College of Education and Human Development
Division of Special Education and disAbility Research

Fall 2021
EDSE 540 672: Characteristics of Students with Disabilities who Access the General Curriculum
CRN: 86365, 3 – Credits

Instructor: Dr. Nicole Conners
Phone: 703-309-9232 (cell)
E-Mail: nconners@gmu.edu
Office Hours: By individual appointment. Please contact instructor.
Office Location: N/A

Meeting Dates: 9/16/2021 – 11/18/2021
Meeting Day(s): Thursdays
Meeting Time(s): 5:00 pm – 9:00 pm
*please do not enter classroom until 5:00 PM at Fairfax HS per the direction of FCPS.
Meeting Location: Off Campus, Fairfax HS, Room D-131, masks required at all times
Other Phone: N/A

Note: This syllabus may change according to class needs. Teacher Candidates/Students will be advised of any changes immediately through George Mason e-mail and/or through Blackboard.

Prerequisite(s):
None

Co-requisite(s):
None

Course Description
Examines the characteristics of students with mild disabilities. Focuses on etiology, contributing factors, conditions that affect learning, the challenges of identifying students with disabilities, and the need for academic, social, and emotional accommodations and support. Notes: Field experience required.

Advising Contact Information
Please make sure that you are being advised on a regular basis as to your status and progress in your program. Students in Special Education and Assistive Technology programs can contact the Special Education Advising Office at 703-993-3670 or speced@gmu.edu for assistance. All
other students should refer to their assigned program advisor or the Mason Care Network (703-993-2470).

**Advising Tip**
Have you met with an advisor? All students should make an appointment to meet with an advisor to outline a plan for completing coursework and non-course requirements such as testing. To make an appointment by phone or in person, go to http://education.gmu.edu/special-education/advising/.

**Course Delivery Method**
Learning activities include the following:
1. Class lecture and discussion
2. Application activities
3. Small group activities and assignments
4. Video and other media supports
5. Research and presentation activities
6. Electronic supplements and activities via Blackboard
7. IRIS Modules - Vanderbilt University

**Learner Outcomes**
Upon completion of this course, teacher candidates/students will be able to:
1. Describe the field of learning disabilities from its origins to policies and practices of today.
2. Compare the history of education for students with emotional and behavioral disorders, students with learning disabilities students with mild intellectual disabilities.
3. Define learning disability, emotional disturbance, and mild intellectual disabilities.
4. Describe how educators and other professionals determine the difference between normal and atypical behaviors.
5. Describe characteristics of K-12 students with learning disabilities, emotional disturbances, and/or mild intellectual disabilities.
6. Compare conceptual models of behavioral deficits with three conceptual models that explain learning disabilities and/or mild intellectual disabilities.
7. Discuss the various etiologies in relation to biological, family, cultural, and school perspectives.
8. Identify various procedures and practices that motivate reluctant learners to complete class work and develop skills that build self-understanding and confidence as learners.
9. Describe and discuss a range of learning disabilities, emotional disturbances, and mild intellectual disabilities for a parent and suggest possible interventions for home and school.
10. Describe how children develop language.
11. Describe informal assessment procedures for determining knowledge and skills of children with various learning disabilities and emotional/behavioral problems.
12. Based on informal assessment procedures, design appropriate clinical teaching strategies for children with various learning disabilities and/or behavior problems.
13. Describe what an Individualized Education Program (IEP) is and how it is developed.
Professional Standards
(Council for Exceptional Children [CEC] and the Interstate Teacher Assessment and Support Consortium [InTASC]). Upon completion of this course, students will have met the following professional standards: CEC Standard 1: Learner development and individual learning differences (InTASC 1,2); CEC Standard 2: Learning environments (InTASC 3); CEC Standard 3: Curricular content knowledge (InTASC 4,5); CEC Standard 4: Assessment (InTASC 6); CEC Standard 5: Instructional planning and strategies (InTASC 7,8) & CEC Standard 7: Collaboration (InTASC 10).

This course contains at least one Common Assessment developed by the College of Education and Human Development to assess our candidates' performance on nationally accepted standards for beginning teachers (InTASC) and our programs' performance on national accreditation standards (CAEP).

Evidence-Based Practices
This course will incorporate the evidence-based practices (EBPs) relevant to characteristics of students with mild disabilities, etiology of mild disabilities, inclusionary practices. Evidence for the selected research-based practices is informed by meta-analysis, literature reviews/synthesis, the technical assistance networks which provide web-based resources, and the national organizations whose mission is to support students with disabilities. We address both promising and emerging practices in the field of special education. This course will provide opportunities for teacher candidates/students to take an active, decision-making role to thoughtfully select, modify, apply, and evaluate EBPs in order to improve outcomes for students with disabilities.

Required Texts

Recommended Texts

Required Resources

Additional Readings
Varied articles and research studies from peer reviewed journals provided during class.

Course Performance Evaluation
Students are expected to submit all assignments on time in the manner outlined by the instructor (e.g., Blackboard, VIA, hard copy).

VIA Performance-Based Assessment Submission Requirement
It is critical for the special education program to collect data on how our students are meeting accreditation standards. Every teacher candidate/student registered for an EDSE course with a required Performance-based Assessment (PBA) is required to upload the PBA to VIA (regardless of whether a course is an elective, a one-time course or part of an undergraduate minor). A PBA is a specific assignment, presentation, or project that best demonstrates one or more CEC, InTASC or other standard connected to the course. A PBA is evaluated in two ways. The first is for a grade, based on the instructor's grading rubric. The second is for program accreditation purposes. Your instructor will provide directions as to how to upload the PBA to VIA.

For EDSE 540, the required PBA is Observation Student Profile. Please check to verify your ability to upload items to VIA before the PBA due date.

Assignments and/or Examinations
Performance-based Assessment
(VIA submission required)

Observation Student Profile (100 points) FINAL PAPER due Thursday, November 11 by 5:00 PM.

Students can choose to a student on their caseload or choose a prepared case study (either elementary or secondary to complete this assignment). Please ask the instructor about the prepared case study data if you are planning to use a prepared case study. It is far more beneficial and a more meaningful learning experience to select a student with a mild disability from one of your classes.

The observation student profile should include the following components which will be headings in your APA formatted paper.

Rubric and extensive narrative for the Observation Student Profile) Scores for each section/part range from 5.56- does not meet, 11.11- meets, or 16.67- exceeds expectations.

Part I: Demographic and Background Data

Part II: Educational History (data), Goals, Objectives, and Accommodations

Part III: School and Classroom Information
Part IV: TWO Student Observations in TWO different classrooms/subjects

Part V: Parent or Teacher Interview and Analysis of Information

Part VI: Summary, Synthesis, Recommendations, Final Reflections, SO WHAT, CEC standards

Part VII: Appendix (required) Include student work samples relevant to your case study specifics, parent interview questions and answers. Other relevant materials may be included but are optional.

APA Format, Style, and Mechanics. Please proofread all papers before turning in a finished product. APA formatting is expected. You must post Observation Student Profile in the VIA assessment and also in Blackboard at the end of the course.

College Wide Common Assessment
(VIA submission required)
N/A

Field Experience Requirement
A field experience is a part of this course. A field experience includes a variety of early and ongoing field-based opportunities in which candidates may observe, assist, and/or tutor. Field experiences may occur in off-campus settings, such as schools (CAEP, 2016). Below are REQUIRED PROCEDURES FOR ALL STUDENTS ENROLLED IN THIS COURSE.

1. Complete the online EDSE Field Experience form. This online form will be sent to your GMU email from EDSEfld@gmu.edu on the first day of the semester. Click on the link and complete the form as soon as possible. **ALL students should complete the form, regardless of whether you need assistance in locating a field experience placement or not.** This information is required by the state. Please direct any questions about the form to Dr. Kristen O’Brien at EDSEfld@gmu.edu.

If you are arranging your own field experience because you are a full-time contracted school system employee and will complete the field experience at your worksite, you will be asked to specify the school at which you will be completing the field experience.

If you request a field experience placement to be arranged, you will receive information via your GMU email account about your assigned internship placement from the Clinical Practice Specialist in the College’s Educator Preparation Office (EPO). Check your GMU email regularly for important information regarding your field experience. Follow all instructions for the necessary Human Resource (HR) paperwork required to access the assigned field experience placement.

2. View the EDSE Field Experience Introduction presentation. On the first week of classes and prior to representing George Mason in off-campus settings, your instructor will show a video presentation or provide a link to the presentation, which includes important information about the
registration process for EDSE field experiences and tips for a successful field experience. After
the presentation, sign the document provided by your instructor to indicate that you have
watched the presentation and are aware of the EDSE field experience professionalism
expectations.

3. Document your field experience hours. Your instructor will provide you with access to field
experience documentation forms to use. There are two different field experience documentation
forms – one for those completing field experience at their worksite and one for those completing
field experiences in other classroom settings (e.g., GMU arranged a placement for you). Use the
form that is most appropriate for your field experience placement. Your instructor will provide
more directions on how to use and submit the documentation form.

4. Complete the field experience end-of-semester survey. Towards the end of the semester, you
will receive an email from EDSEfld@gmu.edu with a link to an online survey. This brief survey
asks you to report about important features of your field experience placement.

5. Students must be able to perform the essential functions of the practicum site assigned with or
with or without an accommodation. Contact Disability Services (ods@gmu.edu) for questions
related to accommodations.

Other Assignments

❖ Class Attendance and Participation (10 points per class= 10 classes= 100 points)
Completion of weekly class activities, participation in class discussions, and project
presentation update discussions throughout the semester. Points missed due to absences
cannot be made up unless you have conferred with the instructor prior to the absence.
Excessive absences can result in additional penalties and potential withdrawal from class.

❖ Journal Entries (through BB- 8 entries-one per week-10 points each- 80 points
total). Complete one posted journal entry per week through BB Tools under journals. These journal entries will help you to identify a minimum of THREE IMPORTANT POINTS related to your readings assigned for the week. I would like you to make
cannections to what you have read in your assigned texts and how the content applies in
your classroom. This will be discussed more in class in terms of your thinking from
knowledge to application of information.

❖ All About Me Activity (50 points), DUE Thursday, September 23, 2021
Start by reading a few articles on building relationships with your students.
   ○ 6 Easy Ways to Build Relationships with Your Students (wgu.edu)
   ○ 6 Ways to Build Strong Teacher-Student Relationships with SEL - Social and
     Emotional Learning - Aperture Education
   ○ Prioritize Building Relationships With Your Students: What Science Says |
     Getting Smart
   ○ Staying Connected with Troubled Students - ASCD
Then, plan and record an **All About Me Presentation** in which you will share 5-10 facts about you, including your strengths. In addition, you will also include a section on **I Wish My Teacher Knew About Me** after listening to student excerpts from this book read by your instructor on the first night. You could use this activity with your students, too. This is a great opportunity for your students to get to know you on a more personal level as you build your relationships. An exercise like this can be modified for any age level and it can be done in any subject. You can modify it by asking a personal question about your discipline like, “How do you think physics plays a role in your everyday life?” or “Why do you think we need to learn geometry?”

*Please make a teacher video of your All About Me presentation in the provided Flipgrid link or other video interface. You will be asked to post the video link in your BB EDSE 540 assignment link.*

- **Mindmaps for characteristics of students with disabilities. (25 points each for 5 mindmaps/125 points total).** Choose a different way to capture the characteristics of each disability if this format does not work with your learning preferences.

Create individual mindmaps or other organizer for the characteristics of students with learning disabilities, emotional disabilities, mild intellectual disabilities, autism, and attention deficit (ADHD/ADD) from your text. (*see dates in weekly calendar--try to include the academic, social, processing deficits, executive functioning, communication, and behavior challenges for each disability) (*See due dates on weekly calendar)*

Below is what a mindmap looks like.

![Mindmap Example](image-url)
Philosophy of Teaching Statement (50 points) Due Thursday, October 28, 2021

A philosophy of teaching statement is a personal narrative that will include these headings:

(1) your conception of teaching and learning and your philosophy around fixed and growth mindsets
(2) a description of how you teach
(3) a justification of why you teach the way that you do.

Your philosophy of teaching statement should: (1) demonstrate that you have been reflective and purposeful about your teaching; and (2) communicate your goals for student learning and corresponding actions in your classroom.

Why do teachers need to articulate their philosophy of teaching? What purpose does a philosophy of teaching statement serve? It has been recognized by many teachers that the process of identifying a personal philosophy of teaching and continuously examining and verifying this philosophy through teaching can lead to change of teaching behaviors and ultimately foster professional and personal growth (Brookfield, 1990).

You will develop a personal purpose -which describes a clear picture of why you are doing what you are doing. You will also develop a pedagogical purpose- this perspective allows you to ask the most important question in teaching- “what effect am I having on students and student learning?”

There is no required content or set format. There is no right or wrong way to write a philosophy statement. Only you decide how to write your teaching philosophy. It is generally 1–2 pages in length.

Use present tense, in most cases. Writing in first–person is most common and is the easiest for your audience to read. This is not typical APA writing!

Include teaching strategies and methods to help people “see” you in the classroom. Help the reader of your teaching statement visualize what you do in the classroom to establish a student-centered learning environment, including building positive student relationships and engaging all students. Help the reader of your statement visualize your teaching and assessment practices when focused on the learning for all students.

By writing about your experiences and your beliefs, you “own” those statements and establish a personal mindset for student learning.
Iris Center Modules (100 points total; 25 points each), due Thursday, October 21, 2021

View four outlined modules for the online class on or around the week of Thursday, October 14, 2021. Directions will be provided on what to hand in for a grade for each module. These will be completed as online content and as part of class discussions and activities. You will need a computer to access this content.

ALL Frayer models (see BB) are DUE no later than class on Thursday, October 21, 2021 by 5:00 pm.

This is an example of a Frayer Model:

About the IRIS CENTER: [http://iris.peabody.vanderbilt.edu/](http://iris.peabody.vanderbilt.edu/)

Funded by the U.S. Department of Education’s Office of Special Education Programs (OSEP), the IRIS Center is headquartered at Vanderbilt University in Nashville, TN, and Claremont Graduate University in Claremont, CA. Our primary objective is to create and infuse resources about evidence-based practices into preservice preparation and professional development programs. To facilitate this process, IRIS disseminates and offers trainings on those resources. Developed in collaboration with nationally recognized researchers and education experts, IRIS resources are designed to address instructional and classroom issues of great importance to today’s educators. IRIS resources are used in college instruction, PD activities, and independent learning opportunities for practicing educators.
Must view these first three modules and create a Frayer Model for each module: (must complete all three modules below)

- Universal Design for Learning (online class) http://iris.peabody.vanderbilt.edu/module/udl/
- Differentiated Instruction: Maximizing the Learning for All Students (online class) http://iris.peabody.vanderbilt.edu/module/di/
- Providing Instructional Supports: Facilitating Mastery of New Skills Students (online class) http://iris.peabody.vanderbilt.edu/module/sca/

**CHOICE--Choose one of the three below for your fourth module and create a Frayer model.

- Addressing Disruptive & Non-Compliant Behaviors (Part 1) (online class) http://iris.peabody.vanderbilt.edu/module/bi1/
- SOS: Helping Students Become Independent Learners (online class) http://iris.peabody.vanderbilt.edu/module/sr
- Teaching English Language Learners: Effective Instructional Strategies (online class) http://iris.peabody.vanderbilt.edu/module/ell/

➤ Student Profile Presentation (50 points)

**Due Thursday, November 18, 2021** You will choose how to present your student profile. Your presentation should not be longer than 5-7 minutes. You will present your student profile in any way you wish. Be creative in your presentation style! (see examples in BB assignments)

**Be sure to cover these four areas:**
- student strengths
- student challenges
- disability characteristics
- evidence-based practices (EBPs)/strategies

**Assignment Summary and Points**

<table>

<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Observation Student Profile</td>
<td>100 points</td>
</tr>
</tbody>
</table>
Course Policies and Expectations

Attendance/Participation
Students are expected to (a) attend all classes during the course, (b) be actively involved in activities, and (c) arrive on time and stay for the duration of class time. Lack of attendance and professional participation at all sessions will significantly diminish the impact of the course and interfere with creating a collaborative learning community. As such, absences from any portion of the course are strongly discouraged. Please notify me in advance by phone or email if you will not be able to attend class.

Late Work
In-depth reading, study, and work on course requirements require outside class time. Students are expected to allot class study and preparation time weekly in addition to time spent on papers and assignments. There will be no late work accepted unless a student has sought out the instructor for a proactive, private, and one-to-one conversation. A ZERO will be assigned to any late work. Individual situations will be addressed with individual students outside of class. Be proactive and professional. Please do not wait if you have any challenges that need to be addressed this semester.

Other Requirements

People First Language
We will use person-first language in our class discussions and written assignments (and ideally in our professional practice). We will also strive to replace the term “Mental Retardation” with “Intellectual Disabilities” in our oral and written communication in accordance with terminology choices in the disability community.

Withdraw from Class

If you are unable to meet the participation requirements of the course(s) it is strongly recommended that you drop the course. Withdrawing from the course is not an automatic process. You must inform the instructor in writing if you wish to withdraw from the course and follow GMU withdrawal processes. Failure to notify the instructor will result in an “F” on your official George Mason University transcript.
Written and Oral Language Expectations

APA Style is the standard format for any written work in the College of Education. If you are unfamiliar with APA, it would benefit you to purchase the Publication Manual of the American Psychological Association (7th ed.) You are required to use APA guidelines for all course assignments. This website links to APA format guidelines: https://apastyle.apa.org/ (7th ed. Guidelines)

Academic Integrity

Students in this course are expected to exhibit academic integrity at all times. This is a master’s level college credit course and students are expected to maintain professional and personal integrity at all times. Be aware that plagiarism is presenting someone else’s work as your own. Whether the act is deliberate or unintentional is irrelevant. You must take great care to give credit to an author when you borrow either exact words or ideas. Generally, if you use 4 or more words in a row you should use quotation marks and a proper APA citation. Remember that plagiarism is a very serious offense and can result in dismissal from the University. Evidence of plagiarism or any other form of cheating in the class will result in a zero on that assignment and a report of the incident to the Dean’s Office.

Grading

As a GMU student you are required to monitor your grades at all times. You are aware of your grades at all times through your BB course grade center.

95-100% = A
90-94%= A-
86-89= B+
80-85= B
76-79%=C+
70-75%= C
>70%=F

* Please note, the graduate grading scale does not include a “D”.

*Note: The George Mason University Honor Code will be strictly enforced. See Academic Integrity Site (https://oai.gmu.edu/) and Honor Code and System (https://catalog.gmu.edu/policies/honor-code-system/).

Students are responsible for reading and understanding the Code. “To promote a stronger sense of mutual responsibility, respect, trust, and fairness among all members of the George Mason University community and with the desire for greater academic and personal achievement, we, the student members of the university community, have set forth this honor code: Student members of the George Mason University community pledge not to cheat, plagiarize, steal, or lie in matters related to academic work.” Work submitted must be your own new, original work for this course or with proper citations.
Professional Dispositions
Students are expected to exhibit professional behaviors and dispositions at all times. See Policies and Procedures (https://cehd.gmu.edu/students/polices-procedures/). Professional dispositions are an essential function of a special educator’s job, indicating that these dispositions are critical to develop and assess in special education licensure programs. In the College of Education and Human Development, dispositions are formally and separately evaluated in at least three points in each student’s program – a self-evaluation at the start of their program, a self-evaluation at the mid-point of their program, and a university supervisor’s evaluation during internship. In special education graduate licensure programs, the initial self-evaluation is completed in a designated course (EDSE 501), the mid-point self-evaluation is completed in designated courses (EDSE 627, EDSE 661, and EDSE 616), and the internship evaluation is completed by instructors in EDSE 783, EDSE 784, and EDSE 785. In addition to these three designated evaluation times, instructors may complete instructor-rated disposition assessments other times throughout the program. When dispositions are assessed, it is important that for areas where a positive disposition is rated as “not proficient,” the student takes steps to grow as an educator. See https://cehd.gmu.edu/epo/candidate-dispositions.

Class Schedule
*Note: Faculty reserves the right to alter the schedule as necessary, with notification to students.

Core Values Commitment
The College of Education and Human Development is committed to collaboration, ethical leadership, innovation, research-based practice, and social justice. Students are expected to adhere to these principles: See Core Values (http://cehd.gmu.edu/values/).

GMU Policies and Resources for Students

Policies
- Students must adhere to the guidelines of the Mason Honor Code. See Honor Code and System (https://catalog.gmu.edu/policies/honor-code-system/).
- Students must follow the university policy for Responsible Use of Computing. See Responsible Use of Computing (http://universitypolicy.gmu.edu/policies/responsible-use-of-computing/).
- Students are responsible for the content of university communications sent to their Mason email account and are required to activate their account and check it regularly. All communication from the university, college, school, and program will be sent to students solely through their Mason email account.
- Students with disabilities who seek accommodations in a course must be registered with George Mason University Disability Services. Approved accommodations will begin at the time the written letter from Disability Services is received by the instructor. See Disability Services (https://ds.gmu.edu/).
- Students must silence all sound emitting devices during class unless otherwise authorized by the instructor.

Campus Resources
- Support for submission of assignments to either Tk20 or VIA should be directed to https://cehd.gmu.edu/aero/assessments/
- Questions or concerns regarding use of Blackboard should be directed to Blackboard Instructional Technology Support for Students (https://its.gmu.edu/knowledge-base/blackboard-instructional-technology-support-for-students/).

Notice of mandatory reporting of sexual assault, interpersonal violence, and stalking:
- As a faculty member, I am designated as a “non-confidential employee” and must report all disclosures of sexual assault, interpersonal violence, and stalking to Mason’s Title IX Coordinator per University Policy 1202. If you wish to speak with someone confidentially, please contact one of Mason’s confidential resources, such as Student Support and Advocacy Center (SSAC) at 703-380-1434 or Counseling and Psychological Services (CAPS) at 703-993-2380. You may also seek assistance from Mason’s Title IX Coordinator by calling 703-993-8730, or emailing the Title IX Coordinator (titleix@gmu.edu).
For information on student support resources on campus, see Student Support Resources on Campus (https://ctfe.gmu.edu/teaching/student-support-resources-on-campus).

For additional information on the College of Education and Human Development, please visit our website College of Education and Human Development (http://cehd.gmu.edu/).

Appendix Assessment Rubric(s)

GUIDELINES for the Observation Student Profile (100 points)

The observation student profile provides you with the opportunity to get an in-depth understanding of a student with mild to moderate exceptional learning needs. You will examine his or her educational history and goals, observe in classroom settings, conduct parent or guardian interviews, and synthesize the information gathered, relating it to the content of the course. The purpose of the student profile is to help you understand the complexity of each individual case of a student with a disability. This case study assignment has six major sections. Each section should be labeled with the heading given below. The paper should be formatted using APA style with related documents and samples in the

Part I: Demographic and Background Data (ranges from 5.56, 11.11, or 16.67)

A. Select a student with exceptional learning needs who accesses the general curriculum and you would like to study. Verify with school officials that you have permission to access confidential records for that student and that you may contact the student’s parents or guardians. If you do not have access to a student with exceptional learning needs, please talk with your instructor.

B. Create a pseudonym to use throughout your project. (It is of the utmost importance that the identity of your student remains confidential. If school officials or parents ask, your case study will be evaluated by your instructor and will be posted to TK20 through BB, Mason’s accreditation database. This database is password protected and is only used as a repository for student artifacts. Information from the database is never available for public view.)

C. Provide a thorough description of your student, including
   1. STUDENT STRENGTHS and CHALLENGES
   2. demographic information,
   3. disability diagnosis and etiology,
   4. any medical conditions that exist,
   5. psychological and social-emotional characteristics, and
   6. any other information relevant to the student’s academic achievement (e.g., has moved repeatedly, has significant family changes). Do not include the student’s educational history. That is included in Part III.
D. Identify and provide examples of the skills and characteristics of your student that are (a) similar to their peers (typical growth and development) and (b) those skills and characteristics that are dissimilar (atypical).

E. Identify the educational implications of the characteristics in C and D.

Part II: Educational History, Goals, Objectives, and Accommodations (ranges from 5.56, 11.11, or 16.67)

A. Describe your student’s educational history, including
   1. schools attended,
   2. reason for initial referral,
   3. pre-referral interventions (if available),
   4. results of multidisciplinary evaluation,
   5. special education classification,
   6. description and location of educational service provision, and
   7. related services provided.

B. From the student’s IEP, summarize the educational goals and objectives and identify the classroom accommodations.

C. Describe the impact of your student’s academic and social abilities, attitudes, interests, and values on instruction and career development. Does your student’s disability have an impact on auditory and information processing skills? If so, describe.

D. Evaluate how the levels of support correspond to the needs of the individual.

Part III: School and Classroom Information (ranges from 5.56, 11.11, or 16.67)

A. Give a description of your student’s school, including
   1. Demographics of students
   2. Staffing
   3. Continuum of services for students with exceptional learning needs

B. Describe your student’s educational placement. What special education and general education services are provided? In what locations or ways are the services provided?

C. Evaluate how this placement is the Least Restrictive Environment to address the student’s specific skills and characteristics, as described in Part I.

D. Describe the classroom(s) in which the student participates, including
1. Number of students
2. Content area
3. Curriculum standards used

Part IV: Student Observations (ranges from 5.56, 11.11, or 16.67) (virtually)

Observe at least two class periods of instruction for your student. *Two observations in two different settings, classrooms, or subjects.*

A. Summarize your observations, including
   1. Content area,
   2. Teachers and service providers involved,
   3. Length of observation,
   4. Placement of student in classroom,
   5. Interactions of student with teacher(s) and other students,
   6. Learning activities, and
   7. Level of engagement of student with activities.

B. Describe how what you observed corresponded to your student’s IEP goals, objectives, and accommodations.

C. Describe the effects your student’s exceptional condition(s) appears to have on his or her life in school.

D. Identify any biases that you may have that may affect how you perceive the classrooms during observations.

Part V: SPED Parent or Teacher Interview and analysis of information (ranges from 5.56, 11.11, or 16.67)

Answer these questions below in this part of your case study.

A. Think about the learning profile for your student when speaking with a special education teacher. What have you learned from this interview to support learning for your student?

B. How does a thorough understanding of this student learning profile, based on strengths and challenges, help to support planning based on your student’s unique needs?

C. How does a teacher (or another teacher’s understanding of this student’s unique profile) support your instructional planning and moving beyond the label to a learner?
Part VI: Summary, Synthesis, Recommendations, SO WHAT, and Final Reflections
(ranges from 5.56, 11.11, or 16.67)

A. Summary
Write a brief, one paragraph summary (referring to relevant pages in your case study as necessary) of your student including all pertinent information obtained throughout the observations, interviews and background information review. Provide enough detail that a stranger could walk into the classroom and identify your student from your summary alone.

B. Synthesis
Compare your student’s characteristics with those described in the textbook or other course readings for a student with the identified disability. How are they similar and different? Are the described implications similar or different? How do your student’s characteristics compare to typical development? Provide specific examples.

C. Recommendations
Given the information you have compiled about your student and your learning from the course,
1. Do you think your student is receiving the services and supports he or she needs? Provide a rationale for your response.
2. If you could provide recommendations to the IEP team about effective instruction to match the characteristics of your student, what would they be? Provide a rationale for your response

D. So What? You have now completed a comprehensive case study. So what? How will you think about students differently now that you have completed this assignment? What can you take away with you and apply to all of your students in the future?

E. Final reflection
1. How did your personal cultural biases and differences affect your interactions with this student and his or her family during this case study process?
2. Alignment with new CEC Standards) How does the development of this case study address CEC Standards?

F. Address CEC Standards from class:
a. CEC Standard 1: Learner development and individual learning differences
b. CEC Standard 2: Learning environments
c. CEC Standard 3: Curricular content knowledge
d. CEC Standard 4: Assessment
e. CEC Standard 5: Instructional planning and strategies
f. CEC Standard 7: Collaboration

**Part VII: Appendix- work samples, interview questions, etc… (required)**

Include student work samples relevant to your case study specifics, parent interview questions and answers. Other relevant materials may be included but are optional, please scan in work samples. Interview questions, SCANNED student work samples for appendices.

Mechanics and APA Format. Proofread all papers prior to turning in a final product. APA format for all papers is required
