Early Childhood Education

ECED 505.D01 Introduction to Early Childhood Special Education
3 Credits, Summer 2020
06/01/2020 – 08/08/2020, Fully Online

Faculty

Name: Christan Coogle, PhD
Office Hours: By Appointment
Office Location: Thompson Hall 1252, Fairfax Campus
Office Phone: 703-993-2377
Email Address: ccoogle@gmu.edu

Prerequisites/Corequisites

None

University Catalog Course Description

Surveys current knowledge about young children with disabilities within the context of human growth and development and learning expectations in the preschool years. Includes historical factors and legislation affecting service delivery. Notes: Field experience required.

Course Delivery Method

This course will be delivered online (76% or more) using an asynchronous format via Blackboard Learning Management system (LMS) housed in the MyMason portal. You will log in to the Blackboard (Bb) course site using your Mason email name (everything before @masonlive.gmu.edu) and email password. The course site will be available on June 1, 2020.

Under no circumstances, may candidates/students participate in online class sessions (either by phone or Internet) while operating motor vehicles. Further, as expected in a face-to-face class meeting, such online participation requires undivided attention to course content and communication.

Technical Requirements

To participate in this course, students will need to satisfy the following technical requirements:

- High-speed Internet access with standard up-to-date browsers. To get a list of Blackboard's supported browsers see https://help.blackboard.com/Learn/Student/Getting_Started/Browser_Support#supported-browsers
To get a list of supported operation systems on different devices see https://help.blackboard.com/Learn/Student/Getting_Started/Browser_Support#tested-devices-and-operating-systems

- Students must maintain consistent and reliable access to their GMU email and Blackboard, as these are the official methods of communication for this course.
- Students will need a headset microphone for use with the Blackboard Collaborate web conferencing tool.
- Students may be asked to create logins and passwords on supplemental websites and/or to download trial software to their computer or tablet as part of course requirements.
- The following software plug-ins for PCs and Macs, respectively, are available for free download:
 - Adobe Acrobat Reader: <https://get.adobe.com/reader/>
 - Windows Media Player: <https://support.microsoft.com/en-us/help/14209/get-windows-media-player>
 - Apple Quick Time Player: www.apple.com/quicktime/download/

Expectations

- Course Week: Because asynchronous courses do not have a “fixed” meeting day, our week will start on Monday, and finish on Sunday. Our course week will begin on the day that our synchronous meetings take place as indicated on the Schedule of Classes.
- Log-in Frequency: Students must actively check the course Blackboard site and their GMU email for communications from the instructor, class discussions, and/or access to course materials at least 4 times per week.
- Participation: Students are expected to actively engage in all course activities throughout the semester, which includes viewing all course materials, completing course activities and assignments, and participating in course discussions and group interactions.
- Technical Competence: Students are expected to demonstrate competence in the use of all course technology. Students who are struggling with technical components of the course are expected to seek assistance from the instructor and/or College or University technical services.
- Technical Issues: Students should anticipate some technical difficulties during the semester and should, therefore, budget their time accordingly. Late work will not be accepted based on individual technical issues.
- Workload: Please be aware that this course is **not** self-paced. Students are expected to meet *specific deadlines* and *due dates* listed in the **Class Schedule** section of this syllabus. It is the student’s responsibility to keep track of the weekly course schedule of topics, readings, activities and assignments due.
- Instructor Support: Students may schedule a one-on-one meeting to discuss course requirements, content, or other course-related issues. Those unable to come to a Mason campus can meet with the instructor via telephone or web conference. Students should email the instructor to schedule a one-on-one session, including their preferred meeting method and suggested dates/times.
- Netiquette: The course environment is a collaborative space. Experience shows that even an innocent remark typed in the online environment can be misconstrued. Students must always re-read their responses carefully before posting them, so as others do not consider them as personal offenses. *Be positive in your approach with others and diplomatic in selecting your words.* Remember that you are not competing with classmates, but sharing

information and learning from others. All faculty are similarly expected to be respectful in all communications.

- Accommodations: Online learners who require effective accommodations to ensure accessibility must be registered with George Mason University Disability Services.

Learner Outcomes or Objectives

This course is designed to enable students to do the following:

1. Describe the nature and characteristics of major disabling and at-risk conditions for young children, including children with diverse cultural, linguistic, and socioeconomic backgrounds.
2. Describe the services and pathways for service delivery for children birth through age five with disabling and at-risk conditions, including methods for instructional services and programs, curriculum development, and tiered instruction.
3. Provide an overview of early intervention and early childhood special education programs.
4. Describe the historical perspective and philosophical and sociological foundations underlying the role, development, and organization of special education in the United States.
5. Discuss legislation and legal aspects associated with students with disabilities, including legislative and judicial mandates related to education and special education (e.g., the Individuals with Disabilities Education Act, § 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act) and legal decisions related to person with disabilities and explain how it intersects with current issues and influences professional practice.
6. Describe current regulations and procedures governing special education to include Individualized Education Program (IEP), Individualized Family Service Plan (IFSP), Functional Behavior Assessment (FBA), and Behavior Intervention Plan (BIP) development.
7. Describe the development process of IEPs and IFSPs, including case management, collaboration, co-teaching, interagency coordination, inclusive practices, least restrictive environment, and transition.
8. Describe disciplinary practices, policies, and procedures, and alternative placements in schools in relation to young children with disabling conditions and at-risk conditions.
9. Describe the role of assessment in identification, eligibility, service delivery, and program development/improvement for young children and their families, including children and families with diverse cultural and linguistic backgrounds.
10. Describe effective strategies for training, managing, and monitoring paraprofessionals.
11. Summarize research on the nature and characteristics of specific disabling and at-risk conditions, to include diverse approaches based upon culturally responsive behavioral, cognitive, affective, social, and ecological theory and practice.
12. Exhibit standards of professionalism, ethical standards, and personal integrity with children, families, and professionals in the field experience setting (e.g., early intervention, home-based, school-based, community-based) and in interactions with classmates, the instructor, the field experience coordinator, and others.
13. Use writing as an instructional and assessment tool to generate, gather, plan, organize, and to communicate for a variety of purposes; integrate correct written conventions (i.e., grammar, usage, mechanics, and spelling); and format using current APA style.

Professional Standards – Virginia Professional Studies Competencies, Virginia Early Childhood Special Education Endorsement Competencies, Virginia Early/Primary Education

PreK-3 EPK3 Endorsement Competencies, Interstate Teacher Assessment and Support Consortium (InTASC) Standards, Council of Exceptional Children (CEC) and Division of Early Childhood (DEC) Standards, and National Association for the Education of Young Children (NAEYC) Standards

Upon completion of this course, students will have met the following professional standards:

Virginia Professional Studies Competencies

Supervised Clinical Experiences

Virginia Early Childhood Special Education Endorsement Competencies

Nature and Characteristics of Major Disabling and At-Risk Conditions

Foundations of Legal Aspects

Standards of Professionalism

Supervised Experiences

CEC Standard Elements

CEC 6.2 Beginning special education professionals understand how foundational knowledge and current issues influence professional practice.

CEC 6.4 Beginning special education professionals understand the significance of lifelong learning and participate in professional activities and learning communities.

CEC 7.2 Beginning special education professionals serve as a collaborative resource to colleagues.

NAEYC Standard Elements

NAEYC 6a Identifying and involving oneself with the early childhood profession

Course Performance Evaluation

Students are expected to submit all assignments on time in the manner outlined by the instructor (e.g., Blackboard (Bb), Tk20, hard copy).

Assignment	Due Date	Points
Attendance and Participation <ul style="list-style-type: none"> • Participation activities • Chapter presentations and discussions 	Ongoing	25

- **Assignments and/or Examinations**

Virtual Field Experience (20 points)

This course requires a minimum of 15 hours of a virtual field experience. You will use resources provided by the instructor to observe a variety of early childhood special education environments including classrooms, communities, and homes. Each video you watch should be documented using the field experience documentation form.

Documenting the Virtual Field Experience (5 points)

Upon completion of their virtual field experience hours, students will provide documentation of their experience by identifying each of the video titles and the amount of time each video lasted on the field experience form.

Virtual Field Experience Observation and Reflection (15 points)

Students will develop a four- to five-page report that discusses their observations during the virtual field experience:

- What observations did you make regarding the following:
 - How was the environment physically arranged?
 - How was UDL used?
 - How was tiered instruction used?
 - How were embedded learning opportunities used?

- What centers were present?
- What visual information was present? Was it too little or too much?
- What were the adults and peers doing?
- What routines did you observe?
- What types of opportunities did you observe to develop cognitive, language, social and emotional, fine motor, gross motor, and adaptive/self-help skills?
- What accommodations or adaptations did you observe for children with disabilities?
- What would you do similarly and differently from the videos you watched? Consider the following areas:
 - Routines
 - Environmental arrangement
 - Provision of opportunities to develop skills across all the domains
 - Availability of accommodations/adaptations for children with disabilities
 - Inclusion of culturally and linguistically responsive materials and practice
 - Opportunity for inclusive practices

Students will cite current research from the course textbook, class discussions and handouts, and/or other relevant peer-reviewed sources to support the information they provide. They will use in-text citations and include a reference list.

Professional Practice Project (55 points)

This assignment must be submitted to Tk20 through Blackboard.

Students will work with a professional learning community (PLC) of three to four students as they complete the professional practice project described below for their case-study child.

Part 1: Foundational Knowledge and Current Issues Paper (10 points)

Students will write a three- to four-page, double-spaced paper explaining the historical, philosophical, and sociological foundations of special education. This paper will include the following:

- A brief discussion of the history of special education;
- A general discussion of the history of seminal special education legislation, including PL 94-142, PL 99-457, the Rehabilitation Act, and the American with Disabilities Act;
- Current legislation (IDEA) that guides IEP development and the provision of special education services; and
- Ethical standards and evidence-based practices for the special education field.

They will cite information from the course textbook, class discussions and handouts, and/or other relevant peer-reviewed sources to support the information they provide. They will use in-text citations and include a reference list per APA style guidelines.

Part 2: Accessing Professional Resources (10 points)

Students will collaborate with their PLC to identify resources to support writing an IEP for the assigned case study child. Members of the PLC will collaborate to ensure that each member selects different articles, organizations, and online resources from one another. Each student will write a summary for each of the identified resources and submit the summaries to Blackboard by the due date. Specifically, these resources will include the following:

- A two-page, double-spaced summary of *each* teacher-friendly, evidence-based article (may be identified through Mason online library databases or www.eric.ed.gov) related to the assigned case-study child's learning needs. Students will submit summaries of two different articles.
- A one-page, double-spaced summary of an organization that educators and families can access for information and/or support specifically related to the case-study child.
- A one-page, double-spaced summary of an online resource that educators and families can access for information and/or support. Students will submit a summary of one online resource.

The double-spaced paper that each student submits to Blackboard will include (a) a title page; introduction identifying the article(s), organization, and online resource; (b) a two-page summary of each article(s); (c) a one-page summary of the organization; (d) a one-page summary of the online resource; and (e) a conclusion that briefly discusses how these materials assist early childhood special educators in their practice. Students will cite the articles using APA formatting guidelines and include a reference list.

In class, students will share/discuss key information about their article(s), organization, and online resource with their PLC. The PLC will compile all of the individual summaries and post to a Blackboard Discussion Forum set up by the instructor to share with the entire class.

Part 3: IEP Writing: Serving as a Professional Resource (25 points)

Collaboratively, students will write an IEP for the assigned case-study child with their PLC using the IEP form posted to Blackboard. The IEP will include the following (see Deiner, 2013, p. 113 and <http://idea.ed.gov>):

- Case-study child's present level of performance that includes a detailed discussion of the child's family, medical history, previous early intervention and/or educational services, family's cultural and/or linguistic background, and the child's strengths and areas of need across the developmental domains
- Measurable annual goals; ensure at least one goal address a behavior and/or social emotional area of need
- Special education and related services
- Projected time frame for services
- Expected participation with children without disabilities and explanations of the extent to which the case study child is not participating with children without disabilities (least restrictive environment statement)
- Accommodations and modifications

PLC members will include their names on the front of the IEP form. Each student will submit the IEP through Blackboard.

Part 4: Professional Learning (10 points)

Students will write a three- to four-page, double-spaced reflection on professional learning. This paper will include a discussion of the following:

- How the PLC met and collaborated (e.g., in person, online, through Blackboard groups);

- How the members worked together to research articles, organizations, and online resources to collaborate and develop an IEP;
- How resources such as articles, organizations, and online resources support special educators in their practice;
- How collaborating with peers in a PLC assisted them in writing an IEP;
- The strengths and challenges they may encounter when working with other professionals to accomplish a goal, including examples of their experiences with their PLC that illustrate their strengths and challenges;
- How collaborating and engaging in professional learning illustrates professional ethics and standards; and
- The importance of engaging in lifelong learning and involving themselves in the early childhood education field.

They will support their discussion with in-text citations from the textbook, CEC professional ethics and standards, class readings, class presentations and handouts, and other peer-reviewed sources. They will include a reference list using APA formatting guidelines.

- **Other Requirements**

Attendance and Participation (25 points)

Because active participation and engagement are imperative for optimal learning, preparation for and participation in in-class and online activities will be evaluated based on the following criteria:

- Completion and accuracy of weekly participation activities
- Professional learning community chapter summaries and discussions
 - Students will work with their professional learning community groups each week. They will rotate responsibility for creating videos that summarize their assigned chapter reading. The summary should be in the group member's own words, should be approximately 5-10 minutes, and it should include one discussion question for fellow group members to respond. All group members must create two responses for each chapter.
- Students attend class, arrive on time, and stay for the entire class period.
- Students use laptops and personal devices for instructional purposes only.
- Students complete readings and prepare for class activities prior to class as evidenced by their ability to discuss and write about the concepts presented and examined in the texts as well as participate fully in related activities.
- Students are actively involved in in-class and online learning experiences as evidenced by (a) participating in all activities, (b) engaging in small- and large-group discussions, (c) completing written work related to the activities, and (d) supporting the participation and learning of classmates.
- Students show evidence of critical reflective thinking through in-class and online discussions, activities, and written reflections.
- Students display professional dispositions at all times while interacting with the instructor and other students.
- Students complete participation activities across the semester that complement the scheduled course topic. Instructors will periodically collect artifacts from the activities. Students in

attendance and who actively engage in the learning experience will receive credit for their efforts. Graded participation activities are not announced and are implemented at the discretion of the instructor.

Written Assignments

All formal written assignments will be evaluated for content and presentation. The American Psychological Association, Seventh Edition (APA) style will be followed for all written work. All written work unless otherwise noted must be completed on a word processor and should be proofread carefully. (Use spell check!) If students are not confident of their own ability to catch errors, they should have another person proofread their work. When in doubt, they should check the APA manual. Students may consult the Writing Center for additional writing support.

Students will do the following:

1. Present ideas in a clear, concise, and organized manner. (Avoid wordiness and redundancy.)
2. Develop points coherently, definitively, and thoroughly.
3. Refer to appropriate authorities, studies, and examples to document where appropriate. (Avoid meaningless generalizations, unwarranted assumptions, and unsupported opinions.)
4. Use correct capitalization, punctuation, spelling, and grammar.
5. Type the paper with double spacing, indented paragraphs, 1-inch margins all around, and 12-point Times New Roman font.

• Grading

A = 95-100 A- = 90-94 B+ = 87-89 B = 80-86 C = 70-79 F = <70

Incomplete (IN): This grade may be given to students who are passing a course but who may be unable to complete scheduled coursework for a cause beyond reasonable control.

All CEHD students are held to the university grading policies as described in the Academic Policies section of the current catalog, which can be accessed at <http://catalog.gmu.edu>. Those students seeking Virginia initial teaching licensure must earn a B- or better in all graduate licensure coursework.

Professional Dispositions

Students are expected to exhibit professional behaviors and dispositions at all times. See <https://cehd.gmu.edu/students/policies-procedures/>.

Class Schedule

Date	Topics	Readings
Week 1 June 1-7	Syllabus and Assignments Review Setting up the Field Experience Standards of professionalism, ethical standards, personal integrity The Early Childhood Special Education Profession <ul style="list-style-type: none"> • Collaboration, co-teaching • Coordination • Inclusive practices and least restrictive environment Lifelong learning	Syllabus Review course website Deiner, Ch 1, 2 <u>Recommended Readings</u> Gargiulo & Kilgo, Ch 1

Core Values Commitment

The College of Education and Human Development is committed to collaboration, ethical leadership, innovation, research-based practice, and social justice. Students are expected to adhere to these principles: <http://cehd.gmu.edu/values/>.

GMU Policies and Resources for Students

Policies

- Students must adhere to the guidelines of the Mason Honor Code (see <https://catalog.gmu.edu/policies/honor-code-system/>).
- Students must follow the university policy for Responsible Use of Computing (see <https://universitypolicy.gmu.edu/policies/responsible-use-of-computing/>).
- Students are responsible for the content of university communications sent to their Mason email account and are required to activate their account and check it regularly. All communication from the university, college, school, and program will be sent to students **solely** through their Mason email account.
- Students with disabilities who seek accommodations in a course must be registered with George Mason University Disability Services. Approved accommodations will begin at the time the written letter from Disability Services is received by the instructor (see <http://ds.gmu.edu/>).
- Students must follow the university policy stating that all sound emitting devices shall be silenced during class unless otherwise authorized by the instructor.

Campus Resources

- Support for submission of assignments to Tk20 should be directed to tk20help@gmu.edu or <https://cehd.gmu.edu/aero/tk20>. Questions or concerns regarding use of Blackboard should be directed to <https://its.gmu.edu/knowledge-base/blackboard-instructional-technology-support-for-students/>.
- For information on student support resources on campus, see <https://ctfe.gmu.edu/teaching/student-support-resources-on-campus>.

Notice of mandatory reporting of sexual assault, interpersonal violence, and stalking: As a faculty member, I am designated as a “Responsible Employee,” and must report all disclosures of sexual assault, interpersonal violence, and stalking to Mason’s Title IX Coordinator per University Policy 1202. If you wish to speak with someone confidentially, please contact one of Mason’s confidential resources, such as Student Support and Advocacy Center (SSAC) at 703-380-1434 or Counseling and Psychological Services (CAPS) at 703-993-2380. You may also seek assistance from Mason’s Title IX Coordinator by calling 703-993-8730, or emailing titleix@gmu.edu.

For additional information on the College of Education and Human Development, please visit our website: <http://cehd.gmu.edu>.

Evaluation Guide

Professional Practice Project				
	Exceeds	Meets	Approaches	Does Not Meet
Part 1: Foundational Knowledge and Current Issues				
CEC 6.2 Understand how foundational knowledge and current issues influence professional practice.	Student met expectations and individually provided an in-depth explanation, using appropriate citations, of how foundational knowledge and current issues influenced the development of the IEP.	Student individually explained, using appropriate citations, how foundational knowledge and current issues influenced the development of the IEP.	Student individually attempted to explain using citations how foundational knowledge and current issues influenced the development of the IEP. However, student did not fully develop the explanation of the influences on the development of the IEP and/or cite appropriate resources.	Student did not develop an IEP that met IDEA requirements and did not explain how foundational knowledge and current issues influenced the development of the IEP.

	Exceeds	Meets	Approaches	Does Not Meet
Parts 2 & 3: Accessing Resources and Serving as a Professional Resource				
CEC 7.2 Beginning special education professionals serve as a collaborative resource to colleagues.	Student met criteria and showed clear evidence of taking into account the child's family background and preferences while writing the IEP.	Student served as a professional resource by accessing and sharing information while collaboratively developing an IEP that meets IDEA requirements, uses language easily understood by family members, and takes into account the child's linguistic and cultural background as well as the child's individual development and learning strengths and needs. Student included at least one goal that addressed a behavior and/or social emotional area of need. Student shared relevant and current reader-friendly summaries of professional resources (i.e., teacher-friendly articles, professional organizations, and online resources).	Student served as a professional resource by accessing and sharing information. Student collaboratively attempted to develop an IEP that meets IDEA requirements and uses language understood by family members. However, the IEP lacked some information and/or did not fully take into account the child's linguistic and cultural background as well as the child's individual development and learning strengths and needs.	Student did not serve as a professional resource.
