GEORGE MASON UNIVERSITY COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT PHD IN EDUCATION PROGRAM

EDRS 823, Section 001: ADVANCED RESEARCH METHODS IN SINGLE SUBJECT & SINGLE CASE DESIGN 3 credits Fall 2016

Tuesday 4:30-7:10pm; Thompson Hall L028

INSTRUCTOR INFORMATION

Name: Anna (Anya) Evmenova, Ph.D.

Office hours: by appointment

Office: Finley Building, Room 215-216

Phone: 703 993-5256 | Email: aevmenov@gmu.edu

PREREQUISITES: EDRS 810, 811, 812

COURSE DESCRIPTION

823 Advanced Research Methods in Single Subject/Case Design (3:3:0): Prepares students to conduct research using single subject design and single case study design. Provides understanding of the salient features as well as the advantages and disadvantages of these research methodologies. Students critique and analyze published research using these methodologies. Provides opportunities to apply these methodologies to research questions related to current student interests.

COURSE DELIVERY METHOD

Learning activities include the following:

- 1. Class lecture, discussion and possible guest speaker
- 2. Videotapes and other relevant media presentations
- 3. Study and independent library research
- 4. Online resources and applications with relevant hardware and software
- 5. Application activities, including in-class evaluation of research and materials
- 6. Written research study using the American Psychological Association format

STUDENT OUTCOMES

By the end of the course students will be able to:

- 1. Discuss the basic concepts, strengths and limitations of single subject research designs
- 2. Discuss Interobserver Agreement/Reliability, Validity, Visual Analysis, and Statistical tests involving single subject research designs
- 3. Evaluate previous research that has employed single subject research methodology
- 4. Design and implement a research study using single subject methodology

GSE Blackboard will be used to post important information for this course (and others) and in completing some course assignments. The following is how you will access the **Blackboard-**

GSE Login Page: Enter the URL https://mymasonportal.gmu.edu into your browser location field. Enter your **Username** (your GMU email username) & **Password** (your GMU email password). Click **Login**. Find EDRS 823 (Fall 2016) and click on it.

REQUIRED TEXT

- Gast, D. L. & Ledford, J. R. (2014). Single subject research methodology: Applications in special education and behavioral sciences (2nd ed.). Upper Saddle River, NJ: Prentice Hall.
- Kratochwill, T. R., & Levin, J. R. (Eds.). (2014). *Single-case intervention research: Methodological and statistical advances*. Washington DC: American Psychological Association.

An article readings list provided below and posted on Blackboard will correspond to the syllabus schedule. Additional readings may be provided by the instructor throughout the semester as appropriate.

RECOMMENDED TEXTS

- Alberto, P. A., & Troutman, A. C. (2012). *Applied behavior analysis for teachers* (9th ed.). Upper Saddle River, NJ: Prentice Hall.
- Kennedy, C. H. (2005). *Single case designs for educational research*. Boston, MA: Allyn and Bacon.
- Barlow, D. H., Nock, M. K., & Hersen, M. (2009). *Single case experimental design: Strategies for studying behavior change* (3rd ed.). Boston, MA: Pearson.

COURSE EXPECTIONS FOR STUDENTS

Students are expected to (a) attend all classes during the course, (b) **arrive on time**, (c) stay for the duration of the class time (d) bring books to each class and (e) complete Blackboard discussion boards and other assignments. All out-of class assignments are to be competed prior to the beginning of class on the date that they are due.

Please notify the instructor by email in advance if you will not be able to attend class, and arrange for a classmate to pick up handouts/provide notes. If you are absent, the due date does not change and students are responsible to make sure that all assignments are handed in on time.

Late assignments will result in a reduction in points.

In-depth reading, study, and work on course requirements require outside class time. Students are expected to allot approximately three hours for class study and preparation for *each* credit hour weekly in addition to papers and assignments.

COURSE ASSIGNMENTS & POINT DISTRIBUTION

CLASS PARTICIPATION: 10 Points

Due to the importance of lecture and discussion to your total learning experience, you must both attend and participate in class regularly. Attendance, punctuality, preparation, and active contribution are essential.

in additional penalties - 5 or less pts.	followed - 5-9 pts .	
	_	

BLACKBOARD ACTIVITIES: 30 Points

Students will be required to participate in 6 class blackboard discussions (5 points each) for topics throughout the course. Students will be expected to provide their opinions as well as post feedback and comments based on opinions of other students. The tentative list of blackboard activities as follows:

Blackboard 1: Discover information about one of the following figures: Paul Broca, Hermann Ebbinghaus, Ivan Pavlov, Adolphe Quetelet, Ronald Aylmer Fisher, David Barlow, Michel Hersen, Alan Kazdin, Gordon Allport, and Burrhis Frederick Skinner. Write 2-3 paragraphs about their contributions to the field of single subject design. All citations should be noted.

<u>Blackboard 2</u>: Please describe the behaviors you are planning to measure in your project. Provide operationalized definitions for those behaviors. Find 2-3 single-subject studies that have operationalized your behaviors (or similar ones) in different ways. Describe how the behaviors were defined in those studies. Discuss what dimensions you will use to measure the behavior(s). Design a draft of the recording system that you may want to use in your project. Please post by Tuesday morning. We will discuss your recording systems in class.

<u>Blackboard 3</u>: Prepare and post the Logic Model for your study. Your logic model will map out sample characteristics, intervention characteristics (including potential confounding variables), dependent variables, intervention outcomes (proximal and distal), as well as the predicted change in the behavior. Make sure to base your logic model on existing research.

Blackboard 4: Develop research questions appropriate for the single subject research study based on the topic you have chosen for your final project. Provide operationalized definitions for all the terms used in the research questions. Identify appropriate research design(s) to address those questions. Post the questions on the blackboard by Saturday. Between Sunday and Tuesday provide feedback to your classmates on their research questions. Please discuss why you think their questions are suited or not suited for single subject research study.

<u>Blackboard 5</u>: Create a hypothetical graph of your study and post it on Blackboard. Conduct visual analysis of your hypothetical graph and provide description of your results.

<u>Blackboard 6</u>: Conduct a mini meta-analysis study using the coding rubric provided in class. Find 3-5 single-subject research articles on your topic (possibly use the same articles in the literature review section of your final paper), code them using the rubric, use one of the methods for calculating effect sizes for single-subject experimental designs discussed in class. Please post a brief description of your meta-analysis methodology, results, as well as your impressions regarding meta-analysis as method for identifying evidence-based practices.

SHORT GROUP PRESENTATION: 10 Points

From recent (less than 5 years old) peer reviewed journal articles choose one single subject design research studies to discuss the issue of (3-4 students per topic):

- (1) Measures
- (2) Interobserver Agreement
- (3) Fidelity of Treatment/Procedural Reliability
- (4) Social Validity
- (5) Visual Analysis
- (6) Statistical Analysis

Make sure to include the following requirements:

- 1. Participants (1)
- 2. Setting (1)
- 3. Methods (1)
- 4. Findings (1)
- 5. Commentary (using quality indicators) should reflect positive points/strengths (2)
- 6. Commentary (using quality indicators) should reflect negative points/limitations (2)
- 7. Commentary and importance of the issue/chosen topic (2) *Total points=10*

A schedule with presentation dates is provided within the course schedule. The rubric below will denote the scoring.

RESEARCH PROJECT: 40 points

The research project is designed to provide experience with single subject design, especially implementing and writing up a research report.

Introduction:

Purpose Statement: Discuss what is this research is about including the significance of this topic.

Research Questions: Have at least 2-3 research questions (must include participants, dependent, independent variables, and site if appropriate).

Background Literature: Provide a brief description of the background literature that indicates a need for your questions.

Method: (should be **more** detailed than is common for most published reports)

Research Design: Describe and justify single-subject research design chosen for this study.

Participants: Describe demographic and educational information for your individual(s). In studies with less than 10 participants, each participant should be described individually.

Setting: Describe a setting, in which your study took place in detail.

Independent Variables: Provide operationalized definitions or describe in detail the independent variable in the study including all its components.

Materials: Carefully describe all of the instructional materials that were used in your project. Attach copies of the precise materials used if applicable.

Dependent Variables: Provide operationalized definitions of all dependent variables examined in the study.

Procedures: Carefully describe in a step-by-step fashion what you did with the individual(s). Include description of the procedures during the baseline, treatment, maintenance and/or generalization phases.

Interobserver Agreement: Define the procedures, explain observer training, include formulas and coefficients.

Procedural Reliability: Define the procedures, explain observer training, include

formulas and coefficients.

Social Validity: Describe social validity measures.

Data Analysis: Describe all the analyses you are going to use (visual and statistical) in great detail.

Results:

Visual Analysis: Describe the visual analysis results (e.g., including level, trend, variability, immediacy of change, overlap, consistency)

Statistical Analysis and/or Randomization Tests (if any): Describe the statistical analysis results or discuss why you chose not to use any statistical procedures.

Social Validity: Describe social validity results.

Discussion:

Provide a brief discussion of your findings.

Implications:

Provide some insights as to why you might have obtained the findings and what you learned from the project.

Reflection:

Include a brief (1-2 pages) reflection on single subject research methods in general and your project in particular.

RESEARCH POSTER/PRESENTATION: 10 points

Prepare an overview of your paper using the following guidelines:

- 1. Title of research
- 2. Purpose of research
- 3. Background review including statement of need
- 4. Method, including sample, materials, and procedures, validity and reliability
- 5. Data analyses
- 6. Results
- 7. Discussion and implications

	understanding of	answer audience	audience questions about the proposal
	relevant research	questions - 7-9	with poise, clarity, and
	methods - 6-7 pts.	pts.	thoughtfulness – 10 pts.

EVALUATION IN SUMMARY:

1. Class participation: 10 points

2. Blackboard activities (6): 30 points (5 points each)

Short presentation: 10 points
 Research project: 40 points
 Poster presentation: 10 points

Points will be deducted for work submitted late.

GRADING CRITERIA:

96-100 points = A

90-95 points = A-

85-89 points = B

80-84 points = B-

70-79 points = C

<70 points = F

We will use APA 6th Edition guidelines for all course assignments http://writingcenter.gmu.edu/writing-resources. This link from the GMU Writing Center provides access to APA online style guides, additional guides for writing papers using APA style and the citation machine http://owl.english.purdue.edu/owl/section/2/10/. This link is connected to an overview, workshop, as well as formatting and guides to the new edition of the APA style. This useful tool is for getting acquainted with APA essentials http://www.apastyle.org/apa-style-help.aspx. This link provides an APA Style Help from the American Psychological Association.

We will use person-first language in our class discussions and written assignments (and ideally in our professional practice). Please refer to "Guidelines for Reporting and Writing about People with Disabilities" http://www.ucpaorwa.org/uploads/media_items/apa-guidelines-for-writing-and-reporting-about-people-with-disabilities.original.pdf

Core Values Commitment

The College of Education and Human Development is committed to collaboration, ethical leadership, innovation, research-based practice, and social justice. Students are expected to adhere to these principles: http://cehd.gmu.edu/values.

COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT

GMU Policies and Resources for Students

Policies

- Students must adhere to the guidelines of the Mason Honor Code (see http://oai.gmu.edu/the-mason-honor-code/).
- Students must follow the university policy for Responsible Use of Computing (see http://universitypolicy.gmu.edu/policies/responsible-use-of-computing/).
- Students are responsible for the content of university communications sent to their Mason email account and are required to activate their account and check it regularly. All communication from the university, college, school, and program will be sent to students solely through their Mason email account.
- Students with disabilities who seek accommodations in a course must be registered with George Mason University Disability Services. Approved accommodations will begin at the time the written letter from Disability Services is received by the instructor (see http://ods.gmu.edu/).
- Students must follow the university policy stating that all sound emitting devices shall be silenced during class unless otherwise authorized by the instructor.

Campus Resources

- Support for submission of assignments to Tk20 should be directed to tk20help@gmu.edu or https://cehd.gmu.edu/api/tk20. Questions or concerns regarding use of Blackboard should be directed to http://coursessupport.gmu.edu/.
- The George Mason University Writing Center staff provides a variety of resources

and services (e.g., tutoring, workshops, writing guides, handbooks) intended to support students as they work to construct and share knowledge through writing (see http://writingcenter.gmu.edu/).

- The George Mason University Counseling and Psychological Services (CAPS) staff consists of professional counseling and clinical psychologists, social workers, and counselors who offer a wide range of services (e.g., individual and group counseling, workshops and outreach programs) to enhance students' personal experience and academic performance (see http://caps.gmu.edu/).
- The George Mason University Office of Student Support staff helps students negotiate life situations by connecting them with appropriate campus and off-campus resources. Students in need of these services may contact the office by phone (703-993-5376). Concerned students, faculty and staff may also make a referral to express concern for the safety or well-being of a Mason student or the community by going to http://studentsupport.gmu.edu/, and the OSS staff will follow up with the student.

For additional information on the College of Education and Human Development, please visit our website https://cehd.gmu.edu.

Tentative Class Topics and Due Dates (Subject to change for weather or other unforeseen interruptions)

Date	Class Topic	Reading & Assignments are Due	
Tuesday,	1. Introduction, History, and General	- Horner et al. (2005)
