EDIT 705-001 and EDIT 705 DL1: Instructional Design  
3 Credits Fall Semester 2022  
Online

August 22, 2022 through October 12, 2022

**Faculty**

Name: Doug Wilson, PhD  
Office Hours: By appointment and Drop-In every Wed, 7:00p – 8:00p Eastern in [Zoom](#)  
Office Location: Thompson Hall, Fairfax Campus, MS: 5D6  
Office Phone: 703-993-3669 (Voicemail is immediately transcribed to my e-mail.)  
Email Address: dwilso31@gmu.edu - Email response time: within 24 hours; 24-36 hours  
holidays/weekends

**Prerequisites/Corequisites**

None.

**University Catalog Course Description**

Helps students analyze, apply, and evaluate principles of instructional design to develop education and training materials spanning a wide range of knowledge domains and instructional technologies. Focuses on variety of instructional design models, with emphasis on recent contributions from cognitive science and related fields. Offered by [School of Education](#). May not be repeated for credit.

**Course Overview**

This course is designed to teach the fundamentals of instructional design, including the principles of learning theory and instructional strategies that are relevant to instructional design. Students will learn the purpose and approach to completing each phase of the instructional design process and will produce a set of outputs from each of these phases in accordance with the requirements specified in a final course project.

**Course Delivery Method**

This course will be delivered online (76% or more) using an **asynchronous** format via the Blackboard Learning Management System (LMS) housed in the MyMason portal. You will log in to the Blackboard (Bb) course site using your Mason email name (everything before

“@masonlive.gmu.edu) and email password. The course site will be available on **Friday, 1/19/2022** at 6:00 p.m. Eastern.

## Learner **Outcomes or Objectives**

This course is designed to enable students to do the following:

- Define instructional design
- Compare and contrast various models of instructional design
- Analyze and discuss various learning theories and how they relate to instructional design
- Collect and analyze data to identify an instructional need
- Conduct learner and contextual analyses
- Conduct task analysis
- Write measurable instructional/performance objectives
- Analyze and discuss instructional strategies used for various types of learning
- Define a formative, summative, and confirmative evaluation plan for the learning design project
- Create an instructional design document (IDD) that provides a solution to an instructional problem/need
- Produce a rudimentary prototype of a design concept using electronic media of choice (e.g., PowerPoint, Camtasia, Dreamweaver, Articulate)

## **Professional Standards**

### 1. Instructional Design Competencies (IBSTPI)

This course adheres to the standards for instructional design competency of the International Board of Standards for Training, Performance, and Instruction (IBSTPI). The complete list of IBSTPI standards is located at [http://www.ibstpi.org/Competencies/instruct\\_design\\_competencies.htm](http://www.ibstpi.org/Competencies/instruct_design_competencies.htm):

- Professional foundations
  - Communicate effectively in visual, oral and written form
- Planning and analysis
  - Conduct a needs assessment
  - Design a curriculum or program
  - Select and use a variety of techniques for determining instructional content
  - Identify and describe target population characteristics
  - Analyze the characteristics of the environment
  - Analyze the characteristics of existing and emerging technologies and their use in an instructional environment
  - Reflect upon the elements of a situation before finalizing design solutions and strategies
- Design and development
  - Select and use a variety of techniques to define and sequence the instructional content and strategies
  - Select or modify existing instructional materials
  - Develop instructional materials

- Design instruction that reflects an understanding of the diversity of learners and groups of learners
- Evaluate and assess instruction and its impact
- Implementation and management
  - Provide for the effective implementation of instructional products and programs

## Required Texts

Morrison, G.R., Ross, S.M., & Kalman, H.K. (2019). *Designing effective instruction (8th edition)*. Hoboken: John Wiley & Sons, ISBN: 978-1119465935

## Course Performance Evaluation

Students are expected to submit all assignments on time in the manner outlined by the instructor (e.g., Blackboard, hard copy).

## Assignment Weights

Category	Assignment	Weight
1	Discussions	20%
2	Peer Reviews & Reflections	20%
3	Quizzes	10%
4	Project Progress	5%
5	Final Instructional Design Development Project	45%

## Assignment Descriptions

### Online Discussions

Each week of the course, there is an assignment that requires interaction and collaboration with peers.

- In many of the sessions, there will be an online discussion related to the week's readings. You should respond to the discussion prompts by incorporating information from the readings and applying the readings to your own experience. Each discussion will have a similar rhythm, with the first post due by **Thursday** and follow-up posts due by **Sunday**. The first post should be substantive and approximately 3 paragraphs. Follow-ups should also

be substantive and constructive and in the range of 2 paragraphs. The suggestion regarding length is to ensure you are giving enough detail and exploring the concepts fully.

### **Practitioner Profile Discussion**

- In Week 6, the discussion will require providing an infographic or brief multimedia presentation based on an interview with an instructional design practitioner. You will identify one individual who works in an instructional design or educational technology role and interview them about their experience. This will require planning that begins earlier in the course to ensure that you are prepared for this presentation.

### **Peer Reviews**

- The IDD Project is divided into sections to scaffold your development of the project over the term. There are three peer reviews that serve as an opportunity receive feedback from peers and for you to practice applying the rubric to the work of others, furthering your own understanding of the assessment criteria. You will need to provide constructive evaluative feedback to other students or teams of students on these assignments. There will be three peer reviews in the course.

### **Reflections and Quizzes**

There will be two learning reflections in the course—at the beginning and at the end. In your reflection, you should make connections between the readings on ID and your own conceptualization of the ID process through work on the IDD project. There will be at least one quiz within the course.

### **Instructional Design Document & Prototype Presentation**

Working with a team, you will develop an instructional design document (IDD), which will detail their approach to development of the prototype instructional module prior to its actual development.

The IDD project will present the design concept and related materials in a professional, polished document to the instructor. The design document will include the following components:

- a) Instructional Problem Definition/Refinement
- b) Learner and Context Analysis
- c) Task Analysis
- d) Instructional Objectives
- e) Instructional Approach (Sequencing, Strategies, Messages)
- f) Instructional Materials (Concepts)
- g) Formative & Summative Evaluation
- h) Rough prototype

Please review the Instructional Design Document & Prototype Presentation Grading Rubric as you develop your projects.

## Core Values Commitment

The College of Education and Human Development is committed to collaboration, ethical leadership, innovation, research-based practice, and social justice. Students are expected to adhere to these principles: <http://cehd.gmu.edu/values/>.

## GMU Policies and Resources for Students

### *Policies*

- Students must adhere to the guidelines of the Mason Honor Code (see <https://catalog.gmu.edu/policies/honor-code-system/> ).
- Students must follow the university policy for Responsible Use of Computing (see <http://universitypolicy.gmu.edu/policies/responsible-use-of-computing/>).
- Students are responsible for the content of university communications sent to their Mason email account and are required to activate their account and check it regularly. All communication from the university, college, school, and program will be sent to students **solely** through their Mason email account.
- Students with disabilities who seek accommodations in a course must be registered with George Mason University Disability Services. Approved accommodations will begin at the time the written letter from Disability Services is received by the instructor (see <https://ds.gmu.edu/>).
- Students must silence all sound emitting devices during class unless otherwise authorized by the instructor.

### *Campus Resources*

- Questions or concerns regarding use of Blackboard should be directed to <https://its.gmu.edu/knowledge-base/blackboard-instructional-technology-support-for-students/>.
- For information on student support resources on campus, see <https://ctfe.gmu.edu/teaching/student-support-resources-on-campus>

**Notice of mandatory reporting of sexual assault, sexual harassment, interpersonal violence, and stalking:** As a faculty member, I am designated as a “Non-Confidential Employee,” and must report all disclosures of sexual assault, sexual harassment, interpersonal violence, and stalking to Mason’s Title IX Coordinator per [University Policy 1202](#). If you wish to speak with someone confidentially, please contact one of Mason’s confidential resources, such as [Student Support and Advocacy Center](#) (SSAC) at 703-380-1434 or [Counseling and Psychological Services](#) (CAPS) at

IDD Project – Rubric

IBSTPI Competencies	Criteria	Does Not Meet Standards 0 to 7.9 points	Meets Standards 8- 9 points	Exceeds Standards 9.1 to 10 points
10, 5	<b>Problem definition</b>	Instructional design problem is not clearly stated	Instructional design problem is articulated clearly, but with little or no supporting data	Instructional design problem is articulated clearly and supported with a variety of data sources
7, 6	<b>Needs Analysis</b>	Little or no description of learner characteristics and how the context relates to the problem, little or no supporting data	Adequate description of learner characteristics and how the context relates to the problem, some use of supporting data	Comprehensive, data-driven description of learner characteristics; how the context or environment relates to the problem; and description of gaps in performance and strategies to address
8, 4	<b>Task Analysis</b>	Task is not well-described. Method and content reflect neither SME input nor other data sources	Task is adequately described, including content and procedures. Method and content reflect some SME input, little or no other data sources	Task is clearly described, including content and procedures. Method and content clearly reflects use of substantive SME input as well as other data sources
11, 5	<b>Learning Objectives</b>	Few or none of the instructional objectives are measurable nor supported by the instructional need & task analysis data	Most instructional objectives are measurable and most supported by the instructional need & task analysis data	All learning objectives are measurable and all supported by the instructional need & task analysis data.
14, 12	<b>Instructional Approaches</b>	Instructional sequencing, strategies & messages do not flow logically from the instructional need, learner, context & task analyses, major disconnects.	Instructional sequencing, strategies & messages generally flow logically from the instructional need, learner, context & task analyses, with only minor disconnects.	Instructional sequencing, strategies & messages all flow logically from the instructional need, learner, context & task analyses.

<b>11</b>	<b>Assessment</b>	Instructional design document does not contain a formative or summative assessment plan. Sample assessment items do not measure learning objectives.	Sample assessment items measure some learning objectives. Instructional design document contains formative or summative assessment strategies, but sometimes lacking detail.	Instructional design document contains clear and detailed strategies for formative and summative assessment. Sample assessment items clearly align with all learning objectives.
<b>16</b>	<b>Evaluation Plan</b>	Instructional design document does not contain a formative, summative, or confirmative evaluation plan, and limited or no supporting data sources.	Instructional design document contains an adequate formative, summative, and confirmative evaluation with some supporting data sources.	Instructional design document contains a comprehensive formative, summative and confirmative evaluation plan, supported by a variety of data sources.
<b>8, 2</b>	<b>Instructional Alignment</b>	There are significant disconnects between the task analysis; objectives; assessments and learning activities.	The major components of the design document mostly flow from each other. Any issues with the connection between the task analysis; objectives; assessments and learning activities are minor.	All major components of the design document flow from each other. The task analysis informs the objectives. The assessment strategies align with the objectives and the learning activities support learners in achieving the outcomes.
<b>7, 2</b>	<b>Prototype</b>	Prototype is missing presentation, activity and assessment examples. Prototype does not adhere to best practices in visual communication.	Prototype reflects adequate presentation, activity and assessment content examples. Prototype materials mostly adhere to best practices in visual communication.	Prototype reflects several exemplary presentation, activity and assessment content aligned with the instructional design document. Prototype materials adhere to best practices in
