Early Childhood Education**

ECED 401.003 Developmental Pathways of Diverse Learners, Birth-Adolescence  
3 Credits, Fall 2022, Hybrid  
8/22/2022–12/14/2022, Tuesdays/ 1:30–2:45 pm  
Thompson Hall L019, Fairfax Campus

**Faculty**

Name: Hugh McIntosh  
Office Hours: By Appointment  
Office Location: Thompson Hall 1200, Fairfax Campus  
Office Phone: 571-318-7489 (cell)  
Email Address: [hmcinto2@gmu.edu](mailto:hmcinto2@gmu.edu)

**Prerequisites/Corequisites**

None

**University Catalog Course Description**

Examines child and adolescent development from diverse perspectives. Addresses typical and atypical physical, social and emotional, language, and intellectual development. Explores role of individual differences and culture in understanding and interpreting child and adolescent development.

**Course Delivery Method**

This course will be delivered using a lecture/discussion format and Blackboard (Bb).

**Learner Outcomes or Objectives**

This course is designed to enable students to do the following:

1. Describe the physical, social, emotional, speech and language, and intellectual development of diverse learners from birth through adolescence and explain how to use these understandings to guide learning experiences and relate meaningfully to students.
2. Describe the major theories of development and critically examine the theories as they apply to the lives of culturally, linguistically, ability, and socioeconomically diverse children and their families, including children with economic, social, racial, ethnic, religious, physical, and intellectual differences.
3. Examine the transactional nature of overall development in the context of the family, community, socioeconomic status, and culture.
4. Identify environmental and biological/physical/medical at-risk factors that can contribute to possible developmental disabilities, developmental issues, and atypical development across the physical, social, emotional, speech and language, and intellectual domains.
5. Discuss the etiology of and use multiple criteria to identify developmental disorders, including attention deficit disorders, developmental disorders, and giftedness.
6. Identify typical developmental milestones of diverse children from birth through adolescence and their cultural and socioeconomic variations.

7. Observe and describe overall development in the physical, intellectual, speech and language, social, and emotional domains as it occurs in natural environments and through play.
8. Explain how research is currently documenting children's development across time.
9. Exhibit standards of professionalism, ethical standards, and personal integrity in interactions with classmates, the instructor, and others.
10. Use writing as an instructional and assessment tool to generate, gather, plan, organize, and to communicate for a variety of purposes; integrate correct written conventions (i.e., grammar, usage, mechanics, and spelling); and format using current APA style.

**Professional Standards** – Interstate Teacher Assessment and Support Consortium (InTASC) Standards, Division of Early Childhood (DEC) Professional Preparation Standards, National Association for the Education of Young Children (NAEYC) Professional Standards and Competencies, and Virginia Professional Studies Competencies

See Class Schedule for selected Position Statements from the Division of Early Childhood Education (DEC) of the Council for Exceptional Children (CEC), the National Association for the Education of Young Children (NAEYC), and the National Association for Gifted Children (NACG).

This course also requires reading published journal articles on human development. Example journals include the following: *Early Education and Development*, *Child Development*, and *Human Development*. These and other journals are available on the Mason library website.

### Course Performance Evaluation

Students are expected to submit all assignments on time in the manner outlined by the instructor (e.g., Blackboard, VIA, hard copy).

- **Assignments and/or Examinations**

**Considering Developmental Theories Paper (9 points)**

In order that all class members leave this course with an overview of the most prominent developmental theories in the field of early childhood education and gain a critical perspective on the values and liabilities of different theories and their application, students will prepare a review of a developmental theory and associated theorists. Grand theories covered in the text include psychodynamic theories, behaviorist theories, Piaget’s constructive theory, and Vygotsky’s sociocultural theory. Modern theories covered include evolutionary theories, social learning theories, information-processing theories, and systems theories. Students will compose a two- to three-page summary of capturing the key tenants of developmental theory and how it relates to children’s developmental progression.

Students will select or be assigned one perspective and provide a summary of the following:

- Important theorists associated with the paradigm
- Key tenets of the theory
- How theory explains cultural differences that are apparent in development
- How theory explains variation in development, including disabilities
- Weaknesses and strengths of theory
- The impact of the theory on education

Students may select or be assigned one of the following theories:

- Erikson: Psychosocial
- Vygotsky: Sociocultural
- Piaget: Constructivist
- Behaviorism: Operant conditioning
- Behaviorism: Classical conditioning
- Bronfenbrenner: Ecological systems

Students will demonstrate accurate knowledge of APA formatting within the paper and begin to engage with professional journals for early childhood educators, as well as the textbook or other

course materials. Accordingly, students will find one article from *Young Children* and one article from *Young Exceptional Children* that provides complementary information related to the specific developmental theory. Information from each article will be briefly included in the summary and show evidence of appropriate APA citations for different writing practices including summarizing with in-text citations and using direct quotes with in-text citations.

### **Developmental Milestones (21 points, 7 points each)**

Students will prepare a milestone reference document for a child of 6 months (infant/toddler), 3 years (preschool/early childhood), and 8 years (early elementary/middle childhood). Students will identify the major milestones for each of the following domains: physical, social and emotional, speech and language acquisition, and intellectual/cognitive development. Students will identify typical developmental progressions. Students will use the text and/or other course materials for this project. All information presented needs to come from these resources. Students should see Blackboard for detailed instructions.

Students will also highlight a specific developmental theory for each of the milestone charts prepared as outlined below.

- Piaget: Constructivism—infant/toddler
- Vygotsky: Sociocultural—preschool/prekindergarten
- Erikson: Psychosocial—primary
- Behaviorism: Classical conditioning—any of the 3 age levels
- Behaviorism: Operant conditioning—any of the 3 age levels

### **Multiple Influences on Young Children’s Development Paper (15 points)**

To demonstrate an understanding of the ways that child development and the learning process occur in multiple contexts, including family, culture, language, community, and early learning setting, as well as in a larger societal context that includes structural inequalities. Students will develop a five- to seven-page paper that describes how the following factors may impact child development and learning:

- Family/family structure
- Socioeconomic status
- Language and culture
- School
- Community
- Social inequities

Students will include a connection to Bronfenbrenner’s Ecological Systems Theory to support their analysis. Students will use in-text citations from the textbook and/or class lectures, and at least three professional/peer-reviewed articles, book chapters, reports, etc. (but none of the “Resource Articles”) to support their discussions. Students will include a reference list in APA style.

### **Adolescent Development and Development of Gifted Students Assignment (5 points)**

Using a popular film about adolescents, students will complete a graphic organizer that shows their understanding of (a) adolescent development and (b) the development of gifted students

through adolescence, including developmental issues related to gifted education and the use of multiple criteria to identify gifted students.

### **Case Study Analysis (25 points)**

To demonstrate an understanding of the developmental period of early childhood from birth through age 8 across physical, cognitive, social and emotional, and linguistic domains, including bilingual/multilingual development, students will develop an analysis with four to six pages of text (plus the title and reference pages) on a video case study randomly assigned from one of three age groups: Infant/Toddler, Preschool, or Early Elementary. They will view the video and then write a paper that discusses the children's unique characteristics and needs, and describes at least one developmental theory that supports their analysis of the video vignette.

**Part A:** Students will describe the child's current state of development, focusing on the child's unique characteristics and needs in relation to relevant developmental milestones. They will cite specific examples observed in the video cases and support their assertions with current research from the course textbook and/or other course materials, which may be supplemented by information from external scholarly sources. They will discuss each of the following areas:

- Physical development,
- Intellectual development,
- Social and emotional development, and
- Speech and language development.

**Part B:** For the case study analysis, students will also identify and discuss one major developmental theory that supports their analysis of the video vignette. These include psychodynamic theory (Freud), psychodynamic theory (Erikson), behaviorist theory (classical conditioning), behaviorist theory (operant conditioning), Piaget's constructive theory, Vygotsky's sociocultural theory, evolutionary theory, social learning theory, information processing theory, and ecological systems theory. Students will explain how the developmental theory informs educators' understanding of the child's development.

Students will use the course textbook and/or other course materials, which may be supplemented by information from external scholarly (peer-reviewed) sources. Students will use in-text citations and include a reference list formatted in APA style.

- **Other Requirements**

### **Attendance and Participation (25 points)**

Because active participation and engagement are imperative for optimal learning, preparation for and participation in online activities will be evaluated based on the following criteria:

- Students complete readings and online content as evidenced by their ability to discuss and write about the concepts presented and examined in the texts as well as participate fully in related activities.
- Students are actively involved in online learning experiences as evidenced by (a) participating in all activities, (b) engaging in small- and large-group discussions, (c) completing written work related to the activities, and (d) supporting the participation and learning of classmates.

- Students show evidence of critical reflective thinking through online discussions, activities, and written reflections.
- Students display professional dispositions at all times while interacting with the instructor and other students.
- Students complete participation activities across the semester that complement the scheduled course topic. Instructors will periodically collect artifacts from the activities. Students who actively engage in the learning experience will receive credit for their efforts. Graded participation activities are not announced and are implemented at the discretion of the instructor.

### **Written Assignments**

All formal written assignments will be evaluated for content and presentation. The American Psychological Association, Seventh Edition (APA) style will be followed for all written work. All written work unless otherwise noted must be completed on a word processor and should be proofread carefully. (Use spell check!) If students are not confident of their own ability to catch errors, they should have another person proofread their work. When in doubt, they should check the APA manual. Students may consult the Writing Center for additional writing support.

Students will do the following:

1. Present ideas in a clear, concise, and organized manner. (Avoid wordiness and redundancy.)
2. Develop points coherently, definitively, and thoroughly.
3. Refer to appropriate authorities, studies, and examples to document where appropriate. (Avoid meaningless generalizations, unwarranted assumptions, and unsupported opinions.)
4. Use correct capitalization, punctuation, spelling, and grammar.
5. Type the paper with double spacing, indented paragraphs, 1-inch margins all around, and 12-point Times New Roman font.

- **Grading**

A+ = 98 – 100   A = 93 – 97   A- = 90 – 92   B+ = 87 – 89   B = 83 – 86   B- = 80 – 82

C+ = 77 – 79   C = 70 – 76   D = 60 – 69   F = < 60

Incomplete (IN): At the student's request, this grade may be given to a student who is passing a course but who may be unable to complete scheduled coursework for a cause beyond reasonable control.

All CEHD students are held to the university grading policies as described in the Academic Policies section of the current catalog, which can be accessed at <http://catalog.gmu.edu>. Those students seeking Virginia initial teaching licensure must earn a B- or better in all graduate licensure coursework.

### **Professional Dispositions**

Students are expected to exhibit professional behaviors and dispositions at all times. See <https://cehd.gmu.edu/students/policies-procedures/>.

## Class Schedule

Date	Topics	Assignments & Readings Due
<b>Week 1</b> <b>Aug 23</b>	Introductions  Syllabus and Assignments Review  Studying Human Development <ul style="list-style-type: none"> <li>• Historical beliefs</li> <li>• Grand and modern theories of development</li> <li>• Methods to study development</li> </ul>	Lightfoot et al., Chapter 1

### Core Values Commitment

The College of Education and Human Development is committed to collaboration, ethical leadership, innovation, research-based practice, and social justice. Students are expected to adhere to these principles: <http://cehd.gmu.edu/values/>.

### GMU Policies and Resources for Students

#### *Policies*

- Students must adhere to the guidelines of the Mason Honor Code (see <https://catalog.gmu.edu/policies/honor-code-system/>).
- Students must follow the university policy for Responsible Use of Computing (see <https://universitypolicy.gmu.edu/policies/responsible-use-of-computing/>).
- Students are responsible for the content of university communications sent to their Mason email account and are required to activate their account and check it regularly. All communication from the university, college, school, and program will be sent to students **solely** through their Mason email account.
- Students with disabilities who seek accommodations in a course must be registered with George Mason University Disability Services. Approved accommodations will begin at the time the written letter from Disability Services is received by the instructor (see <http://ds.gmu.edu/>).
- Students must follow the university policy stating that all sound emitting devices shall be silenced during class unless otherwise authorized by the instructor.

#### *Campus Resources*

- Support for submission of assignments to VIA should be directed to [viahelp@gmu.edu](mailto:viahelp@gmu.edu) or <https://cehd.gmu.edu/aero/assessments>. Questions or concerns regarding use of

Blackboard should be directed to <https://its.gmu.edu/knowledge-base/blackboard-instructional-technology-support-for-students/>.

- For information on student support resources on campus, see <https://ctfe.gmu.edu/teaching/student-support-resources-on-campus>.

**Notice of mandatory reporting of sexual assault, interpersonal violence, and stalking:** As a faculty member, I am designated as a “Responsible Employee,” and must report all disclosures of sexual assault, interpersonal violence, and stalking to Mason’s Title IX Coordinator per University Policy 1202. If you wish to speak with someone confidentially, please contact one of Mason’s confidential resources, such as Student Support and Advocacy Center (SSAC) at 703-380-1434 or Counseling and Psychological Services (CAPS) at 703-993-2380. You may also seek assistance from Mason’s Title IX Coordinator by calling 703-993-8730, or emailing [titleix@gmu.edu](mailto:titleix@gmu.edu).

**For additional information on the College of Education and Human Development, please visit our website: <http://cehd.gmu.edu>.**
