Prerequisite: EDCI 473 for EDCI 483, EDCI 573&522 for EDCI 673

University Catalog Course Description
Provides advanced study of teaching and curriculum development based on research and current issues. Emphasizes integrating science and technology and adapting instruction to the needs of diverse learners. School-based field experience required. Offered by Graduate School of Education. May not be repeated for credit.

Course Description
This is the second course in a two-part sequence of courses for preservice science teachers. The course is designed to build on the fundamentals of curriculum design and teaching from the first course and focus on using technology for students to investigate science and adapting instruction and assessment for the diverse needs of learners. In addition to using technology in the schools, preservice teachers will modify lessons and assessments to address the diverse needs of students, implement those lessons and assessments with their peers, and analyze the effectiveness of those lessons and assessments.
Big Ideas in Science Education
During this semester, we will be focusing on developing as a reflective practitioner of reformed science education practices. In particular, we will focus on the following big ideas as a way to frame your understanding of effective science education practices throughout both Science Methods I and Science Methods II.

- Our job is to help students figure out how to be lifelong learners
- The more students figure out answers to tough questions on their own, the more they will trust they can learn on their own
- Science is a process that uses evidence to think critically and explain the natural world
  - Process leads to the knowledge we currently teach as facts
  - If students don’t experience the process, they won’t value its ability to explain the natural world – plus they will only see science as a collection of facts
- Know your students – get into their heads when designing lessons
- Have a theory of learning – it is what should guide your instruction as you develop lessons
- Know what you want your students to be able to do and how you will assess it before you design any instruction
- Measure everything you do against student learning
- You don’t have to reinvent the wheel, but do need to customize it based on your learning theory and unit objectives

Learning Goals, Objectives and Assessments (for both Methods I and Methods II)
Within the big ideas above are more specific goals and objectives (tasks) that you should be able to achieve by the end of the semester and two semester sequence of the Science Methods. Below is a list of the major goals with specific objectives and the assessments that will allow you to show that you have achieved those goals.

Goal 1: Build a learning theory and see the value in using it for developing and implementing lessons

<table>
<thead>
<tr>
<th>Objective</th>
<th>Assignment</th>
<th>Who must do this?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pre-service teachers will be able to explain why a student-centered approach to learning is effective in learning</td>
<td>Research Review</td>
<td>Methods II</td>
</tr>
<tr>
<td>Pre-service teachers will be able to describe their theory of learning, supporting with evidence from the literature</td>
<td>Learning Theory</td>
<td>Methods II</td>
</tr>
<tr>
<td>Pre-service teachers will be able to design lessons that clearly reflect their learning theory</td>
<td>Lessons, Unit Plan (M-II), Microteaching (M-I)/ Lesson Critical Incident and Analysis (M-II)</td>
<td>Methods I and II</td>
</tr>
<tr>
<td>Pre-service teachers will be able to explain how the 5-E lesson design, the Learning Cycle, and a student-centered learning theory are effective ways to think about learning and lesson design</td>
<td>Research Review</td>
<td>Methods II</td>
</tr>
</tbody>
</table>
## Goal 2: Do science to understand how science is done

<table>
<thead>
<tr>
<th>Objective</th>
<th>Assignment</th>
<th>Who must do this?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pre-service teachers will be able to design lessons in which students are actively engaged in hands-on science activities</td>
<td>Lesson Plans</td>
<td>Methods I and II</td>
</tr>
<tr>
<td>Pre-service teachers will be able to explain the epistemic features and unique characteristics (NOS) of science</td>
<td>Nature of Science Assignment</td>
<td>Methods I</td>
</tr>
</tbody>
</table>

## Goal 3: Recognize that inquiry learning using scientific practices has inherent risks that should be identified and addressed such that students learn to do science in an ethical and safe manner.

<table>
<thead>
<tr>
<th>Objective</th>
<th>Assignment</th>
<th>Who must do this?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pre-service teachers will be able to explore the web to describe the major safety and ethical concerns associated with conducting science in the classroom</td>
<td>Safety Assignment</td>
<td>Methods I</td>
</tr>
<tr>
<td>Pre-service teachers will be able to describe means to reduce the potential safety risks involved in conducting scientific investigations in the classroom while not compromising the benefit the students get while conducting inquiries</td>
<td>Safety Assignment Lessons</td>
<td>Methods I and II</td>
</tr>
<tr>
<td>Pre-service teachers will be able to design lessons and clearly indicate within the lesson: safety concerns, how to reduce them and what to do when accidents happen</td>
<td>Lessons Unit Plan (M-II)</td>
<td>Methods I and II</td>
</tr>
</tbody>
</table>

## Goal 4: Develop an understanding of how inquiry can develop both scientific thinking and content knowledge

<table>
<thead>
<tr>
<th>Objective</th>
<th>Assignment</th>
<th>Who must do this?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pre-service teachers will be able to explain what inquiry in a science class looks like</td>
<td>Research Review</td>
<td>Methods II</td>
</tr>
<tr>
<td>Pre-service teachers will develop lessons that are inquiry</td>
<td>Lessons, Unit Plan (M-II)</td>
<td>Methods I and II</td>
</tr>
<tr>
<td>Pre-service teachers will be able to explain PBL, PBA, Cognitive Apprenticeships, and Model-Based Inquiry and their potential impact on helping students learn science content and scientific thinking</td>
<td>Research Review</td>
<td>Methods II</td>
</tr>
<tr>
<td>Students will be able to develop lessons that incorporate PBL, PBA, Cognitive Apprenticeships, and Model-Based Inquiry Model-Based Inquiry</td>
<td>Lessons, Unit Plan (M-II)</td>
<td>Methods II</td>
</tr>
</tbody>
</table>
**Goal 5: Understand how to develop effective lessons and units with backwards design**

<table>
<thead>
<tr>
<th>Objective</th>
<th>Assignment</th>
<th>Who must do this?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Student will be able to explain the basic premise and order of Backwards Design</td>
<td>Research Review</td>
<td>Methods II</td>
</tr>
<tr>
<td>Students will use the basic organization of backwards design to develop a lesson plan</td>
<td>Lessons, Unit Plan (M-II)</td>
<td>Methods I and II</td>
</tr>
<tr>
<td>Students will be able to write measurable objectives</td>
<td>Lessons, Unit Plan (M-II)</td>
<td>Methods I and II</td>
</tr>
</tbody>
</table>
| Students will be able to describe how teaching activities support student achievement of measurable objectives | Lessons, Unit Plan (M-II)
Microteaching Reflection (Both)                                           | Methods I and II  |
| Students will be able to describe how assessments evaluate student achievement of the measurable objectives | Lessons (Both), Unit Plan (Methods II), Microteaching (M-I)/Lesson Critical Incident and Analysis (M-II) | Methods I and II  |

**Goal 6: Develop skills as reflective practitioners.**

<table>
<thead>
<tr>
<th>Objective</th>
<th>Assignment</th>
<th>Who must do this?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students will be able to effectively examine classrooms using their learning theory as a lens and student behavior, engagement, and learning (when possible) as the evidence</td>
<td>Clinical Experiences</td>
<td>Methods I and II</td>
</tr>
<tr>
<td>Students will be able to examine use assessment data to reflect on and improve upon lessons</td>
<td>Microteaching (M-I)/Lesson Critical Incident and Analysis (M-II)</td>
<td>Methods I and II</td>
</tr>
</tbody>
</table>

**Relationship to Program Goals and Professional Organizations**

EDCI 483/673 is the second course in a two-course sequence of science methods courses for students seeking a secondary school teaching license in earth science, biology, chemistry, or physics. The course builds on students’ knowledge of their subject matter and from their first science methods course. The course focuses on using technology in science teaching and learning and meeting the diverse needs of learners as called for by the *Standards of Learning for Virginia Public Schools* and *National Science Education Standards* and as outlined by the National Council for Accreditation of Teacher Education (NCATE), the National Science Teachers Association (NSTA), and the Interstate New Teacher Assessment and Support Consortium (INTASC). EDCI 483/673 introduces students to integrating technology in learning and teaching science, adapting inquiry-based lessons, assessment techniques, and the diverse needs of students.
Professional Association Standards (met through EDCI 483/673)

- Understand the relationship of assessment in understanding student learning and informing instruction; RESEARCH-BASED PRACTICE; SPA STANDARD 2c, 5a, 5b, 5c
- Design evidence-based assessment techniques in science instruction; RESEARCH-BASED PRACTICE; SPA STANDARD 2c, 5a, 5b, 5c
- Build a repertoire of science teaching and assessment strategies using technology to help students become scientifically literate, think critically and creatively, and see relationships among science, technology, and society; RESEARCH-BASED PRACTICE; INNOVATION; COLLABORATION; SPA STANDARDS 2, 3, 4, 5
- Critique, adapt, and construct standards-based lessons including assessment and hands-on experiences for the diverse needs of learners including gender equity, cultural diversity, English language learners, gifted/talented students, and students with learning, physical, social, and emotional challenges. RESEARCH-BASED PRACTICE; SOCIAL JUSTICE; ETHICAL LEADERSHIP; SPA STANDARDS 2, 3, 4, 5

Nature of Course Delivery
A variety of teaching strategies will be used to explore the themes of the day. These will largely include face-to-face interactions with the professor and fellow students. All students will continuously analyze and evaluate teaching strategies, as well as science content, processes, and ways of knowing in science.

We will be using the website https://sites.google.com/site/educ483673/ for dissemination of information. Materials will be added throughout the semester based upon needs from the course. The Blackboard site, found at http://mymasonportal.gmu.edu, will be used primarily for submitting assignments and grades. Use the same login as your GMU email for the Blackboard Sites.

GOOGLE SITES: Over the course of the semester, you will be working to organize 4 weeks of teaching (in block schedules – roughly 75 min/lesson). You will be creating multiple products and support materials for these 4 weeks of teaching. All of these products and organization will be initially posted through a website you and your partners will author using Google Sites (https://sites.google.com/). In order to create a website with Google Sites, you will need to sign up for a Gmail email account (if you do not already have one). More information on how to work with Google Sites can be found at https://support.google.com/sites/?hl=en#topic=1689606.

Grading
High quality work and participation is expected on all assignments and in class. Attendance at all classes for the entire class is a course expectation. For each unexcused absence, the course grade will be reduced by 5% points. All assignments are graded. Each graded assignment will be assessed using a scoring rubric which will be handed out before the assignment is due. All assignments are due at the beginning of class on the day they are due. Completing work ahead of the scheduled due date is acceptable and encouraged. There are many assignments in this course, so staying organized and on top of the schedule is important for success. Graded assignments that are late will automatically receive a ten percent grade reduction (one full letter grade lower). After 5 days, any assignments still late will not be accepted unless prior arrangements have been made with the instructor.
Course Performance Evaluation

All assignments for this course will be submitted to Blackboard for evaluation. In addition, Google Sites will be used for the Unit Plan.

Assignments

Science education research shows that frequent assessment of small amounts of material is most effective for learning science. Therefore, in this class formal and informal assessment will be continuously provided on assignments and class activities. Assessment is used as a tool for information that informs both learning and teaching, so this two-way communication loop is necessary for optimal learning.

Policy on Incompletes

If circumstances warrant, a written request for an incomplete must be provided to the instructor for approval prior to the course final examination date. Requests are accepted at the instructor’s discretion, provided your reasons are justified and that 80% of your work has already been completed. Your written request should be regarded as a contract between you and the instructor and must specify the date for completion of work. This date must be at least two weeks prior to the university deadline for changing incompletes to letter grades.

Grading Scale

- A = 93-100%
- A- = 90-92%
- B+ = 88-89%
- B = 80-87%
- C = 70-79%
- F = Below 70%

### Professionalism and GMU Policies

- Attendance for each class is necessary – please contact the professor BEFORE any absence.
- Learning depends on the active engagement of the participant and frequent checking by the instructor as to the progress of the learner. Smaller assignments will be given as necessary in class in order to inform your learning and my teaching. Your participation in these assignments is essential to valuable class discussions and will help to “chunk” the large assignments into smaller, more attainable learning goal. Your classmates depend on your comments to extend their learning.

### Core Values Commitment

The College of Education and Human Development is committed to collaboration, ethical leadership, innovation, research-based practice, and social justice. Students are expected to adhere to these principles: [http://cehd.gmu.edu/values/](http://cehd.gmu.edu/values/).

### GMU Policies and Resources for Students

**Policies**

- Students must adhere to the guidelines of the Mason Honor Code (see [https://catalog.gmu.edu/policies/honor-code-system/](https://catalog.gmu.edu/policies/honor-code-system/)).
- Students must follow the university policy for Responsible Use of Computing (see [http://universitypolicy.gmu.edu/policies/responsible-use-of-computing/](http://universitypolicy.gmu.edu/policies/responsible-use-of-computing/)).
• Students are responsible for the content of university communications sent to their Mason email account and are required to activate their account and check it regularly. All communication from the university, college, school, and program will be sent to students solely through their Mason email account.
• Students with disabilities who seek accommodations in a course must be registered with George Mason University Disability Services. Approved accommodations will begin at the time the written letter from Disability Services is received by the instructor (see https://ds.gmu.edu/).
• Students must silence all sound emitting devices during class unless otherwise authorized by the instructor.

Campus Resources
• Support for submission of assignments to Tk20 should be directed to tk20help@gmu.edu or https://cehd.gmu.edu/aero/tk20. Questions or concerns regarding use of Blackboard should be directed to http://coursessupport.gmu.edu/.
• For information on student support resources on campus, see https://ctfe.gmu.edu/teaching/student-support-resources-on-campus

For additional information on the College of Education and Human Development, please visit our website https://cehd.gmu.edu/students/.

Online Resources

Other Resources

**Campus Resources**
- For information on student support resources on campus, see [https://ctfe.gmu.edu/teaching/student-support-resources-on-campus](https://ctfe.gmu.edu/teaching/student-support-resources-on-campus)

**Emergency Procedures**
You are encouraged to sign up for emergency alerts by visiting the website [https://alert.gmu.edu](https://alert.gmu.edu). There are emergency posters in each classroom explaining what to do in the event of crises. Further information about emergency procedures exists on [http://www.gmu.edu/service/cert](http://www.gmu.edu/service/cert).

**Sustainability**
George Mason University is focusing on making our community “greener” and reducing the impact on the environment. This course will contribute to this effort in the following ways. I hope that you will create other ways to contribute to contribute to this effort.

- Handouts will be available electronically through the Blackboard platform
- All assignments will be submitted through the blackboard on a Wiki site established for each individual student.
- You should consider reducing waste in your teaching practice (ex: unnecessary paper) and in developing your unit plan
- Incorporate teaching sustainability in the content of your lesson plans (for example, human’s role in reducing their impact on the environment.) Think about what the next generation needs to know about “greening”.

For additional information on the College of Education and Human Development, Graduate School of Education, please visit our website [See http://gse.gmu.edu/](http://gse.gmu.edu/).
Graduate School of Education Dispositions for A Career Educator

Students are expected to exhibit professional behavior and dispositions. The Virginia Department of Education and the National Council for Accreditation of Teacher Education promote standards of professional competence and dispositions. Dispositions are values, commitments, and professional ethics that influence behaviors toward students, families, colleagues, and all members of the learning community. The Graduate School of Education expects students, faculty, and staff to exhibit professional dispositions through a:

I. Commitment to the profession
   • Promoting exemplary practice
   • Excellence in teaching and learning
   • Advancing the profession
   • Engagement in partnerships

II. Commitment to honoring professional ethical standards
   • Fairness
   • Honesty
   • Integrity
   • Trustworthiness
   • Confidentiality
   • Respect for colleagues and students

III. Commitment to key elements of professional practice
    • Belief that all individuals have the potential for growth and learning
    • Persistence in helping individuals succeed
    • High standards
    • Safe and supportive learning environments
    • Systematic planning
    • Intrinsic motivation
    • Reciprocal, active learning
    • Critical thinking
    • Thoughtful, responsive listening
    • Active, supportive interactions
    • Technology-supported learning
    • Research-based practice
    • Respect for diverse talents, abilities, and perspectives
    • Authentic and relevant learning

IV. Commitment to being a member of a learning community
    • Professional dialogue
    • Self-improvement
    • Collective improvement
    • Reflective practice
    • Responsibility
    • Flexibility
    • Collaboration
    • Continuous, lifelong learning

V. Commitment to democratic values and social justice
    • Understanding systemic issues that prevent full participation
    • Awareness of practices that sustain unequal treatment or unequal voice
    • Advocate for practices that promote equity and access
    • Respects the opinion and dignity of others
    • Sensitive to community and cultural norms
    • Appreciates and integrates multiple perspectives

GO TO THE FOLLOWING WEBSITE, DOWNLOAD SIGN AND PROVIDE THE FOLLOWING DOCUMENT AGREEING TO DEMONSTRATE THE ABOVE PROFESSIONAL DISPOSITIONS:
http://cehd.gmu.edu/assets/docs/cehd/Dispositions%20for%20a%20Career%20Educator.pdf
IMPORTANT INFORMATION FOR LICENSURE COMPLETION
Student Clinical Practice: Internship Requirements

Students – please note the following requirements for Spring 2018 internship applications. **No extensions to the application deadlines will be given for missing/incorrect/failing test scores, missing endorsements, or missing/incorrect CPR/AED/First Aid certifications.**

**Testing**
Beginning with Spring 2015 internships, **all official and passing test scores** must be submitted and in the Mason system (i.e. Banner/PatriotWeb) by the internship application deadline. **Allow a minimum of six weeks for official test scores to arrive at Mason. Testing too close to the application deadline means scores will not arrive in time and the internship application will not be accepted.**

**Required tests:**
- Praxis Core Academic Skills for Educators Tests (or qualifying substitute)
- VCLA
- Praxis II (Content Knowledge exam in your specific endorsement area)

For details, please check [http://cehd.gmu.edu/teacher/test/](http://cehd.gmu.edu/teacher/test/)

**Endorsements**
Please note that ALL endorsement coursework must be completed, with all transcripts submitted and approved by the CEHD Endorsement Office, prior to the internship application deadline. Since the internship application must be submitted in the semester prior to the actual internship, please make an appointment to meet with the Endorsement Specialist and plan the completion of your Endorsements accordingly.

**CPR/AED/First Aid**
Beginning with spring 2015 internships, verification that the Emergency First Aid, CPR, and Use of AED Certification or Training requirement must be submitted and in the Mason system (i.e. Banner/PatriotWeb) by the application deadline. Students must submit one of the "acceptable evidence" documents listed at [http://cehd.gmu.edu/teacher/emergency-first-aid](http://cehd.gmu.edu/teacher/emergency-first-aid) to CEHD Student and Academic Affairs. In order to have the requirement reflected as met in the Mason system, documents can be scanned/e-mailed to internsh@gmu.edu or dropped-off in Thompson Hall, Suite 2300.

**DYSLEXIA AWARENESS TRAINING – NEW requirement for licensure!**
Effective July 1, 2017, every person seeking initial licensure or renewal of a license shall complete awareness training, provided by VDOE, on the indicators of dyslexia, as that term is defined by the board and regulations, and the evidence-based interventions and accommodations for dyslexia. The training module is located at [http://www.doe.virginia.gov/teaching/licensure/dyslexia-module/story.html](http://www.doe.virginia.gov/teaching/licensure/dyslexia-module/story.html). Similar to the Child Abuse Prevention Module, students will need to save and print out the completion certificate at the end of the module.

**Background Checks/Fingerprints**
All local school systems require students to complete a criminal background check through their human resources office (not through George Mason University) **prior to beginning the internship.** Detailed instructions on the process will be sent to the student from either the school system or Mason. Students are **strongly advised** to disclose any/all legal incidents that may appear on their records. The consequence of failing to do so, whether or not such incidents resulted in conviction, is termination of the internship.

**Please Note:** Your G-Number must be clearly noted (visible and legible) on the face of the document(s) that you submit.
**Application:** The internship application can be downloaded at [https://cehd.gmu.edu/epo/student-internship](https://cehd.gmu.edu/epo/student-internship)

**Deadlines:**

- **Spring internship application:**
  - Traditional: September 15
  - On-the Job: November 1

- **Fall internship application:**
  - Traditional: February 15
  - On-the Job: May 1

If you have any questions about the above requirements, don’t wait - please contact your advisor or the Clinical Practice Specialist at internsh@gmu.edu. Please be sure to include your G# and program/content area information in your email.

**This communication to you, including all requirements and deadlines, will be referenced upon receipt of any request for application deadline extension.**
