LEARNER OUTCOMES:
This introductory research course is designed to enable students to examine connections among theoretical frameworks, research questions, methods of data collection, analysis and reporting. The purpose of this course is to introduce students to an understanding of quantitative, qualitative, and mixed methods inquiry. This will involve reading about research. The student will be introduced to the basics of research design, including identifying a problem, conducting a brief literature search, describing data collection and analysis, writing, and ethics. A general intent of the course is to help learners to become better consumers of research, and to understand the ways education research relates to instructional practice and school improvement. Learners will begin to:

- gain critical perspectives in order to understand the validity of education research;
- use appropriate reference sources to locate publications relevant to a topic of their choice;
- understand measures of central tendency and dispersion and their application to important education outcomes;
• develop an informed perspective on issues in education that is grounded in contemporary research;
• understand how teachers or administrators can use research to enhance instruction and inform practice;
• use various social science perspectives as the foundation for advocacy and change;
• be able to apply technology to the task of conducting education research.

PROFESSIONAL STANDARDS:
In this course, the following educational psychology standards will be addressed:

Standard 3: Knowledge of Educational Research and Assessment. Candidates will demonstrate an understanding of the basic concepts, principles, techniques, approaches, and ethical issues involved in educational research.

Standard 4: Analysis, Critique, and Evaluation of Educational Research. Candidates will use their knowledge of quantitative and qualitative research methodology to critically read and evaluate quantitative and qualitative research articles.

Standard 6: Communication and Dissemination of Educational Research. Candidates will demonstrated critical thinking, oral presentation, technological, and writing skills as they are used in the profession. These include: a. Knowledge and use of APA style, b. Oral presentations, c. Poster presentations, d. Article abstracts, e. Research proposals, f. Literature reviews, and g. Technological skills.

COURSE ASSIGNMENTS

1. Two Homework Assignments (5 points each): Students will be asked to work individually on two homework assignments. Assignment 1 will be in preparation for a literature review and Assignment 2 will be on APA style. Details of each assignment are described on Blackboard.

2. Human Subjects Online Ethics Training (10 points): Students will be asked to complete Mandatory Training for Persons Conducting Research Using Human Subjects. Information is available online: http://research.gmu.edu/ORSP/HumanTraining.html
The training takes between two and five hours and can be accessed from: http://www.citiprogram.org

Copy and paste your completion certificate into a word document or save as a PDF, then upload a copy of the certificate file to Blackboard. Email me when you complete the training as well.

4. Critique of Two Empirical Research Articles (5 points each): Students will write a critique of one quantitative intervention study and one qualitative study obtained from a peer-reviewed journal. The critiques should include the following parts: purpose, methods, results, and critical comments as well as your reflections about the article (see Blackboard site for specific instructions).

5. Research Proposal (50 points): Students will write a proposal in APA style for a research project focusing on an educational topic of interest. Students should utilize a methodological approach that most appropriately addresses their research question(s). See pp. 41-59 of the APA manual for an example of an APA style paper. Place electronic versions in the relevant assignment box on the Blackboard site. The proposal should include:
   1. Literature review to orient the reader to your topic and theoretical framework.
   2. Statement of purpose and research questions, including a statement indicating research you are replicating or extending and relevant citations.
   3. Methods (5-6 pages)
      Participants and setting
      Materials
      Data sources (dependent variables); instrumentation (where relevant)
      Research design
      Procedures (proposed data collection process)
      Proposed preliminary data analyses (bonus section)
   4. References

6. Research Poster Session (10 points): Students’ research proposals will be presented in a poster session. Place a copy of the slides on Blackboard.

7. In Class Assignments, Participation, and Attendance Policy (10 points): Students will be asked to work individually or in groups of 2-3 students in class assignments throughout the semester (assignments are clearly described on Blackboard). Because of the importance of lecture and discussion to your total learning experience, I wish to encourage you to both attend and
participate in class regularly. Attendance, punctuality, preparation, and active contribution to small and large group efforts are essential. These elements of your behavior will reflect the professional attitude implied in the course goals and will account for 10% of your course grade. With reference to the grading scale described later in this syllabus, you will note that this percentage is equivalent to a full letter grade. Students who must miss a class must notify the instructor (preferably in advance) and are responsible for completing all assignments and readings for the next class.
