COURSE DESCRIPTION  
Examines the historical development of the Sport and Recreation Studies fields. Explores the interconnection between these phenomena in the context of the social, cultural and economic forces shaping American and global societies.

COURSE OBJECTIVES  
Students will be able to:
1. Understand how individuals move from being performers to professionals.
2. Demonstrate the qualities and competencies required to be a professional in sport and recreation.
3. Identify the characteristics of a profession, professionalism, professionalization, and deprofessionalization.
4. Explain the missions and subject matter of sport and recreation.
5. Demonstrate how knowledge is transported and communicated in sport and recreation.
6. Justify the importance of lifelong learning in sport and recreation.

COURSE OVERVIEW  
This course examines the profession of sport and recreation studies. The primary intent is to gain an understanding of the disciplinary nature of the profession, the missions, and subject matter of the profession, and the appropriate academic preparation as well as ethical responsibilities of those who have made the profession their career. Secondary readings, lectures, and discussions will be utilized to analyze such topics as the organization of knowledge in the profession, challenges faced by the profession in the 21st Century, and how knowledge is used in practice.

- You are expected to attend all class sections, actively participate in class discussions, complete in-class exercises and fulfill all assignments. Assignments must be turned in at the beginning of class on the specified date due or no credit will be given.

PROFESSIONAL ASSOCIATION PRINCIPLES
Courses offered in the Sport and Recreation Studies (SRST) graduate program are guided by the principles of the Commission of Sport Management Accreditation (COSMA). COSMA (2010, p. 1) “bases its accrediting process on principles, rather than standards.” The eight recommended principles are:

- outcomes assessment;
- strategic planning;
- curriculum;
- faculty;
- scholarly and professional activities;
- resources;
- internal and external relationships; and
- educational innovation.

Course Expectations:
- **Readings**: Students are expected to read the assigned material prior to the beginning of the class to which it is assigned. This is crucial for meaningful and informed discussions (which will be a very significant component of this course). Please bring assigned readings to class.
- **Discussions**: Students are expected to actively participate in class discussions. This requires that students come prepared to discuss the readings and issues or questions they raise in a respectful and intellectual manner.
- **Critiques**: Students are expected to provide the theme of the previous week's readings from scholarly academic journals. In addition, they are to provide detailed analysis of both the strengths and weaknesses of the readings and what implications they have for the profession. Critiques should be approximately one paper, double-spaced in length.
- **Philosophical Paper**: Students are expected to provide a personal, philosophic statement regarding their beliefs about their specific academic
discipline and the profession more generally. In providing their philosophical paper they should be sure to define profession, professionalism, professionalization, and deprofessionalization. The paper should also be based on all of the required readings and discussions (including presentations) in class. The philosophical paper should be six to eight pages in length using APA style.
