Education Leadership Program
Thompson Hall Suite 1300, Office 1306
4400 University Dr., MSN 4C2
Fairfax, VA 22030-4444

Office hours: Mondays and Wednesdays, by appointment

Schedule information:
Location. TC Williams High School, Room A225
Meeting times. Tuesdays, 4:30-7:30 p.m., 1/12/16-4/12/16

Course Description

EDLE 690 Using Research to Lead School Improvement (3:3:0)

Develops skills, insights, and understanding of how leaders use research to improve schools, with emphasis on the use of assessment and research data to identify school improvement needs and to design school improvement projects.

Prerequisite(s)

EDLE 620 or 743 (may be taken concurrently if application has been submitted to the MEd in Education Leadership program or the MEd in EDLE with a Concentration in Special Education Leadership program).

Nature of Course Delivery

Using Research to Lead School Improvement helps students to identify opportunities to improve student achievement and focus their efforts to change and restructure schools. Through workshops, discussions, case studies, and presentations, students will learn how to conduct library and field-based research, how to bridge theory and research to practice, and how to design school improvement projects based on sound theory and research.
Content

The two primary purposes of the course are to help students learn how to engage in action research and how to use published research to lead school improvement focused on instruction. All of the EDLE program goals are active, to a greater or lesser extent, in this course. Candidates will begin to:

1. develop the capacity to examine and summarize student performance data and use these data to identify school needs;
2. develop an informed perspective on issues in education administration that is grounded in contemporary research;
3. understand how principals can use research to enhance instructional leadership; and
4. understand how to apply technology to the task of reviewing, conducting, and/or presenting education research.

Teaching and Learning

Each class will include a variety of activities and exercises. Out-of-class work will rely in part on the use of Taskstream, on readings, and on the use of resource task sheets created to complement the primary text. Specific process goals for the class are as follows:

1. Classes will reflect a balance of activities that encourage the exploration of the use of research in instructional leadership. To promote an atmosphere that allows us to accomplish this, we will:
   a. start and end on time;
   b. maintain (flexibly) a written agenda reflecting objectives for each class;
   c. agree to disagree respectfully during class discussions;
   d. strive to be open to new ideas and perspectives; and
   e. listen actively to one another.

2. Student work will reflect what is expected from leaders. Hence, it is expected that students will:
   a. write papers that are well researched, proofread, submitted in a timely fashion, and conform to APA guidelines;
   b. participate actively in class discussions in a manner that challenges the best thinking of the class; and
   c. provide constructive feedback to others both on their ideas and on their written work, striving to learn from each other and to test each other’s ideas.

3. We will endeavor to create a classroom climate that approximates what we know about learning organizations. Consequently, it is important that we create a space that allows participants to try out new ideas and voice opinions without fear of ridicule or embarrassment. The hallmark of a learning organization is a balance between openness and constructive feedback; hence, everyone is expected to:
   a. come fully prepared to each class;
   b. demonstrate appropriate respect for one another;
c. voice concerns and opinions about class process openly;
d. engage in genuine inquiry;
e. recognize and celebrate each other’s ideas and accomplishments;
f. show an awareness of each other’s needs; and

g. maintain strict confidentiality regarding any information shared in the classroom.

Course Objectives

Students taking this course will:
1. understand and apply planning, assessment, and instructional leadership that builds collective professional capacity;
2. understand and apply systems and organization theory;
3. understand and apply management and leadership skills that achieve effective and efficient organizational operations;
4. understand and apply basic leadership theories and knowledge that impact schools.

Student Outcomes

Successful students will emerge from the course with the ability to:
1. gather and analyze student achievement and demographic data available from their school, school district, and the state;
2. search online databases for recent publications relevant to a specific topic, and prepare a brief summary of applied research on a topic relevant to the improvement of instruction at their school site;
3. use education research to develop a position based on more than one’s opinion;
4. understand basic statistics (e.g., measures of central tendency & dispersion; basic inferential statistics) and their application in educational research;
5. understand and be able to evaluate basic research designs, and apply a research design to the study of a problem related to instruction and/or improvement at their school site; and
6. prepare and defend a proposal for a School Improvement Project (SIP) that becomes the blueprint for the capstone project required in the EDLE program internship.

Relationship of Course to Internship

Although the internship is a separate course, the Education Leadership program has integrated internship-related activities into course work. During this course, students will prepare and present a proposal for a school improvement project that they will implement and evaluate as a part of their internship activities over the remainder of the program.

National Standards and Virginia Competencies

The following Education Leadership Constituent Council (ELCC) standard elements are addressed in this course:

**ELCC Standard 1.0.** Candidates who complete the program are educational leaders who have the knowledge and ability to promote the success of all students by facilitating the
development, articulation, implementation, and stewardship of a school or district vision of learning supported by the school community.

1.2 Articulate a Vision
1.3 Implement a Vision
1.4 Steward a Vision

**ELCC Standard 2.0.** Candidates who complete the program are educational leaders who have the knowledge and ability to promote the success of all students by promoting a positive school culture, providing an effective instructional program, applying best practice to student learning, and designing comprehensive professional growth plans for staff.

2.3 Apply Best Practice to Student Learning

**ELCC Standard 3.0.** Candidates who complete the program are educational leaders who have the knowledge and ability to promote the success of all students by managing the organization, operations, and resources in a way that promotes a safe, efficient, and effective learning environment.

3.1 Manage the Organization
3.2 Manage Operations
3.3 Manage Resources

**ELCC Standard 4.0.** Candidates who complete the program are educational leaders who have the knowledge and ability to promote the success of all students by collaborating with families and other community members, responding to diverse community interests and needs, and mobilizing community resources.

4.2 Respond to Community Interests and Needs

**ELCC Standard 6.0.** Candidates who complete the program are educational leaders who have the knowledge and ability to promote the success of all students by understanding, responding to, and influencing the larger political, social, economic, legal, and cultural context.

6.2. Act to influence local, district, state, and national decisions
6.3. Anticipate and assess emerging trends and initiatives

This course addresses the following Virginia Department of Education (VDOE) Competencies:

a. Knowledge understanding, and application of planning, assessment, and instructional leadership that builds collective professional capacity, including:
   (2) Collaborative leadership in gathering and analyzing data to identify needs to develop and implement a school improvement plan that results in increased student learning;
   (7) Identification, analysis, and resolution of problems using effective problem-solving techniques; and
   (8) Communication of a clear vision of excellence, linked to mission and core beliefs that promotes continuous improvement consistent with the goals of the school division.

b. Knowledge, understanding and application of systems and organizations, including:
   (1) Systems theory and the change process of systems, organizations and individuals, using appropriate and effective adult learning models;
(2) Aligning organizational practice, division mission, and core beliefs for developing and implementing strategic plans;
(3) Information sources and processing, including data collection and data analysis strategies;
(4) Using data as a part of ongoing program evaluation to inform and lead change;
(5) Developing a change management strategy for improved student outcomes; and
(6) Developing empowerment strategies to create personalized learning environments for diverse schools.

c. Knowledge understanding and application of management and leadership skills that achieve effective and efficient organizational operations, including:
   (8) Application of data-driven decision making to initiate and continue improvement in school and classroom practices and student achievement.

f. Knowledge understanding and application of basic leadership theories and influences that impact schools including:
   (1) Concepts of leadership including systems theory, change theory, learning organizations and current leadership theory.

Course Materials

Required text.

Recommended text.

Additional resources. Additional resources will be listed in the Tentative Weekly Schedule and will be available on Blackboard.

Email. All students are required to activate and monitor their GMU e-mail accounts. If you are uncertain about how to do this, please see me. I strongly recommend that you do not forward your Mason e-mail to a different account because attachments are often lost that way. It is best to check e-mail directly from your Mason account daily.

Microsoft Office. It is my expectation that all students have access to Microsoft Office. We will be using Word and Excel for this course. If you do not have access to this software, you are required to obtain it within the first two weeks of the course. It is best to have the most recent (2010) version of the software.
Course Requirements, Performance-based Assessment, and Evaluation Criteria

**Attendance.** Students are expected to attend every class on time and to remain in class until it ends. If you are ill or have an emergency that prevents you from attending class, please call or e-mail me in advance. If you miss more than one class, you arrive late to multiple classes, and/or you leave class early multiple times, you will be subject to loss of participation points.

**General expectations.** Consistent with expectations of a master’s level course in the Education Leadership program, grading is based heavily on student performance on written assignments. The assignments constructed for this course reflect a mix of skills associated with the application of research to education leadership contexts. Overall, written work will be assessed using the following broad criteria:

1. Application of concepts embedded in assigned readings and other materials and reinforced in classroom activities
2. The quality of analysis, synthesis, and application
3. The degree to which writing is clear, concise, and organized.

**Specific performances and weights.** Additionally, a portion of the class grade will be based on participation and the contribution you make to class discussions. The overall weights of the various performances are as follows:

**Class participation - 10 points.** Students are expected to participate actively in class discussions, in group activities, and in serving as critical friends to other students. Arriving at class more than 30 minutes late or leaving more than 30 minutes before the end of class may result in loss of points.

**Written assignments - 90 points.** Several different types of performance-based assignments will be completed during the semester. Each assignment relates to the application of educational research in your school setting. A description of each assignment and a rubric for grading each assignment are included at the end of this syllabus.

The assignments are designed sequentially to help you define and plan the school improvement project *you will be conducting as your capstone project for the internship.* Thus, in the first assignment, you examine school performance data and define a research topic. In the second and third, you review the available research literature on that topic, and begin to define the specific improvement project you will implement. Finally, for the fourth assignment, you write your School Improvement Project Proposal—the improvement project that will be implemented during your internship. The School Improvement Project Proposal is the program-level Performance-Based Assessment (PBA) for this course.

**Submitting papers.** All papers must be submitted *on time, electronically via Blackboard.*

**Late work.** Students’ work is expected on time, meaning no later than by midnight of the due date.
Grading scale.

A+ = 100 percent
A  = 95 – 99
A- = 90 – 94
B+ = 86 – 89
B  = 83 – 85
B- = 80 – 82
C  = 75 – 79
F  = 74 or below

TK20 Performance-Based Assessment submission Requirement

Every student registered for an EDLE course with a required performance-based assessment is required to submit these assessments to TK20 through Blackboard. EDLE 690’s required performance is the School Improvement Project Proposal. Evaluation of the performance-based assessments by the course instructor will also be completed in TK20 through Blackboard. Failure to submit the assessment to Blackboard will result in the course instructor reporting the grade as Incomplete (IN). Unless the IN grade is changed upon completion of the Blackboard submission, the IN will convert to an F nine weeks into the following semester.

GMU Policies and Resources for Students

a. Students must adhere to the guidelines of the George Mason University Honor Code [See http://oai.gmu.edu/the-mason-honor-code/].
b. Students must follow the university policy for Responsible Use of Computing [See http://universitypolicy.gmu.edu/policies/responsible-use-of-computing/]
c. Students are responsible for the content of university communications sent to their George Mason University email account and are required to activate their account and check it regularly. All communication from the university, college, school, and program will be sent to students solely through their Mason email account.
d. The George Mason University Counseling and Psychological Services (CAPS) staff consists of professional counseling and clinical psychologists, social workers, and counselors who offer a wide range of services (e.g., individual and group counseling, workshops and outreach programs) to enhance students' personal experience and academic performance [See http://caps.gmu.edu/].
e. Students with disabilities who seek accommodations in a course must be registered with the George Mason University Office of Disability Services (ODS) and inform their instructor, in writing, at the beginning of the semester [See http://ods.gmu.edu/].
f. Students must follow the university policy stating that all sound emitting devices shall be turned off during class unless otherwise authorized by the instructor.
g. The George Mason University Writing Center staff provides a variety of resources and services (e.g., tutoring, workshops, writing guides, handbooks) intended to support students as they work to construct and share knowledge through writing [See http://writingcenter.gmu.edu/].
Professional Dispositions

Students are expected to exhibit professional behaviors and dispositions at all times.

Core Values Commitment

The College of Education & Human Development is committed to collaboration, ethical leadership, innovation, research-based practice, and social justice. Students are expected to adhere to these principles. http://cehd.gmu.edu/values/

For additional information on the College of Education and Human Development, Graduate School of Education, please visit our website [See http://gse.gmu.edu/]
Tentative Weekly Schedule  
EDLE 690.602 (Smith) Spring 2016 ACPS/APS2

To accommodate the learning needs of the class, the topic and reading schedule will be amended during the session. Revisions will be posted on Blackboard as the tentative weekly schedule is revised.

Writing Assignment 1: Improvement Target Proposal
20 points

Overview:

Data are tools – they represent a primary source of knowledge-building for school improvement. As leaders in your school, one of your primary tasks is to understand available data relating to your school’s performance in meeting its goals and objectives. Additionally, you need to learn how to communicate about these data to various stakeholder groups. In this task, you are asked to assemble some of these data, and prepare a short summary suitable for presentation to a school leadership team.

Tasks:

1. Identify the variety of published data relating to your school’s demographic characteristics (e.g., enrollment, attendance, composition of the student body, staffing); measures of student learning; and any perceptual data that might exist relating to such things as school climate. These data may be available on your school or school system’s website, on related websites (e.g., state education department), or in published material.
2. Determine your school’s primary performance objectives: What is the school expected to achieve? Dig deeper than routine accountability requirements; examine the school’s current improvement plan, for instance, to identify one or more current improvement priorities.
3. Examine relevant assessment data for at least a two-year period. To do this, you will need to triangulate the data available to you – look across various sources to answer the question: How well are we doing? As a leader in your school, you will add value to your analysis by using your craft knowledge to interpret what these data means. You may limit your focus to one or more areas identified as priorities for your school (in other words, you do not need to present data on each and every curricular objective, but you should provide a reasonable synopsis of “how well we’re doing.”)
4. Identify any areas that reflect priorities – for instance, areas in which students are achieving at a level below your school’s goals and objectives. Be careful to identify performance indicators that clearly relate to the objective(s) you’ve identified. The goal here is NOT to “solve” an identified problem, but to highlight areas that are in continued need of attention in your school’s improvement plan.
5. Prepare a short paper intended to inform and persuade your team regarding an area that requires attention. Includes a brief overview of important school demographic characteristics (particularly characteristics of the student body); information related to the school’s improvement goals; data relevant to current levels of performance; and a clear statement of the challenge area(s) you believe require attention in your improvement planning. Use the attached rubric as a guide to structure your paper.

This is an exercise in leadership communication. Be selective – you cannot provide an overview of all of the data that might be available. Craft your examination to focus on important areas of concern. NOTE – the tone of the paper is persuasive: you are providing your expert judgment
based on your analysis of school performance data, and in the end you are lobbying the team to adopt the focus you identified as important.

Direct the paper to your school’s leadership team as the audience – the team may include new members, including one or more parents or community members. Avoid jargon, and be aware of the clarity of your presentation – if you confuse your audience or present a lot of disparate data that don’t connect to your school’s objectives, you’ve failed to add value to the discussion. Use tables or graphs sensibly -- to briefly summarize the discussion and direct the reader’s attention.

This paper should be no more than eight (8) pages (not including the cover page) and should be written in a fashion that is suitable for the audience described above.

Writing Assignment 2: Annotated Bibliography
10 Points

Overview: As emerging leaders in your schools, you need to develop the skills associated with accessing the knowledge base on questions that are important to the understanding and improvement of teaching and learning. An annotated bibliography provides you with the opportunity to learn how to sift through existing research on a question that interests you and to begin to organize the knowledge that you are gaining by reading this literature.

Tasks:
1. Use the problem, challenge, or gap you identified in the previous writing assignment. With this focus, articulate a research or guiding question. For example, “Why do second language learners experience disproportionately low achievement in mathematics?” That might be a bit broad, so your research problem or question is likely to narrow as you read relevant literature.
2. Find a number of research articles (theoretical works, empirical studies, and syntheses) that speak to the question you selected. This is an iterative process; as you examine the literature, you will narrow your search by stating (and restating) the research question that defines what you want to know and why. You might identify several articles that are review pieces or syntheses of the literature themselves, but you should also concentrate on identifying primary research (i.e., papers that present an analysis using quantitative or qualitative methods to contribute to the knowledge base on the question). Most of your research can be accomplished on the Internet, with support from your school library, the public library, and/or GMU libraries.
3. Prepare an ANNOTATED BIBLIOGRAPHY using at least five (5) of the most important papers you found. An annotated bibliography is a list of articles (or books) that includes a brief description of the work and an evaluation of its usefulness. The purpose of an annotated bibliography is to provide information about the relevance, utility, and quality of the source for your purposes.
4. Your annotated bibliography should include a statement of the topic and research question you are investigating; five or more annotated entries using the format presented on Worksheet 6.1 (page 164) from the text (one form per reference), and a complete reference list showing all of the papers you consulted (at least 10). References must be in APA format.

Writing Assignment 3: Research Brief
20 Points

Overview: A research brief is a short literature review or compilation and thematic summary of published work on a topic that both summarizes and evaluates what is known on the topic. The main difference between a research brief and a formal literature review is the intended audience: address your research brief to a practitioner audience (e.g., your principal or a school leadership team). The research brief is intended to use published research to make a persuasive case regarding the root causes of the problem, challenge, or gap you have identified in your school and one or two promising solutions. Use your annotated bibliography and the papers you collected to provide a synthesis of the knowledge base and to identify what is known, what is not known (gaps in the literature), and what is missing (unanswered questions) in the extant research.

(Note – the material you presented in the AB is a minimum – you will likely need more sources to do a good job here! Remember, you are trying to present a trustworthy document that school leaders will rely on to formulate actions.)

Tasks:

1. Write an introductory paragraph that includes a clearly-worded, one-sentence guiding question that describes the purpose of your investigation. This should be a reformulation (if needed) or restatement of the question you framed for your annotated bibliography. Your introduction must also include a thesis that clearly states in one sentence the argument you are putting forward in the paper with respect to root causes and promising solutions that would address them.

2. Using the research literature you collected to prepare your annotated bibliography, along with any additional sources you might identify, write a review of the literature that addresses the question and supports your thesis. The body of the document should summarize and analyze the existing research. Remember that this is not simply a listing of the research cited – your review adds value by organizing various studies, and identifying strengths and weaknesses of established work.

3. For purposes of this exercise (and the intended audience – your school’s leadership team), conclude the paper with a section that briefly summarizes what is known and provides a recommendation based on the available research. For instance, if your question was, “Why do second language learners experience disproportionately low achievement in mathematics?” and the research focuses your attention on the need to teach mathematics vocabulary prior to introducing new concepts, you might recommend that your school’s improvement team work toward an improvement objective that addresses the mathematics curriculum in this way. Be as persuasive as you can – this recommendation will connect to your School Improvement Project (SIP) proposal (the next writing assignment).

Your paper should be no more than eight (8) pages (excluding title page and references), and must include citations and a reference list in APA format.
HINT: Your paper should be closely related to your Improvement Target Proposal, leading you to write your guiding question in a manner that suggests a potential course of action for your School Improvement Proposal. Remember, to get the most out of your efforts, you should use the literature and your own investigative work to identify likely root causes of the performance challenge and ways to reduce or eliminate these root causes.

<tbody>
<tr>
<td><strong>Introduction: research problem, overview (15%)</strong>&lt;br&gt;The introduction must be very clear about the direction and focus of the paper.</td>
<td>The paper starts with a clear and concise statement of the research question and an introduction that provides a clear thesis for the reader that lays out the author's main argument. The thesis should be related to the achievement problem, challenge or gap identified in your Improvement Target Proposal.</td>
<td>The paper starts with a brief introduction that alludes to the research question and provides a general thesis.</td>
<td>An introduction is provided that gives only the barest hint about the research question or the information to be shared.</td>
<td>The paper lacks an introduction entirely, or the introduction fails to provide useful information that is linked to the research question.</td>
</tr>
<tr>
<td><strong>Body: Application of research to school improvement (ELCC 1.3) (40%)</strong>&lt;br&gt;For the research to be meaningful, it must be directly related to a specific question and argument.</td>
<td>The body of the paper presents a systematically organized synthesis of research directly relating to the question and supporting the thesis. Analysis is provided that reflects an awareness of and judgment about the quality of published work.</td>
<td>The body of the paper provides a loosely organized synthesis and analysis of published work related to the research question and the thesis.</td>
<td>The body of the paper describes published work generally related to the research question, but provides a limited synthesis or analysis of published work.</td>
<td>The synthesis and analysis of published work is wholly missing or inadequate.</td>
</tr>
<tr>
<td><strong>Conclusion and recommendation (ELCC2.2)(20%)</strong>&lt;br&gt;A conclusion should be both summative and analytical. Restating the thesis is an important vehicle for tying the paper together.</td>
<td>The paper concludes with a clear and concise summary of research directly related to the research question (including a re-statement of the thesis), and a recommendation and rationale advocating for a possible course of action that could effectively result in the desired improvement(s).</td>
<td>The paper concludes with a general summary of research related to the research question and the thesis. A recommendation advocating for a possible course of action that could effectively lead to desired improvement(s) is presented in general terms, but the rationale for the recommendation is not entirely persuasive.</td>
<td>The paper concludes with a general summary of research on the research question. A recommendation advocating for a possible course of action is not evident.</td>
<td>The conclusion is missing or wholly inadequate; the paper ends abruptly.</td>
</tr>
<tr>
<td><strong>Quality of research support (ELCC2.3)</strong> (15%)</td>
<td>Research cited is well balanced, including original research and synthesis pieces from high-quality, credible sources.</td>
<td>Research cited from quality sources, but lacks specificity or is not connected in a set of coherent arguments.</td>
<td>General supporting research evidence is referenced, but appears dominated by syntheses or opinion pieces, or material from questionable sources.</td>
<td>Few solid supporting ideas or evidence from research are included.</td>
</tr>
<tr>

</table>
Writing Assignment 4: SIP Proposal
40 points

Overview: School leaders are increasingly expected to engage in short-term action research projects to demonstrate the efficacy of school programs and practices. As a part of your internship, you will propose a School Improvement Project (SIP) that addresses a problem or “achievement gap” identified through research on your school. Your proposal will describe a specific improvement project that you will design, implement, and evaluate during your internship, and later analyze in one of your concluding courses. The expectation is that you will lead a team in implementation of this project.

Tasks:

1. OVERVIEW: The proposal should start with a concise and well thought out description of the achievement gap you have identified through your assessment of student performance and achievement data, followed by a clear statement of purpose that generally demonstrates how you intend to address the performance gap. After stating this purpose, include an overview of the project that provides a brief description of what you intend to do to implement your proposal.

2. RATIONALE: Include a concise and well thought out rationale that describes why it is important to address the performance gap you identified, and your espoused theory of action that suggests why taking the proposed action will lead to improvement in the targeted area. Be sure to describe how your SIP connects to or reinforces your school’s vision and objectives. Use the research literature to support your strategy for addressing the achievement gap you identified.

3. OUTCOMES: Provide a short description of the specific outcomes you are seeking by implementing your project. Be specific; identify the performance indicators you intend to track in order to measure the educational outcomes that are important in your improvement area.

4. INVOLVEMENT: The expectation is that you will be engaging members of your school community in designing and enacting your improvement project. Provide a short summary of who you involved in the creation of this proposal, and which stakeholders you envision involving in the enactment and assessment of the SIP. Describe how you plan to enlist their support and build your team, including means you will use to maintain effective communication throughout the project.

5. ACTION PLAN: The proposal must include a clear, step-by-step action plan that defines the objective of the project (i.e., restates your purpose as an action objective), and delineates each of the major tasks that need to be completed during the project; when each task will be completed; who is responsible for each task; the resources needed to complete each task; and specific “success signals” that serve as indicators of the
completion of major steps in the project. Use worksheets 9. 1 – 9.4 from Using Research to Lead School Improvement to help you prepare your action plan.

6. BUDGET: Following the action plan, a clear, well thought out budget summary should be presented. This can be a short narrative presentation (you do not need budget codes, etc.) The narrative should include a synopsis of the funding needed to complete the project; a description of any existing resources that will be devoted to the project, and a discussion of how authority to use these resources has been (or will be) procured.

7. EVALUATION PLAN: Include a narrative explanation of how you plan to evaluate your project, which includes a) the specific indicators you will be examining to determine impact of the project on student performance or on the learning environment; b) a description of how and when you plan to collect data about these indicators, and c) a brief description of the analysis you plan to conduct to examine these data in order to ascertain the impact of the project on your intended outcomes.

8. CONSEQUENCE ANALYSIS: In closing, briefly discuss the advantages and the potential limitations of the project. In particular, conduct a consequence analysis to predict any issues that might arise during implementation, or any limitations you might face in terms of using the evaluation design to draw trustworthy inferences about the effectiveness of the project. If possible, include reference to issues raised in the literature.

NOTE: The proposal is not an essay, per se; it can be written using each of the sections listed above, and some information can be presented in bullets (e.g., a listing of outcomes measured) or in tables (e.g., the action plan). There is a fair amount of redundancy in this proposal – for instance, the description of the project should provide a brief narrative explanation that matches the project delineated in the action plan; the list of outcomes measured should relate to the evaluation plan (which describes how you will go about collecting these data and what you will look at to know if you were successful). Your audience for this proposal is your principal – imagine that you are presenting this document to him/her, and lobbying for adoption of this project (which you will lead).

Your research proposal should be no more than 12 pages (not including cover page and reference list), and should include citations and a reference list in APA format.

<tr>
<td><strong>Statement of purpose and overview of project:</strong> Use of data to identify SIP topic that relates to and supports the school's vision and objectives (ELCC 1.2) (10%)</td>
<td>The proposal begins with a clear statement of purpose, which relates specifically to a performance gap identified using assessment results, demographic data, and analysis of school and community needs. A concise, but thorough description of the proposed project is provided that spells out the actions proposed to reduce the identified performance gap.</td>
<td>The proposal begins with a statement of purpose which relates generally to a performance gap identified using assessment data. A brief description of the proposed project is provided.</td>
<td>The statement of purpose and/or description of the project are evident, but is vaguely worded or poorly spelled out. It is difficult to discern a clear focus of the project.</td>
<td>The rationale is weak or wholly inadequate. It is not clear how enacting the proposed project relates to reducing the identified performance gap.</td>
</tr>
<tr>
<td><strong>Rationale:</strong> Use of research-supported strategies to promote continual and sustainable improvement (ELCC 1.3) (10%)</td>
<td>The proposal includes a concise and well supported rationale that describes the nature of the gap being addressed, why the problem is important, and how taking the proposed action is intended to lead to improvement. Specific, current research is presented in support of the strategy selected to address the identified performance gap.</td>
<td>The proposal includes a rationale that describes the nature of the gap being addressed and why the problem is important to the attainment of the school's vision, but it is somewhat unclear about how taking the proposed action is intended to lead to improvement. Research supporting the general improvement strategy is referenced.</td>
<td>The proposal makes general reference to the kinds of outcomes sought, but specific measurable indicators of implementation fidelity and/or project outcomes are not clearly identified.</td>
<td>The outcomes associated with the project are not specified, or outcomes that do not relate to the identified performance gap are proposed.</td>
</tr>
<tr>
<td><strong>Outcomes:</strong> Identification of specific outcomes that will be used to monitor and evaluate progress and plans (ELCC 1.4) (10%)</td>
<td>Specific indicators are identified and described that will be used to monitor and evaluate the implementation and impact of the project. Each indicator is demonstrably connected to either monitoring implementation fidelity of the project or reducing the identified performance gap.</td>
<td>Specific outcome indicators are identified and described that could be used to monitor and evaluate the impact of the project. Indicators used to monitor implementation fidelity are unclear.</td>
<td>The proposal makes general reference to the kinds of outcomes sought, but specific measurable indicators of implementation fidelity and/or project outcomes are not clearly identified.</td>
<td>The outcomes associated with the project are not specified, or outcomes that do not relate to the identified performance gap are proposed.</td>
</tr>
<tr>
<td><strong>Involvement:</strong> Identification and formation of team to</td>
<td>The proposal clearly describes which stakeholders will be involved in enactment.</td>
<td>The proposal describes the primary stakeholders who will be involved in the project.</td>
<td>The proposal is unclear about stakeholders’ involvement in the project.</td>
<td>Stakeholder involvement in planning and/or implementation is unclear.</td>

<tr>
<td>Distribute leadership (ELCC 3.4) (5%)</td>
<td>All stakeholders who are important to the success of the project are involved. Team member roles and responsibilities are outlined, as are means that will be used to maintain effective communication among team members.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><em>Involvement:</em> Understand and sustain a culture of trust, collaboration, and high expectations for students (ELCC 2.1) (5%)</td>
<td>The proposal clearly describes how the candidate will build a collaborative team to promote improvement goals, and build trust throughout enactment, monitoring, and evaluation of the SIP.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Action Plan: Development of action plan to guide the implementation of SIP (ELCC 3.1) (15%)</td>
<td>The proposal includes a clear and well thought-out action plan that focuses on effective deployment of human, fiscal, and material resources to guide the implementation of the SIP. The plan thoroughly delineates each of the major tasks to be accomplished in enacting the project; when each task will be completed; who is involved in accomplishing each task; the resources needed to complete each task; and specific &quot;success signals&quot; or process indicators that will be tracked to monitor completion of each stage of the project, including evaluation of the project.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Professional development: Inclusion of appropriate human resource development plans (ELCC)</td>
<td>The proposal includes clear and well thought-out plans for the development and supervision of instructional and other staff needed to enact the plan, but lacks detailed strategies for achieving these goals.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

*Notes:*
- The proposal clearly describes how the candidate will build a collaborative team to promote improvement goals, and build trust throughout enactment, monitoring, and evaluation of the SIP. The proposal includes clear and well thought-out action plans that are comprehensive and include specific details about tasks, timelines, resource allocation, and process indicators. These plans are well-organized and provide a structured approach to implementation.
- The proposal is unclear about ways collaboration and involvement will be fostered throughout the project. Attributes of team organization are referenced in general terms.
- The proposal is silent with regard to stakeholder involvement and trust building.
- The proposal includes vague or superficial plans for developing the skills and abilities of stakeholders who are involved in enactment of the project. Some necessary tasks or implementation details are vaguely described or missing.

community to positively influence the school context (ELCC 6.2) (10%)

school community. Advantages and disadvantages of the project and evaluation design are highlighted, including an assessment of issues relating to the involvement and support of important stakeholders within the school community. Issues relating to implementation fidelity and the trustworthiness of the evaluation research design are clearly spelled out.

involvement of important stakeholders. Obvious advantages and disadvantages of the project and evaluation design are identified. Select issues related to implementation fidelity and trustworthiness of the research evaluation design are explored, though some important potential issues are not identified.

implementation fidelity, and trustworthiness are only superficially addressed.

Support: Use available knowledge related to current and emerging trends (ELCC 6.3) (5%)

Specific, developed ideas and/or evidence from research are used to support the selection of the achievement gap and the strategy identified for addressing it.

Supporting research used to support the project lacks specificity or is loosely developed.

General supporting ideas or evidence are presented.

Few to no solid supporting ideas or evidence from research are included.

Organization of proposal:
(5%)

The proposal is powerfully organized and fully developed.

The proposal includes logical progression of ideas aided by clear transitions.

The proposal includes brief skeleton (introduction, body, and conclusion) but lacks effective transitions.

The proposal lacks a logical progression of ideas.

Mechanics and APA:
(5%)

The proposal is nearly error-free, which reflects clear understanding of APA and thorough proofreading.

Occasional grammatical errors and questionable word choice are present.

Errors in grammar and punctuation are present, but spelling has been proofread.

The proposal contains frequent errors in spelling, grammar, and punctuation.
