ECED 511.001 Assessment of Diverse Young Learners
3 Credits, Fall 2021
8/23/2021–12/15/2021, Thursdays/ 4:30–7:10 pm
Thompson Hall 2021, Fairfax Campus

Faculty

Name: Samita B. Arora, PhD.
Office Hours: By appointment
Office Location: Thompson Hall 1200, Fairfax Campus
Office Phone: 703-993-3844
Email Address: sarora6@gmu.edu

Prerequisites

ECED 401 or 501 and ECED 403 or 503
Prerequisites require a minimum grade of C for undergraduate courses and B- for graduate courses.

University Catalog Course Description

Examines types of assessment, including family-centered child assessment, for planning and implementing effective programs for culturally, linguistically, and ability diverse children, birth through third grade. Addresses selection, administration, analysis, and interpretation of formal and informal assessments. Notes: Field experience required.

Course Delivery Method

This course will be delivered using a lecture/discussion format and Blackboard (Bb).

Learner Outcomes or Objectives

This course is designed to enable students to do the following:

1. Use knowledge of measurement principles and practices to create, select, and implement valid and reliable classroom- and curriculum-based assessments of student learning for instructional planning, including formative and summative assessments that minimize bias, evaluate student performance, are designed and adapted to meet the needs of diverse young learners, and are used for instructional planning purposes.
2. Analyze and interpret formal and informal and formative and summative assessment results to diagnose needs, record student progress, measure attainment of essential skills in a standards-based environment, inform ongoing planning and instruction, and contribute to program development and improvement for diverse young learners.
3. Select, administer, and interpret formal and informal assessment techniques for young children with disabling and at-risk conditions, including the eligibility and diagnosis of disabling and at-risk conditions.
4. Explain the goals, benefits, and uses of assessment and the relationships among assessment, instruction, and monitoring student progress, including the role of assessment in (a) the

development of appropriate goals; (b) planning and implementation of curriculum and instruction; (c) making decisions about how to improve instruction and student performance; (d) grading; and (e) progress monitoring reports to document learner growth as compared to same-age, typically developing peers and functioning in environments where same-age peers would attend, including settings that families choose.

5. Identify assessment and curricular practices that help students understand their own progress and growth.
6. Describe state assessment programs and accountability systems, including assessments used for student achievement goal setting as related to teacher evaluation and determining student academic progress.
7. Explain legal and ethical aspects of assessment and demonstrate skills for developing familiarity with assessments used in PreK-12 education (including diagnostic, college admission exams, industry certifications, placement assessments).
8. Describe ways to partner with families and professional colleagues to assess young children and build effective learning environments.
9. Develop instructional plans informed by assessment results that use technology as a tool for teaching, learning, research, and/or communication to enhance learning outcomes for diverse young learners.
10. Analyze, evaluate, and apply qualitative and quantitative data to produce a case study report that holistically describes a child's performance across developmental domains and provides insight into curricular experiences for continued growth and use technology for learning, research, and communication.
11. Exhibit standards of professionalism, ethical standards, and personal integrity with children, families, and professionals in the field experience setting and in interactions with classmates, the instructor, the field experience coordinator, and others.
12. Reflect on diverse assessment practices and purposes and consider how assessments may be modified to meet the evolving needs of learners.

Professional Standards – Interstate Teacher Assessment and Support Consortium (InTASC) Standards, Division of Early Childhood (DEC) Professional Preparation Standards, National Association for the Education of Young Children (NAEYC) Professional Standards and Competencies, and Virginia Professional Studies Competencies

Upon completion of this course, students will have met the following professional standards:

DEC Professional Preparation Standards

DEC 4.1 Candidates understand the purposes of formal and informal assessment, including ethical and legal considerations, and use this information to choose developmentally, culturally and linguistically appropriate, valid, reliable tools and methods that are responsive to the characteristics of the young child, family, and program.

DEC 4.2 Candidates develop and administer informal assessments and/or select and use valid, reliable formal assessments using evidence-based practices, including technology, in partnership with families and other professionals.

DEC 4.3 Candidates analyze, interpret, document, and share assessment information using a strengths-based approach with families and other professionals.

NAEYC Professional Standards and Competencies

NAEYC 1a Understand the developmental period of early childhood from birth through age 8 across physical, cognitive, social and emotional, and linguistic domains, including bilingual/multilingual development.

NAEYC 3a Understand that assessments (formal and informal, formative and summative) are conducted to make informed choices about instruction and planning in early learning settings.

NAEYC 3b Know a wide range of types of assessments, their purposes, and their associated methods and tools.

NAEYC 3c Use screening and assessment tools in ways that are ethically grounded and developmentally, ability, culturally, and linguistically appropriate in order to document developmental progress and promote positive outcomes for each child.

NAEYC 3d Build assessment partnerships with families and professional colleagues.

- **Assignments and/or Examinations**

Field Experience (5 points)

This course requires a minimum of 15 hours field experience in an early childhood education environment (home-based, school-based, and community-based settings) with diverse young children (prekindergarten, kindergarten, first grade, second grade, or third grade). To initiate this assignment, students will visit <https://cehd.gmu.edu/endorse/ferf> and complete the Online Field Experience Registration. On the form, students will be asked to indicate how their placement will be arranged. Students have two options for fulfilling their field placement requirement.

Option 1:

- Students may arrange their own field experience if they are a full-time contracted school system employee and are able to complete their field experience at their workplace.
- Students will need to have access to observing and selecting a focus child. Their focus child needs to be either currently receiving early childhood special education services in a setting that supports children birth through age five *or* the child is currently enrolled in a prekindergarten, kindergarten, first, second, or third grade general education setting.
- Students will need to be able to complete the **Individual Child Assessment Project** with their focus child.

Option 2:

- Students may request placement in a early childhood special education setting *or* a **prekindergarten**, kindergarten, first, second, or third grade general education setting through the field placement office <https://cehd.gmu.edu/endorse/ferf>.
- The field placement office will arrange a placement for students in a specific school with a specific teacher.
- Students will need to be able to complete the **Individual Child Assessment Project** with their focus child.

Documenting the Field Experience (5 points)

- Students will upload the ***Field Experience Placement Approval Form***. In this form, which is available on Bb, they will provide a statement confirming that they have completed the [Online Field Experience Registration](#) and they will provide information to the instructor about where and how they will complete the field experience (*1 point*).
- Upon completion of their field experience hours, students will provide documentation of their experience (*4 points*).
 - If students complete the field experience within their own setting, they will upload the ***On-the-Job Placement Documentation Form*** to Blackboard. This form is available on Bb and requires verification from the principal or supervisor on site.
 - If students attended a field placement other than where they work, they will upload the ***Field Experience Documentation Form*** to Blackboard. This form is available on Bb and requires verification from the mentoring teacher on site.

Students will exhibit standards of professionalism, ethical standards, and personal integrity throughout the Field Experience process with the instructor, field experience coordinator, classroom teacher, students, administrators, etc. Students will refer to Blackboard for DEC Professional Preparation Standards and NAEYC Professional Standards and Competencies.

Individual Case Study Child Assessment Project (70 points, submitted in parts)

This assignment is a key assessment and must be submitted to VIA on Blackboard. It assesses DEC 4.1, 4.2, 4.3 and NAEYC 1a, 3a, 3b, 3c, and 3d.

Students will focus on their knowledge of formal and informal assessment strategies by selecting, implementing, and interpreting assessment results to guide educational decisions for diverse young children. In consultation with a classroom teacher and with parental permission, they will create an individual child assessment report for a child who has special learning needs (e.g., a child who is learning English; uses non-standard dialects; has a diagnosed disability; or has other developmental, behavioral, or learning differences). They will write a guiding principles paper to reflect on what they learned as they linked theory and research to practice.

Part 1: Introduction (10 points)

Students will introduce the child and describe the child's classroom and school context. Students will talk with the teacher and/or other professional(s), observe in the classroom, and consult the school website to gather information. In collaboration with the child's family, students will apply ethical and legal considerations to gather assessment information about their case study child. Students will compose a letter to the child's family to gain permission to work with their child for the assessment project. Students will invite the family to complete a developmentally, culturally and linguistically appropriate, valid, reliable survey that is responsive to the characteristics of the child, family, and program. Students will present and discuss the survey results as part of the introduction using strengths-based language. In the appendix, students will attach a copy of the following a) their invitation letter, b) family's consent, and c) completed survey.

Part 2: Assessments (15 points)

Students will select, develop, administer, and use four assessments (undergraduate) or five assessments (graduate) that were developed for teachers to use in their classrooms in order to document developmental progress and promote positive outcomes for each child to assess progress across physical, cognitive, social and emotional, and linguistic domains, including bilingual/multilingual development.

Assessments will include the following:

- A valid and reliable formal assessment,
- An observation
- An interest inventory,
- An assessment that takes place within an instructional interaction, and
- An additional assessment (required for graduate students / optional for undergraduate students).

These assessments will address the child's developmental progress across the cognitive, social and emotional, and linguistic domains, including bilingual/multilingual development and will include a variety of [evidence-based practices](#) to select and administer a variety of [valid and reliable](#) formal and informal assessment tools (e.g., activity protocol, checklist, event sampling, frequency counts, rating scale, rubrics, sociogram, and time sampling).

For each assessment, students will do the following:

- Describe the assessment, the purpose of the assessment, how it was administered, how technology was used (i.e., in documentation, assessment, and/or data collection), and how bias was minimized.
- Present the results of the assessment.
- Provide documentation of each assessment performed (e.g., anecdotal notes, observation checklists, work samples, audio, photos, survey data, formal assessment documents, etc.).

Part 3: Interpretation of Results (15 points)

Students will discuss the child's developmental progress in terms of interests, strengths, and learning needs across each of physical, cognitive, social and emotional, and linguistic domains, including bilingual/multilingual development. They will analyze, interpret, document, and share assessment information using a strengths-based approach to communicate the child's developmental progress with families and other professionals. Students will use assessment data from multiple sources to describe areas of educational strengths, learning needs, and articulate recommendations that are evidence-based and aligned with Virginia Standards of Learning and/or developmental milestones.

Part 4: Instructional and Assessment Plan (15 points)

Students will identify specific learning objectives linked to the results of the assessments. Based on data presented in the Child Assessment Report, students will develop one detailed instructional lesson plan designed to meet these objectives. The instructional lesson plan will (a) focus on one or more learning objective(s); (b) transparently support the child's learning and engagement across developmental domains; (c) include at least three evidence-based instructional strategies that address the identified learning objectives; (d) describe a technology

extension activity that utilizes digital resources to engage learners in higher-level learning using at least one of these higher-order skills – critical thinking, creativity, and collaborative problem solving; and (e) detail the formative and summative assessment practices and documentation artifacts gathered to demonstrate student performance as it relates to the specific learning objectives.

Students will use the *Instruction and Assessment Lesson Planning Template* to ensure all productive and reflective aspects of the lesson plan are complete. Embedded throughout the lesson plan, students will be prompted to provide rationales for the instructional and assessment decisions presented. Rationales should emphasize how the instructional decisions encourage positive child outcomes by promoting the child's development and learning, challenging the child to gain new competencies, and respecting the child's culture and individuality. Students will cite current research from program textbooks and/or other relevant peer reviewed sources to support their rationales. Students will use in-text citations and include a reference list per APA style guidelines.

Part 5: Guiding Principles for Assessment Practices Essay (15 points)

Students will write an essay about their guiding principles for assessment practices that discusses the goals, benefits, and uses of a variety of assessments, including its use in development of appropriate goals, curriculum, and teaching strategies for diverse young children. They will also discuss the role of developing assessment partnerships with families and colleagues to establish and maintain environments that promote learning. The students' guiding principles will represent their understanding of the practice of assessment in early childhood environments. Students will cite current research from the course textbook, class discussions and handouts, and/or other relevant sources to support their assertions. Students will use APA format to include in-text citations, appendices, and a reference list.

- **Other Requirements**

Attendance and Participation (25 points)

Because active participation and engagement are imperative for optimal learning, preparation for and participation in in-class and online activities will be evaluated based on the following criteria:

- Students attend class, arrive on time, and stay for the entire class period.
- Students use laptops and personal devices are to be used for instructional purposes only.
- Students complete readings and prepare for class activities prior to class as evidenced by their ability to discuss and write about the concepts presented and examined in the texts as well as participate fully in related activities.
- Students are actively involved in in-class and online learning experiences as evidenced by (a) participating in all activities, (b) engaging in small- and large-group discussions, (c) completing written work related to the activities, and (d) supporting the participation and learning of classmates.
- Students show evidence of critical reflective thinking through in-class and online discussions, activities, and written reflections.
- Students display professional dispositions at all times while interacting with the instructor and other students.

- Students complete participation activities across the semester that complement the scheduled course topic. Instructors will periodically collect artifacts from the activities. Students in attendance and who actively engage in the learning experience will receive credit for their efforts. Graded participation activities are not announced and are implemented at the discretion of the instructor.
- Students submit attendance and participation self-evaluation.

Written Assignments

All formal written assignments will be evaluated for content and presentation. The American Psychological Association, Seventh Edition (APA) style will be followed for all written work. All written work unless otherwise noted must be completed on a word processor and should be proofread carefully. (Use spell check!) If students are not confident of their own ability to catch errors, they should have another person proofread their work. When in doubt, they should check the APA manual. Students may consult the Writing Center for additional writing support.

Students will do the following:

1. Present ideas in a clear, concise, and organized manner. (Avoid wordiness and redundancy.)
2. Develop points coherently, definitively, and thoroughly.
3. Refer to appropriate authorities, studies, and examples to document where appropriate. (Avoid meaningless generalizations, unwarranted assumptions, and unsupported opinions.)
4. Use correct capitalization, punctuation, spelling, and grammar.
5. Type the paper with double spacing, indented paragraphs, 1-inch margins all around, and 12-point Times New Roman font.

- **Grading**

A = 95-100 A- = 90-94 B+ = 87-89 B = 80-86 C = 70-79 F = <70

Incomplete (IN): This grade may be given to students who are passing a course but who may be unable to complete scheduled coursework for a cause beyond reasonable control.

All CEHD students are held to the university grading policies as described in the Academic Policies section of the current catalog, which can be accessed at <http://catalog.gmu.edu>. Those students seeking Virginia initial teaching licensure must earn a B- or better in all graduate licensure coursework.

Professional Dispositions

Students are expected to exhibit professional behaviors and dispositions at all times. See <https://cehd.gmu.edu/students/policies-procedures>.

Core Values Commitment

The College of Education and Human Development is committed to collaboration, ethical leadership, innovation, research-based practice, and social justice. Students are expected to adhere to these principles: <http://cehd.gmu.edu/values/>.

GMU Policies and Resources for Students

Policies

- Students must adhere to the guidelines of the Mason Honor Code (see <https://catalog.gmu.edu/policies/honor-code-system/>).
- Students must follow the university policy for Responsible Use of Computing (see <https://universitypolicy.gmu.edu/policies/responsible-use-of-computing/>).
- Students are responsible for the content of university communications sent to their Mason email account and are required to activate their account and check it regularly. All communication from the university, college, school, and program will be sent to students **solely** through their Mason email account.
- Students with disabilities who seek accommodations in a course must be registered with George Mason University Disability Services. Approved accommodations will begin at the time the written letter from Disability Services is received by the instructor (see <http://ds.gmu.edu/>).
- Students must follow the university policy stating that all sound emitting devices shall be silenced during class unless otherwise authorized by the instructor.

Campus Resources

- Support for submission of assignments to Tk20 should be directed to tk20help@gmu.edu or <https://cehd.gmu.edu/aero/tk20>. Questions or concerns regarding use of Blackboard should be directed to <https://its.gmu.edu/knowledge-base/blackboard-instructional-technology-support-for-students/>.
- For information on student support resources on campus, see <https://ctfe.gmu.edu/teaching/student-support-resources-on-campus>.

Notice of mandatory reporting of sexual assault, interpersonal violence, and stalking: As a faculty member, I am designated as a “Responsible Employee,” and must report all disclosures of sexual assault, interpersonal violence, and stalking to Mason’s Title IX Coordinator per University Policy 1202. If you wish to speak with someone confidentially, please contact one of Mason’s confidential resources, such as Student Support and Advocacy Center (SSAC) at 703-380-1434 or Counseling and Psychological Services (CAPS) at 703-993-2380. You may also seek assistance from Mason’s Title IX Coordinator by calling 703-993-8730, or emailing titleix@gmu.edu.

For additional information on the College of Education and Human Development, please visit our website: <http://cehd.gmu.edu>.

Evaluation Guide

See Key Assessment Evaluation Guide Document.
