Fall 2018

EDSE 663 633: Collaborative Teamwork to Support Students with Significant Disabilities
CRN: 83451, 3 – Credits

Instructor: Dr. Linn Jorgenson	Meeting Dates: 9/11/2018 – 11/13/2018
Phone: (703) 419-0694	Meeting Day(s): Tuesday
E-Mail: ljorgen2@gmu.edu	Meeting Time(s): 5 pm – 9 pm
Office Hours: By Appointment	Meeting Location: Fairfax High School Rm 137
Office Location: Krug Hall Rm 103	Other Phone: N/A

*Note: This syllabus may change according to class needs. Teacher Candidates/Students will be advised of any changes immediately through George Mason e-mail and/or through Blackboard.

Prerequisite(s): None

Co-requisite(s): None

Course Description

Focuses on models of teamwork, group decision making, team process, leadership and communication and how they influence services for individuals with significant disabilities and their families. Provides an understanding of collaborative structures and demonstrates knowledge of skills and strategies to maintain effective relationships with a variety of stakeholders in collaborative settings. Offered by Graduate School of Education. May not be repeated for credit.

Advising Contact Information

Please make sure that you are being advised on a regular basis as to your status and progress through your program. Mason M.Ed. and Certificate teacher candidates/students should contact the Special Education Advising Office at (703) 993-3670 for assistance. All other teacher candidates/students should refer to their faculty advisor.

Advising Tip

Have you met with an advisor? All students should make an appointment to meet with an advisor to outline a plan for completing coursework and non-course requirements such as testing. To make an appointment by phone or in person, go to <http://gse.gmu.edu/special-education/advising/>.

Course Delivery Method

Learning activities include the following:

1. Class lecture and discussion
2. Application activities
3. Small group activities and assignments
4. Video and other media supports
5. Research and presentation activities
6. Electronic supplements and activities via Blackboard

Learner Outcomes

Upon completion of this course, students will be able to:

1. Define collaboration, consultation, and teamwork and explain the essential characteristics of each.
2. Identify and discuss the roles and responsibilities of the collaborative team to support students with significant disabilities.
3. Outline culturally responsive strategies that support and assist families in becoming active partners in the education of their children with significant disabilities.
4. Consider specific strategies to plan for, support, engage and monitor paraprofessionals working educational settings.
5. Evaluate and plan for the role of community agencies and other resource providers within the collaborative model to support the needs of students with significant disabilities.
6. Examine how personal perspectives and bias affect team interactions as well as influence decisions related to the instructional, communication, behavior, and or physical/medical needs of students with significant disabilities.

Apply problem-solving techniques in collaborating with professional colleagues, parents, and related and ancillary personnel to support the instructional, communication, behavior, and or physical/medical needs of students with significant disabilities.

Course Relationship to Program Goals and Professional Organizations

This course is part of the George Mason University, Graduate School of Education (GSE), Special Education Programs for teacher licensure in the Commonwealth of Virginia in the special education areas of Special Education: Students with Disabilities who Access the Adapted Curriculum K-12 and Visual Impairments PK-12. This program complies with the standards for teacher licensure established by the Council for Exceptional Children (CEC), the major special education professional organization. The CEC standards that will be addressed in this class include Standard 6: Professional learning and ethical practice; Standard 7: Collaboration. Standard 6 Professional Learning and Ethical Practice: Beginning special education professionals use foundational knowledge of the field and their professional Ethical Principles and Practice Standards to inform special education practice, to engage in lifelong learning, and to advance the profession.

Standard 7 Collaboration: Beginning special education professionals collaborate with families, other educators, related service providers, individuals with exceptionalities, and personnel from

community agencies in culturally responsive ways to address the needs of individuals with exceptionalities across a range of learning experiences.

This course contains at least one Common Assessment developed by the College of Education and Human Development to assess our candidates' performance on nationally accepted standards for beginning teachers (InTASC) and our programs' performance on national accreditation standards (CAEP).

Required Textbooks

Friend, M. & Cook, L. (2017). *Interactions: Collaborations skills for school professionals* (8th ed.). Boston: Pearson

Doyle, M.B. (2008). *The Paraprofessional's Guide to the inclusive classroom* (3rd ed.). Baltimore, MD: Brookes

Recommended Textbooks

American Psychological Association. (2010). *Publication manual of the American Psychological Association* (6th ed.). Washington, DC: Author.

Course Performance Evaluation

Students are expected to submit all assignments on time in the manner outlined by the instructor (e.g., Blackboard, Tk20, hard copy)

Assignments and/or Examinations

Performance-based Assessment (Tk20 submission required)

Tk20 Performance-Based Assessment Submission Requirement

It is critical for the special education program to collect data on how our students are meeting accreditation standards. Every teacher candidate/student registered for an EDSE course with a required Performance-based Assessment (PBA) is required to upload the PBA to Tk20 (regardless of whether a course is an elective, a one-time course or part of an undergraduate minor). A PBA is a specific assignment, presentation, or project that best demonstrates one or more CEC, InTASC or other standard connected to the course. A PBA is evaluated in two ways. The first is for a grade, based on the instructor's grading rubric. The second is for program accreditation purposes. Your instructor will provide directions as to how to upload the PBA to Tk20.

For EDSE 663, the required PBA is *Collaborative Team Improvement Project*. Failure to submit the assignment to Tk20 will result in reporting the course grade as Incomplete (IN). Teacher candidates/students have until five days prior to the University-stated grade change deadline to upload the required PBA in order to change the course grade. When the PBA is uploaded, the teacher candidate/student is required to notify the instructor so that the "IN" can be changed to a grade. If the required PBA is not uploaded five days prior to the University-stated grade change deadline and, therefore, the grade not changed, it will become an F. Please check to verify your ability to upload items to Tk20 before the PBA due date.

College Wide Common Assessment (TK20 submission required)

Type Here – Please see Blackboard. N/A

Performance-based Common Assignments (No Tk20 submission required)

Type Here – Please see Blackboard. N/A

Other Assignments

ASSIGNMENT 1: SITUATIONAL SCENARIO #1 (50 POINTS, INDIVIDUAL GRADE)

Given the situation below, include a specific description of the problem that needs resolution. Briefly describe the target education environment. Explain the importance of resolving this issue in a collaborative manner. Then provide a plan of action that a team could take. Provide at least three references from your textbook which address recommendations to use in resolving the issue. The length of the paper should not exceed 3 double spaced pages with an additional page for references. APA format must be followed. A grading rubric will be provided.

A team of professionals at Junction High School has convened because budget cuts from the superintendent have resulted in layoffs of several paraprofessionals, including the one who accompanies Mikey Martin, who has moderate to severe multiple disabilities including visual impairment, to general education algebra and biology classes. The team has to develop a plan to meet his needs in those settings.

ASSIGNMENT 2: SITUATIONAL SCENARIO #2 (50 POINTS, Group GRADE)

Given the situation below, include a specific description of the problem that needs resolution. Briefly describe the target education environment. Explain the importance of resolving this issue in a collaborative manner. Then provide a plan of action that a team could take. Provide at least three references from your textbook which address recommendations to use in resolving the issue. The length of the paper should not exceed 3 double spaced pages with an additional page for references. APA format must be followed. A grading rubric will be provided.

Third grader Joseph Smith's parents want to increase the amount of time he spends in general education classes. Right now, he goes to art and music with his third grade peers, two days a week each. His parents also want him to receive all of his academic instruction in third grade general education classes. His current academic skills are below the first grade level. This has created a conflict with the school administration and prompted a call for an IEP meeting. Your team will have to plan how to resolve this issue before legal professionals become involved

ASSIGNMENT 3: Collaborative Team Improvement Project- Group Grade (100pts)

Team Presentation and Expanded Power Point

Using the information you have collected on effective collaboration in class, the information collected on school supports, and after thorough discussion of the issue risking inclusive education for the case study student you have chosen, you will, as a team, **develop a plan that addresses the issue and will realistically be accepted by school administrators.** The team may modify/add information about the child and his or her situation that may make the assignment more relevant or realistic. At the same time, each member of the team will individually be reflecting on the team process.

As a team, you will describe the process that you used in developing your recommendations and plan in a **Final Team Project Presentation.** Each team will develop a set of expanded PowerPoint slides that will be used in the presentation.

What is meant by “expanded” is that for each slide in your presentation, there must be a narrative written about the content using the notes page feature. You will use citations from the literature that you use to develop the justification for your team’s decisions. This format is an alternative to a 15-20 page paper that has been required in the past.

- In the presentation, your team will include:

Statement of the Problem: The statement of the problem should include a specific description of the problem you will resolve. Here you will *briefly* describe the scenario, with a *general* description of both the student (strengths, areas of need, etc.) and the education environment. At the end of this slide, you will identify the intended outcomes that your team projected in the beginning of your deliberations for the student (and for your team).

Review of the Literature: Explain the importance of resolving this issue in a collaborative manner. Review literature relevant to the problem you have selected to address, including any regulations or evidence-based practice supporting your efforts. Are there any state or federal laws or regulations that apply to this case? If so, identify and cite them. Provide at least three references in addition to what you find in your textbooks (website references, such as those providing access information on exceptionalities, can be used but must be in addition to the three references and the textbook).

Needs of the Student as Identified by the Team: Outline a prioritized list of the needs of the child and school setting that will allow the child to continue to be cared for in an inclusive setting whether it be in the school, home, or community (depending on the case study). On the Notes page include why the team prioritized a specific need over any of the others that are farther down on the list.

Teaming Methods Used with this Project: Provide an overview of the team process used to make the decisions including:

- specific collaborative teaming models and methods used
- identification of what methods worked for the team and what did not work as well
- discuss how the team worked together to foster respectful and beneficial relationships as to get the project completed?
- what specific responsibilities did each team member have?
- how did your team communicate with each other?

How the Team Resolved Conflict: Identify how the team dealt with any disagreement in the decision making or over all team meeting process.

What Could the Team Have Done Differently?: Identify how the team could have approached decision making in a different way. What would you keep and what would you change to have a better team experience?

- Teams will present their Final Teaming Projects to the entire class using a **PowerPoint format** at the end of the semester. Do not read the narrative that was written for the slides. **All team members must participate in the presentation** which must last **no longer than 20 minutes**, including time for questions and answers. The presentation should focus on the team process experience. Participation for all students includes asking and answering questions among team members and with the “audience”.

Aleshia

Female, 5 yrs

Diagnosis: Educational Diagnostic Category: Developmental Delay; Medical: Status Post Encephalitis at 3 yrs, Quadriplegic, Severe/Profound Intellectual Functioning, Cortical Blindness

Ability: Recognizes sound of family voices and that of teacher/instructional assistant; indicates pleasure/displeasure through facial grimaces; able to sit in adapted chair for 2 hour periods with head/trunk/hip support; has no joint contractures, but muscle tone is high throughout trunk and extremities.

Limitations: Non-verbal; low-vision or Blind; seizures; unable to get hands to mouth; dependent on others for all ADL; difficulty chewing and swallowing – takes up to an hour to eat a meal. Needs to be placed in a different position every 2 hours to avoid skin breakdown.

Family: Father, mother (both in their 30’s), 4 siblings. Aleshia is the middle child. Youngest sibling is 2 months old. Family lives in a rented 3 bedroom townhouse. Father was employed until last month. Family has no medical benefits at this point in time, so children (except Aleshia) are on FAMIS (special health insurance covering children of low wage earners). Aleshia is on Medicaid. Mother is a homemaker, but was an administrative assistant before Aleshia’s medical crisis.

Education: Aleshia is in a self-contained classroom for K-2 students who are classified as needing Special Education Adapted Curriculum.

Issue to be Addressed by the Team: Aleshia uses a seating device that was specifically designed for her use by the School’s Occupational Therapist with input from the Physical Therapist. It cannot be purchased “off the shelf” from a vendor as it was constructed from the parts of 3 different wheelchairs/seating devices found in the storage room with each originally costing over \$1,000. Aleshia has made amazing progress since she began using the seating device at school. The therapists and teachers are recommending that Aleshia be transported

in the device on the school bus, and feel strongly that she should use it at home, especially when eating and when interacting with her family. School administration has never allowed school owned assistive technology to go home with a student, even for a trial basis. Teachers have been told specifically to not write the use of assistive technology outside of school settings in IEPs.

It is now May, and Aleshia will only be receiving Extended Year Services for 4 weeks in July. Aleshia's teacher, therapists, and instructional assistants are very worried that Aleshia will regress in skills during the summer and is at risk of developing joint contractures without proper seating. The team needs to figure out how to meet Aleshia's needs at home after school hours and during the summer break.

Trip

Male, 12 yrs

Diagnosis: Educational Diagnostic Category: Emotional & Behavior Disorder;
Medical: Prader-Willi Syndrome with Autistic-like behavior, mild Congestive Heart Failure and Type 2 Diabetes due to obesity

Ability: Verbal, but speech is somewhat slurred and at times, difficult to understand; able to walk for short distances (less than 1 block) on flat surfaces; can dress self with supervision; enjoys being around children who are younger; fully independent with toileting and bathing, but needs prompts; has no trouble using fork or spoon to eat, but will steal food from other's plates and from any unlocked source. When you ask Trip what he wants to do after he finishes school, he says, "Go to college like my friend, Sam". Trip met Sam through the "Best Buddies" program.

Limitations: Profoundly obese (5'6", 300 lbs) due to food obsession (Prader-Willi Syndrome); must take frequent rests when walking from one end of school to other; considered to be medically fragile because of diabetes. Cannot climb flight of stairs – too much stress on heart and lungs; tantrum behavior - major property destruction – when denied access to food at home or school. Family and family friends refuse to be around Trip for fear of being in the path of flying objects, including eating utensils at mealtime.

Family: Lives with single mother – aged 55 in a single family home; no siblings; father deceased; mother works – employed part-time at local grocery store – hours vary from day to day, week to week. Family partially supported financially by former husband's SSDI. Trip receives both Medicare and Medicaid health insurance.

Issue to be Addressed by the Team: Trip's tantrum behavior is increasing. He is throwing things (utensils - including forks, furniture, etc.) and the cafeteria staff is fearful that someone will get hurt when he is at lunch. When Trip is engaged in activities, he will stop obsessing about food for short periods of time, but when left alone, he is always trying to convince his teacher and instructional assistant to give him a snack (all food in the classroom is locked away to prevent Trip from having access). The dilemma that the team must address is how to keep Trip in an inclusive education setting and use positive behavior support strategies rather than deny Trip access to all areas of the school especially where there is food either stored or being consumed.

Jian

Male, 18 yrs

Diagnosis: Educational Diagnostic Category: Severe ID; Medical: Down syndrome; congenital cardiac anomalies – repaired.

Ability: Jian requires close supervision and some assistance with all ADL. He can assist with dressing, but needs verbal cues. Can eat finger food and use a spoon, but not able to use fork and knife. Needs close supervision when washing hands and bathing – he will put his head (nose and mouth) under running spigots. He has been known to submerge his head in the toilet. Jian is never taken anywhere where there is a body of water – pond, river, lake, fountain. His only inappropriate behavior at school occurs in bathroom with water in sink and toilet, and at drinking fountains. Jian is well liked by school personnel and peers.

Limitations: Needs close supervision in the bathroom and anywhere where there is access to water. Needs significant support in all ADL and with all other community activities. Is not independent – relies on school staff for all cues.

Family: Lives with 80 year old grandmother; parents not in picture. Grandmother's health is failing quickly – she does not have support from family in caring for Jian.

Education: Self-contained and integrated educational settings throughout the day. Jian requires having an instructional assistant (IA) somewhere nearby when in a general classroom setting and when going to bathroom or to a drinking fountain. Needs major modifications of any educational instructional activity.

Issue to be Addressed by the Team: Jian's IEP and transition plan states that this year he is to experience 3 different volunteer experiences outside of the school setting. School administrators are very fearful of what might happen when Jian is out in the community, even if he has 1:1 supervision. The team must put together

a plan that will allow Jian to volunteer in the community and identify what needs to occur before he begins his volunteer experiences and the supports that will be in place at each site.

Martel

Female, 8 yrs

Diagnosis: Educational Diagnostic Category: Emotional Disturbance, Intellectual Disability

Medical Diagnosis: Autism Spectrum Disorder with Self-injurious and Assaultive Behavior; Currently - severe range of cognitive functioning.

Ability: Until a year ago, Martel was able to choose clothing, dress and undress, was toilet trained, ate with utensils. Previously, communicated what she wanted by pointing. No longer uses any of these skills. Screams to get attention; family has to guess what she wants. School trying to implement very rudimentary PECS communication plan. Is very strong and can run very fast. No problems with hearing or dental. Has problem with constipation, but otherwise, very healthy.

Limitations: Non-verbal; requires total self-care as will no longer assist with toileting, eating, bathing, dressing. Was diagnosed with ASD at age 6, but school does not use this diagnosis. Received a thorough inpatient evaluation a year ago after sudden loss of self-care skills after having the flu. Was hospitalized again 2 months ago for 2 weeks after attempting to assault youngest sister with knife. No medical problems identified. Was put on new medication which appears to have eliminated assaultive behavior (There have been no attempts at hitting, biting, or scratching her sisters or other children at school since the most recent hospitalization. Will run from school or home if left unattended, even in the middle of the night. Has excellent gross and fine motor skills.

Family: Father, mother (both in their 20's) – both of their parents moved to Virginia from Mexico when they were young teenagers; 2 siblings – aged 6 and 4. Martel is the oldest child. Family lives in a small, rented 3 bedroom ranch style home in Fredericksburg. All windows are locked and there are keyed deadbolt locks on both the front and back doors with door knobs that are at about the 5 foot level. Father is employed in his family's landscaping business. Mom stays at home, but wants to become a hair stylist when her youngest child goes to kindergarten.

Family has no medical benefits through dad's employer at this point in time. Children receive FAMIS. Parents have a policy that just pays for hospitalizations.

Education: Martel is in a self-contained classroom for K-2 students who are classified as needing Special Education Adapted Curriculum. She has an instructional assistant (IA) with her at all times during the school day.

Issue to be Addressed by the Team:

The teacher has back-up assistance from the Assistant Principal when Martel's behavior is out of control, but she still elopes from the classroom at least once a day. There is a Behavior Intervention Plan in place that is strictly followed. Yesterday, Martel ran from the playground into the street and was knocked to the ground by a cyclist passing by. Martel's mother will not allow her to return to school unless she no longer has access to the playground at recess. The team feels strongly that the situation could have been prevented and does not want Martel to be denied the inclusiveness of being with her peers during recess. They must now put together a plan that is likely to be accepted by Martel's parents, approved by the Principal and other school district administrators.

Course Policies and Expectations

Attendance/Participation (50 POINTS)

The participation grade is based on attendance, completion of assignments on time, and responding to questions asked during class. Attendance is mandatory for all class sessions and team meetings. Please contact me in the event of an emergency.

Late Work

All assignments must be submitted by the designated date and time. Failure to do so will result in a 5 point deduction from the assignment for each day after the assignment is due. If there is an extenuating circumstance, you must get permission from the instructors prior to the due date or the points will be deducted.

Grading Scale

93-100% = A	87-89% = B+	70-79% = C
90-92% = A-	80-86% = B	< 70% = F

***Note:** The George Mason University Honor Code will be strictly enforced. Students are responsible for reading and understanding the Code. "To promote a stronger sense of mutual responsibility, respect, trust, and fairness among all members of the George Mason University

community and with the desire for greater academic and personal achievement, we, the student members of the university community, have set forth this honor code: Student members of the George Mason University community pledge not to cheat, plagiarize, steal, or lie in matters related to academic work.” Work submitted must be your own or with proper citations (see <https://catalog.gmu.edu/policies/honor-code-system/>).

Professional Dispositions

Students are expected to exhibit professional behaviors and dispositions at all times. See <https://cehd.gmu.edu/students/policies-procedures/>. In the College of Education and Human Development, dispositions are formally and separately evaluated in at least three points in each student’s program – a self-evaluation at the start of their program, an instructor’s evaluation in the middle of their program, and a university supervisor’s evaluation during internship. When dispositions are assessed, it is important that for areas where a positive disposition is ‘occasionally evident’ or ‘rarely evident,’ the student takes steps to grow as an educator. See <https://cehd.gmu.edu/epo/candidate-dispositions>. In special education licensure programs, the mid-point evaluation is completed by instructors in EDSE 628, EDSE 661, and EDSE 616, and the internship evaluation is completed by instructors in EDSE 783, EDSE 784, and EDSE 785.

Class Schedule

*Note: Faculty reserves the right to alter the schedule as necessary, with notification to students.

2018 Class Schedule

Core Values Commitment

The College of Education and Human Development is committed to collaboration, ethical leadership, innovation, research-based practice, and social justice. Students are expected to adhere to these principles: <http://cehd.gmu.edu/values/>

GMU Policies and Resources for Students

Policies

- Students must adhere to the guidelines of the Mason Honor Code (see <https://catalog.gmu.edu/policies/honor-code-system/>).
- Students must follow the university policy for Responsible Use of Computing (see <http://universitypolicy.gmu.edu/policies/responsible-use-of-computing/>).
- Students are responsible for the content of university communications sent to their Mason email account and are required to activate their account and check it regularly. All communication from the university, college, school, and program will be sent to students **solely** through their Mason email account.
- Students with disabilities who seek accommodations in a course must be registered with George Mason University Disability Services. Approved accommodations will begin at the time the written letter from Disability Services is received by the instructor (see <http://ods.gmu.edu/>).

- Students must silence all sound emitting devices during class unless otherwise authorized by the instructor.

Campus Resources

- Support for submission of assignments to Tk20 should be directed to tk20help@gmu.edu or <https://cehd.gmu.edu/aero/tk20>. Questions or concerns regarding use of Blackboard should be directed to <http://coursesupport.gmu.edu/>.
- For information on student support resources on campus, see <https://ctfe.gmu.edu/teaching/student-support-resources-on-campus>

For additional information on the College of Education and Human Development, please visit our website <https://cehd.gmu.edu/students/>.
