syllabus 	<p>--Review the syllabus and class website</p> <p>--Bring any preliminary questions you may have</p>
Monday, Sept 1	Labor Day – no class	Labor Day – no class
Monday, Sept 8	<ul style="list-style-type: none"> • Safety considerations for the classroom • Writing learning objectives • Conducting a controlled experiment <ul style="list-style-type: none"> ○ (part of the Investigation Project) • Share findings from group experiments 	<p>--Chapter 1 (Framing Science and Science Education) Be familiar with NGSS and SOLs</p> <p>--Chapter 6 (Planning and Managing Inquiry Instruction)</p>

Monday, Dec 15	Individual Progress Meetings and/or Make-Up Date	<i>--Unit Project due by 7:10pm via TaskStream</i>

PBA - EDCI 553: Unit Assignment and Micro-Teaching – Fairfax, TFA, Intensives

Overview:

Utilizing problem-based learning, develop the detailed lesson plans for an integrated unit (at least five lessons) that includes the content areas of science, health, and one additional content area. Use the lesson plan format located in your program manual. You will also need to develop the student sheets and any other supporting materials needed for each of your lesson plans. Do not use student sheets “as is” because you will need to tailor these to fit the particular theme of your unit. Additionally, you will complete either a NEW webpage or PowerPoint presentation to be used during the unit and a culminating assessment of student learning for your unit.

During EDCI 553, you will teach 15 minutes of a lesson plan from your unit (the hands-on portion of the lesson) and will be evaluated by the course instructor using the “Summary Observation Report.” The lesson that you select to teach must use hands-on materials.

Activities:

After you have worked with the course instructor to establish a unit theme (integrates one grade level’s SOL in science, health, and one other content area), perform the following tasks:

- Utilizing problem-based learning, develop lesson plans (at least five) for your unit based on your integrated unit’s theme. Use the lesson plan format and project rubric to guide you. Develop/modify student sheets needed for each lesson plan. Be sure that your student sheets are customized for the actual lesson plan for which they will be used and are modified to fit the theme.
- Develop a NEW web page or PowerPoint presentation for use during the unit. If designing a web page, include at least 3 links. If designing a PowerPoint presentation, include at least two slides. Submit your work electronically via email to your course instructor.
- Develop a culminating assessment of student learning for your unit and develop a rubric that can be used to score student performance on the culminating assessment. Consider using <http://rubistar.4teachers.org> to help you. The rubric needs to contain **descriptions** of student performance of various items at varying levels of competence.
- Select a hands-on activity from your unit that you would like to teach during EDCI 553. This hands-on activity should teach a concept defined in one grade level of the Virginia Standards of Learning in Science/Health.
- Bring enough copies of the student sheet that accompanies your activity to distribute in class when you teach your activity.
- Teach 15 minutes of your hands-on activity during EDCI 553 class time. At this time, share a photocopy of your student sheet with your fellow classmates. Your instructor will complete a “Summary Observation Report” based on your teaching.
- After you have taught the fifteen-minute activity during EDCI 553 class time, lead a brief discussion on what it was like to teach this activity.
- **Formal Reflection:** Reflect on the experience of teaching the hands-on science/health activity during EDCI 553 (and at your school, if applicable). Include in your reflection:
 - what worked well;
 - what did not work well;
 - ideas for how the activity, teaching strategies, or student sheet could be improved to better support student learning of concepts via inquiry
 - reflect on how your preparation level to teach hands-on science/health has changed over the semester.

Support your reflections by specific references to what occurred during the teaching of your hands-on activity during EDCI 553 (and at your school, if applicable). Use the project rubric to guide you. (Minimum length: one double-spaced page)

- Submit REVISED/ FINAL VERSION of lesson plans, student sheets, webpage/PowerPoint, overall assessment with rubric for your unit (noting the lesson that was taught during EDCI 553), and formal reflection.

NOTE: Please post this assignment in Taskstream.

Checklist for when you lead a class discussion on what it was like to teach the science/health activity:

___ discuss at least two successes

___ discuss at least two areas that need improvement

___ reflect on students' learning of science/health content via the curriculum strategy you selected

___ reflect on students' learning of science/health skills via the curriculum strategy you selected

ASSESSMENT RUBRICS:

Rubric for EDCI 553's PBA: Unit Project (You must earn at least 2 for all items or you will be required to resubmit!)

For each lesson plan:

	Exceeds Expectations – 3	Meets Expectations – 2 (Grade = A)	Does Not Meet Expectations – 1	Does Not Meet Expectations – 0
A. Lesson Format INTASC content ACEI INTGRT & APPLY KNOWLDGE FOR INSTRCTN #3.1	Utilizes an innovative arrangement of components to make the plan more usable; easy to follow and use; has all required components; self-explanatory	Easy to follow and use; has all required components; self-explanatory	Difficult to use; does not have complete components; OR is not self-explanatory	No consistent format
B. Objectives INTASC Planning; ACEI INTGRT & APPLY KNOWLDGE FOR INSTRCTN #3.1	All are student-oriented objectives and stated in observable student learning outcomes; spans all levels of Bloom's taxonomy; just the perfect amount of objectives; all are appropriate for the lesson	All are student-oriented objectives and stated in observable student learning outcomes; covers some levels of Bloom's taxonomy; has a couple of extra objectives or too few objectives; a few seem somewhat inappropriate for lesson	A mix of student- and teacher-oriented objectives or not stated in terms of observable student learning outcomes; has only minimal levels of Bloom's taxonomy; has way too little or many objectives; OR several seem inappropriate for lesson	Missing
C. Standards INTASC Planning ACEI INTGRT & APPLY KNOWLDGE FOR INSTRCTN #3.1	Lesson addresses all standards that are listed; no standards are missing; incorporates standard into real-life examples; utilizes standards in science, health, and one more content area; utilizes national, state, and local standards	Lesson only addresses some standards that it purports to address and/or some standards are missing; utilizes standards in science, health, and one more content area; utilizes national and state standards	Lesson fails to adequately address standards listed and several of the standards are missing; lesson fails to address standards in science, health or one more content area; OR fails to utilize national or state standards	Missing
D. Materials for Learning Activities INTASC Planning ACEI INTGRT & APPLY KNOWLDGE FOR INSTRCTN #3.1	List of materials is complete for both teacher and students; includes technology materials	List of materials is complete for both teacher and students <i>[Target: Five or less materials for teacher, five materials or less for students]</i>	List of materials is incomplete for teachers AND/ OR students	Missing

<p>E. Procedures for Learning Activities</p> <p>INTASC Planning; ACEI INTGRT & APPLY KNOWLDGE FOR INSTRCTN #3.1</p>	<p>Orderly with steps numbered; easy to understand; steps are detailed enough so that someone else could run the lesson; fits with lesson; includes introduction, instructional strategies, and summary as described in the PDS manual; steps are aligned with the 5-E's or other approved inquiry-based learning cycle model to create an inquiry-based learning experience for students throughout the entire time allotted in the procedure; provides some information regarding connections/extensions to other lessons</p>	<p>Somewhat orderly with steps numbered; contains a section that is slightly difficult to understand; needs more details for someone else to lead instruction; not exactly appropriate for lesson; includes introduction, instructional strategies, and summary as described in the PDS manual; steps are aligned with the 5-E's or other approved inquiry-based learning cycle model with few steps incorrectly identified so that an inquiry-based learning experience is created for students 50% of the time allotted in the procedure</p>	<p>Not orderly; hard to follow; has too little detail; not appropriate for lesson; OR steps are aligned with the 5-E's or other approved inquiry-based learning cycle model but they are incorrectly identified/ordered so that the lesson fails to provide an inquiry-based learning experience for students during the time allotted in the procedure</p>	<p>Missing</p>
<p>F. Time Designations</p> <p>INTASC Planning ACEI INTGRT & APPLY KNOWLDGE FOR INSTRCTN #3.1</p> <p><i>[20-40 minutes each, longer is fine, each lesson should have a definite open and close even if activities continue to the next lesson]</i></p>	<p>Time designations are provided for each phase of the experience (introduction, instruction, summary); time designations are appropriate; extra activities are defined in case of extra time; notes activities that could be left out if less time</p>	<p>Time designations are provided for each phase of the experience (introduction, instruction, summary); time designations are off; uses time appropriately</p>	<p>Time designations are not provided for each phase of the experience (introduction, instruction, summary) OR time designations are really off</p>	<p>Missing</p>
<p>G. Assessment</p> <p>INTASC Reflection ACEI PRSNL GRWTH, REFL., & EVALTN # 5.1</p>	<p>Assessment clearly linked to objectives with procedures and criteria described for each objective; copies of written assessments are attached; interesting assessment that is innovative</p>	<p>Assessment clearly linked to objectives with procedures and criteria described for each objective; copies of written assessments are attached</p>	<p>Assessment is not linked to objectives; fails to define procedures and criteria for each objective; OR copies of written assessments are not attached</p>	<p>Missing</p>

H. Differentiation INTASC Learning Environments ACEI ACTV ENGMT IN LRNG #3.4	Lists adaptations that will be made for more than 2 different types of individual learners; based on assessment data;	Lists adaptations that will be made for 2 different types of individual learners; based on assessment data	Does not list adaptations that will be made for individual learners OR is not based on assessment data	Missing
I. Predicted Level of Student Interest (I) INTASC Content ACEI SCIENCE #2.2	Fun-filled; student learning experience; relates science to real life, personal needs, and interests; supports critical thinking, creativity and collaborative problem solving related to authentic local and global issues	Somewhat fun-filled; student learning experience; relates science to real life, personal needs, and interests; supports critical thinking, creativity and collaborative problem solving related to authentic local OR global issues	Somewhat fun-filled; limited student learning experience; OR does not relate science to real life, personal needs and interests; OR does not support critical thinking, creativity and collaborative problem solving related to authentic local or global issues	Missing
I. Predicted Level of Student Interest (II) INTASC Content ACEI HEALTH #2.6	Fun-filled; student learning experience; relates health to real life, personal needs, and interests; supports critical thinking, creativity and collaborative problem solving related to authentic local and global issues	Somewhat fun-filled; student learning experience; relates health to real life, personal needs, and interests; supports critical thinking, creativity and collaborative problem solving related to authentic local OR global issues	Somewhat fun-filled; limited student learning experience; OR does not relate health to real life, personal needs and interests; OR does not support critical thinking, creativity and collaborative problem solving related to authentic local or global issues	Missing
J. Appropriateness of Activities with Respect to Objectives (Science) INTASC Content ACEI SCIENCE #2.2	Appropriate to science objectives; can accomplish activity; answers and accomplishes objectives; and elegantly integrates science, health and one other content area	Appropriate to science objectives; can accomplish activity; answers and accomplishes objectives	Not appropriate to science objectives; can't accomplish activity; OR doesn't answer or accomplish objectives	Missing
J. Appropriateness of Activities with Respect to Objectives (Health) INTASC Content #1; ACEI HEALTH #2.6	Appropriate to health objectives; can accomplish activity; answers and accomplishes objectives; and elegantly integrates science, health and one other content area	Appropriate to health objectives; can accomplish activity; answers and accomplishes objectives	Not appropriate to health objectives; can't accomplish activity; OR doesn't answer or accomplish objectives	Missing

<p>K. Safety and Ethical Treatment of Living Organisms</p> <p>INTASC Learning Environments ACEI ACTV ENGMT IN LRNG #3.4</p>	<p>Safety risks identified that include management of materials and <i>activities</i> [Target: at least one per lesson plan]; prevention strategies identified <i>activities</i> [Target: at least one per lesson plan]; resolution strategies identified in case mishap should occur <i>activities</i> [Target: at least one per lesson plan]; lesson involves use of living organisms (if any) in an ethical manner; and actively teaches ethical treatment of animals within the lesson</p>	<p>Safety risks identified that include management of materials and <i>activities</i> [Target: at least one per lesson plan]; prevention strategies identified <i>activities</i> [Target: at least one per lesson plan]; resolution strategies identified in case mishap should occur <i>activities</i> [Target: at least one per lesson plan]; lesson involves use of living organisms (if any) in an ethical manner</p>	<p>Fails to identify safety risks including management of materials and activities; fails to identify prevention strategies; fails to identify resolution strategies; OR lesson details a procedure involving unethical use of living organisms</p>	<p>Missing</p>
<p>L1. Science Content in Earth science, space science, life science, physical science, and health</p> <p>INTASC Content ACEI SCIENCE #2.2</p>	<p>Content utilized in lesson plan is accurate, complete (as defined by SOLs, local, and national standards); incorporates all four science disciplines; and multiple connections are made between science areas via cross-cutting concepts (as defined by NGSS)</p>	<p>Content utilized in lesson plans includes at least three of the four following sciences: Earth and space science, life science, and physical science; content utilized in lesson plans for at least 3 of the four sciences is accurate and complete (as defined by SOLs, local and national standards)</p>	<p>Content utilized in lesson plan does not include at least three of the four following sciences: Earth science, space science, life science, and physical science; OR content utilized in lesson plan for at least three of the four sciences is not accurate or is not complete (as defined by SOLs, local, and national standards)</p>	<p>Missing</p>
<p>L2. Health Content</p> <p>INTASC Content ACEI HEALTH #2.6</p>	<p>Content utilized in lesson plan is accurate, complete (as defined by SOLs, local, and national standards); incorporates the health discipline to create opportunities for student development and practice of skills that contribute to good health; and multiple connections are made between health and science via cross-cutting concepts (as defined by NGSS)</p>	<p>Content utilized in lesson incorporates the health discipline to create opportunities for student development and practice of skills that contribute to good health; health content is accurate</p>	<p>Does not address health content to create opportunities for student development and practice of skills that contribute to good health OR health content utilized is not accurate</p>	<p>Missing</p>

<p>M. Nature of Science</p> <p>INTASC Content #4; ACEI SCIENCE #2.2</p>	<p>Lesson supports students' learning of science consistent with the nature of science, promotes students' understanding of the nature of science with explicit instruction and students' use of language from NGSS/VMSC and SOLs to describe the characteristics of nature of science</p>	<p>Lesson supports students' learning of science consistent with the nature of science and promotes students' understanding of the nature of science at some point during the lesson with attention to characteristics of nature of science as identified by NGSS/VMSC and SOLs</p>	<p>Lesson fails to support student learning of science consistent with the nature of science as identified by NGSS/VMSC and SOLs</p>	<p>Missing</p>
<p>N. Student sheet developed or adapted by the candidate</p> <p>INTASC Instructional Strategies ACEI COMMUNICATION TO FOSTER COLLABORATION #3.5</p>	<p>Adapted or developed by candidate; supports inquiry-based approach (5-Es or other inquiry-based cycle); supports the use of hands-on science/health materials; vocabulary matches particular SOL/POS objective; format used is student-friendly and teacher-friendly; sheet documents student learning related to the SOL/POS topic</p>	<p>Adapted or developed by candidate; supports inquiry-based learning (5-Es or other inquiry-based cycle); supports the use of hands-on science/health materials; vocabulary matches particular SOL/POS objective; format used is student-friendly and somewhat teacher-friendly; sheet documents student learning related to the SOL/POS topic</p>	<p>Student sheet is not suitable for a particular class/group of students that the candidate is teaching this semester OR does not fit the particular lesson plan</p>	<p>Missing</p>
<p>O. Resources</p> <p>INTASC Instructional Strategies ACEI COMMUNICATION TO FOSTER COLLABORATION #3.5 <i>[Reference source on student and sheet and in lesson plan; you can use the same resource in more than one lesson plan as much as you need to]</i></p>	<p>Sources of lesson plan ideas clearly identified so that someone else could locate the sources; more than two sources used to write each lesson plan or develop student materials; uses more than one non-paper resource (electronic media, audiovisual, etc) per lesson plan</p>	<p>Sources of lesson plan ideas clearly identified so that someone else could locate the source; at least two sources used to write each lesson plan and develop student materials; uses at least one non-paper resource (electronic media, audiovisual, etc.) per lesson plan</p>	<p>Source of lesson plan ideas not clearly identified so that someone else could locate the source OR fails to use at least two sources to write each lesson plan and develop student materials OR does not use at least one non-paper resource per lesson plan</p>	<p>Missing</p>

For entire assignment:

	Exceeds Expectations – 3	Meets Expectations – 2	Does Not Meet Expectations – 1	Does Not Meet Expectations – 0
<p>P. Web page / PowerPoint Presentation</p> <p>INTASC Instructional Strategies ACEI COMMUNICATION TO FOSTER COLLABORATION #3.5</p>	Includes at least 3 links if a web page; includes at least two slides if a PowerPoint presentation; is included in the procedure for at least one lesson plan and clearly relates to the content and activities of that lesson plan; is supportive of student learning; and uses technological features to enhance learning via improved communication of ideas	Includes at least 3 links if a web page; includes at least two slides if a PowerPoint presentation; is included in the procedure for at least one lesson plan and clearly relates to the content and activities of that lesson plan; is supportive of student learning	Does not include at least 3 links if a web page; does not include at least two slides if a PowerPoint presentation; is not included in the procedure for at least one lesson plan; does not clearly relate to the content and activities of at least one lesson plan; OR is not supportive of student learning	Missing
<p>Q. Overall Unit Assessment of Student Learning</p> <p>INTASC Prof Lrng & Ethical Practice ACEI PRSNL GRWTH, REFL., & EVALTN # 5.1</p>	Is aligned with unit theme, guiding questions, unit objectives, and national and SOL/POS standards; is appropriate with the procedures outlined in the set of lesson plans; allows for documentation of student learning of unit objectives; and includes student outcomes data	Is aligned with unit theme, guiding questions, unit objectives, and national and SOL/POS standards; is appropriate with the procedures outlined in the set of lesson plans; allows for documentation of student learning of unit objectives	Is not aligned with unit theme, guiding questions, and national and SOL/POS standards OR is not appropriate with respect to the procedures outlined in the set of lesson plans OR does not allow for documentation of student learning of unit objectives	Missing

For hands-on teaching assignment (referred to as “Micro-Teaching”):

	Exceeds Expectations – 3	Meets Expectations – 2	Does Not Meet Expectations – 1	Does Not Meet Expectations – 0
<p>R. Documentation</p> <p>INTASC Instructional Strategies ACEI COMMUNICATION TO FOSTER COLLABORATION #3.5</p>		Includes Summary Observation Report from Clinical Faculty, Camp Director, or Loudoun Course Instructor; Summary Observation Report from EDCI instructor; student sheet used during teaching of the hands-on activity	Summary Observation Report from Clinical Faculty, Camp Director, or Loudoun Course Instructor; Summary Observation Report from EDCI instructor; OR student sheet used during teaching of the hands-on activity is missing	Missing
<p>S. Summary Observation Report from Inservice Teacher/Administrator, Camp Director, or EDCI Instructor</p> <p>INTASC Learning Environments ACEI ACTV ENGMT IN LRNG #3.4</p>	Statements indicative of going beyond expectations for performance in preparation and planning, instructional methods and management, assessment, and professionalism	Statements indicative of entirely satisfactory performance in preparation and planning, instructional methods and management, assessment, and professionalism	Statements indicative of less than satisfactory performance in preparation and planning, instructional methods and management, assessment, and/or professionalism	Missing
<p>T. Summary Observation Report from EDCI Instructor</p> <p>INTASC Learning Environments ACEI ACTV ENGMT IN LRNG #3.4</p>	Statements indicative of going beyond expectations for performance in preparation and planning, instructional methods and management, assessment, and professionalism	Statements indicative of entirely satisfactory performance in preparation and planning, instructional methods and management, assessment, and professionalism	Statements indicative of less than satisfactory performance in preparation and planning, instructional methods and management, assessment, and/or professionalism	Missing
<p>U. Formal Reflection (at least one double-spaced page in length)</p> <p>INTASC Reflection ACEI PRSNL GRWTH, REFL., & EVALTN # 5.1</p>	Formal reflection is clearly articulated; addresses all items fully; and makes many specific references to the experience of teaching the hands-on activity during EDCI 553 and at the teaching site (if applicable).	Formal reflection is mostly clear; addresses all items adequately; and makes a few specific references to the experience of teaching the hands-on activity during EDCI 553 and at the teaching site (if applicable).	Formal reflection is not clear; does not address all items adequately; OR does not make specific reference to the experience of teaching the hands-on activity during EDCI 553 and at the teaching site (if applicable).	Missing
