George Mason University College of Education and Human Development Mathematics Education Leadership

EDCI 644.6M2 & 6M3 – Mathematics Learning and Assessment (K-8) 3 Credits, Spring 2023
Tuesdays, 7:20-10:00pm, Synchronous Online

Faculty

Name: Dr. DeAnna M. Moreau

Office Hours: By Appointment Office Location: Thompson Hall

Office Phone: (804) 347-2437 (personal cell)

Email Address: <u>dmoreau@gmu.edu</u>

Prerequisites/Corequisites

Admission to the Mathematics Education Leadership Master's degree program or instructor permission.

University Catalog Course Description

Introduces students to learning theories and associated assessment practices specific to mathematics education. Intended for mathematics specialists and teachers interested in problems of learning and assessment across K-8 settings in mathematics education. This course is designed for master's level students in the mathematics education leadership program.

Course Overview

Not Applicable.

Course Delivery Method

This course will be delivered online (76% or more) using a synchronous format via Blackboard Learning Management system (LMS) housed in the MyMason portal. You will log in to the Blackboard (Bb) course site using your Mason email name (everything before @masonlive.gmu.edu) and email password. The course site will be available on January 19, 2023.

Under no circumstances, may candidates/students participate in online class sessions (either by phone or Internet) while operating motor vehicles. Further, as expected in a face-to-face class meeting, such online participation requires undivided attention to course content and communication.

Technical Requirements

To participate in this course, students will need to satisfy the following technical requirements:

• High-speed Internet access with standard up-to-date browsers. To get a list of Blackboard's supported browsers see:

https://help.blackboard.com/Learn/Student/Getting Started/Browser Support#supported-browsers

To get a list of supported operation systems on different devices see: https://help.blackboard.com/Learn/Student/Getting_Started/Browser_Support#tested-devices-and-operating-systems

- Students must maintain consistent and reliable access to their GMU email and Blackboard, as these are the official methods of communication for this course.
- Students will need a headset microphone for use with the Blackboard Collaborate web conferencing tool.
- Students may be asked to create logins and passwords on supplemental websites and/or to download trial software to their computer or tablet as part of course requirements.
- The following software plug-ins for PCs and Macs, respectively, are available for free download: [Add or delete options, as desire.]
 - o Adobe Acrobat Reader: https://get.adobe.com/reader/
 - Windows Media Player:
 https://support.microsoft.com/en-us/help/14209/get-windows-media-player
 - o Apple Quick Time Player: www.apple.com/quicktime/download/

Expectations

• Course Week:

Our course week will begin on the day that our synchronous meetings take place as indicated on the Schedule of Classes.

• <u>Log-in Frequency:</u>

Students must actively check the course Blackboard site and their GMU email for communications from the instructor, class discussions, and/or access to course materials at least 3 times per week. In addition, students must log-in for all scheduled online synchronous meetings.

• Participation:

Students are expected to actively engage in all course activities throughout the semester, which includes viewing all course materials, completing course activities and assignments, and participating in course discussions and group interactions.

• Technical Competence:

Students are expected to demonstrate competence in the use of all course technology. Students who are struggling with technical components of the course are expected to seek assistance from the instructor and/or College or University technical services.

Technical Issues:

Students should anticipate some technical difficulties during the semester and should, therefore, budget their time accordingly. Late work will not be accepted based on individual technical issues.

• Workload:

Please be aware that this course is **not** self-paced. Students are expected to meet *specific deadlines* and *due dates* listed in the **Class Schedule** section of this syllabus. It is the student's responsibility to keep track of the weekly course schedule of topics, readings, activities and assignments due.

• Instructor Support:

Students may schedule a one-on-one meeting to discuss course requirements, content or other course-related issues. Those unable to come to a Mason campus can meet with the instructor via telephone or web conference. Students should email the instructor to schedule a one-on-one session, including their preferred meeting method and suggested dates/times.

• Netiquette:

The course environment is a collaborative space. Experience shows that even an innocent remark typed in the online environment can be misconstrued. Students must always re-read their responses carefully before posting them, so as others do not consider them as personal offenses. *Be positive in your approach with others and diplomatic in selecting your words*. Remember that you are not competing with classmates, but sharing information and learning from others. All faculty are similarly expected to be respectful in all communications.

• Accommodations:

Online learners who require effective accommodations to insure accessibility must be registered with George Mason University Disability Services.

Learner Outcomes or Objectives

This course is designed to enable students to do the following:

- 1. Understand the learning theories fundamental to mathematics education.
- 2. Understand the developmental progressions underpinning mathematics learning.
- 3. Develop an understanding of various forms of mathematics learning assessment related to theories of mathematics learning.
- 4. Understand the assessment of students' thinking at multiple levels.

Professional Standards (National Council of Teachers of Mathematics (NCTM) NCATE Mathematics Content for Elementary Mathematics Specialist (NCATE) *Addendum to the NCTM NCATE Standards 2012*)

Upon completion of this course, students will have met the following professional standards:

Standard 4: Mathematical Learning Environment

Effective elementary mathematics specialists exhibit knowledge of child, pre-adolescent, and adult learning, development, and behavior. They use this knowledge to plan, create, and assist teachers in planning and creating sequential learning opportunities grounded in mathematics education research where students are actively engaged in the mathematics they are learning and building from prior

knowledge and skills. They demonstrate, promote, and assist teachers in demonstrating and promoting a positive disposition toward mathematical practices and learning and exhibit and support the equitable and ethical treatment of and high expectations for all students. They include and assist teachers in embracing culturally relevant perspectives in teaching, in recognizing individual student differences, and in using instructional tools such as manipulatives, digital tools, and virtual resources to enhance student learning, while recognizing the possible limitations of such tools.

- **b.** Plan, create, and coach/mentor teachers in creating developmentally appropriate, sequential, and challenging learning opportunities grounded in mathematics education research in which students are actively engaged in building new knowledge from prior knowledge and experiences
- **d.** Demonstrate and encourage equitable and ethical treatment of and high expectations for all students.
- Apply mathematical content and pedagogical knowledge in the selection, use, and promotion of instructional tools such as manipulatives and physical models, drawings, virtual environments, presentation tools, and mathematics-specific technologies (e.g., graphing tools and interactive geometry software); and make and nurture sound decisions about when such tools enhance teaching and learning, recognizing both the insights to be gained and possible limitations of such tools

National Council of Teachers of Mathematics. (2014). *Principles to actions: Ensuring mathematical success for all.* NCTM.

Course Performance Evaluation

Students are expected to submit all assignments on time in the manner outlined by the instructor (e.g., Blackboard, VIA, hard copy).

This course will introduce students to the diverse learning theories and associated assessment practices specific to mathematics education. Topics will also include the historical development of learning theories as well as emerging theories. Assessment topics will include test design, problem-based assessment as well as other forms of assessment of mathematics learning across K-8. The course is intended for mathematics specialists, mathematics teachers, and pre-service mathematics teachers interested in problems of learning and assessment in mathematics education.

• Assignments and/or Examinations

Reading, Participation, Collaboration & Attendance (15%)

Attendance: It is your responsibility to attend all class sessions. Please report your

reasons for any absences to the instructor in writing.

Tardiness: It is your responsibility to be on time for each class session. Please report

your reasons for any tardiness to the instructor in writing.

- a) A commitment to participation in class discussions and course depends heavily and primarily on the regular attendance and participation of all involved. Participation will include taking part in discussions informed by critical reading and thinking, leading discussions about selected mathematics problems, and sharing with the class the products of various writing, reflection, lesson planning, and field experience assignments. The expectations, demands, and workload of this course are professional and high.
- b) A commitment to reading reflectively and critically the assigned readings. The readings will be used to provide a framework and coherent theme to the course content. They have been selected to introduce themes in curricular development as well as research and critical commentary on mathematics curriculum.

Group Mathematics Topics and Learning Progression Project (40%)

In groups, the students will explore research literature on their topic, create an annotated bibliography of the literature, select an article that could be shared with teachers, prepare an appropriate assessment within the topic, and prepare a handout on the topic for their peers. Students will explore and present information on one of the following topics and how they address learning progressions for students:

• Presentations in Class 6

- o K-5 Progression on Number and Operations Base Ten
- K-5 Progression on Counting and Cardinality and Operations and Algebraic Thinking

• Presentations in Class 7

- 3-5 Progression on Number and Operations Fractions
- 6-8 Progression on Number and Operations Fractions

Presentations in Class 8

- o 6-8 Progression on the Number System
- 6-8 Progression on Expressions and Equations

Clinical Interview (45%)

(NCTM NCATE 4b, 4d, 4e)

This is a Performance-Based Assessment (PBA). Effective teaching requires a keen awareness of how and what your students are thinking and understanding. The experience of

conducting a clinical interview is intended to increase your awareness of students' thinking and learning in a detailed manner about a particular mathematics topic. The other focus of this assignment is on concrete manipulatives and their relationship to learning. So, you should select a manipulative (or manipulatives) to accompany the task and then assess how well the manipulative helped the learner to solve the problem. This Performance-Based Assessment will be posted to VIA for the final evaluation. Additional details for this assignment (project description & rubric) are provided at the end of the syllabus and in Blackboard/Assignments.

• Other Requirements

All assignments require APA formatting:

American Psychological Association (2020). *Publication manual of the American psychological association*. Washington, DC.

Specifically, the following aspects of APA formatting should be addressed in any submission:

- a. 12 point, Times New Roman font
- b. Double spaced
- c. Page headers/Running head
- d. Cover page with title, author's name and professional affiliation
- e. References
- f. Headings
- g. Citations
- h. Clearly organized, grammatically correct, coherent and complete
- i. Professional language (i.e. no jargon)

• Grading

All assignments are to be turned in to your instructor on time. **Late work will not be accepted for full credit.** Assignments turned in late will receive a 10% deduction from the grade per late day or any fraction thereof (including weekends and holidays).

Course Performance Evaluation Weighting

15% Participation

40% Group Mathematics Topics and Learning Progressions Project

45% Clinical Interview

The final evaluation criteria utilizes the graduate grading scale and is as follows:

A	93%-100%	B+	87%-89%	C	70%-79%
A-	90%-92%	В	80%-86%	F	Below 70%

VIA/Performance-Based Assessment(s) Submission Requirement:

Every student registered for any Mathematics Education Leadership course with a required VIA performance-based assessment (designated as such in the syllabus) must submit these assessments to VIA through 'Assessments' in Blackboard. Failure to submit the assessment(s) to VIA (through Blackboard) will result in the course instructor reporting the course grade as Incomplete (IN). Unless this grade is changed upon completion of the

required VIA submission, the IN will convert to an F nine weeks into the following semester.

For Master's Degrees:

Candidates must have a minimum GPA of 3.00 in coursework presented on the degree application, which may include no more than 6 credits of C. (Grades of C+, C-, or D do not apply to graduate courses. The GPA calculation excludes all transfer courses and Mason non-degree studies credits not formally approved for the degree).

• For Endorsement Requirements

Candidates must have a grade of B or higher for all licensure coursework (endorsement coursework).

Professional Dispositions

Students are expected to exhibit professional behaviors and dispositions at all times. Education professionals are held to high standards, both inside and outside of the classroom. Educators are evaluated on their behaviors and interactions with students, parents, other professionals, and the community at large. At the College of Education and Human Development, dispositions may play a part in the discussions and assignments of any/all courses in a student's program (and thus, as part or all of the grade for those assignments). For additional information:

See https://cehd.gmu.edu/students/polices-procedures/

This course will require students to audiotape, videotape, or use the audio/video conferencing feature. Students should dress professionally, speak professionally, and be aware of their recording surroundings and backgrounds. Background noise (such as television, music, conversations, etc.) and inappropriate background video are distracting, unprofessional, and not allowed in this course.

Core Values Commitment

The College of Education and Human Development is committed to collaboration, ethical leadership, innovation, research-based practice, and social justice. Students are expected to adhere to these principles: http://cehd.gmu.edu/values/.

GMU Policies and Resources for Students

Policies

- Students must adhere to the guidelines of the Mason Honor Code (see https://catalog.gmu.edu/policies/honor-code-system/).
- Students must follow the university policy for Responsible Use of Computing (see https://universitypolicy.gmu.edu/policies/responsible-use-of-computing/).
- Students are responsible for the content of university communications sent to their Mason email account and are required to activate their account and check it regularly. All communication from the university, college, school, and program will be sent to students solely through their Mason email account.
- Students with disabilities who seek accommodations in a course must be registered with George Mason University Disability Services. Approved accommodations will begin at the time the written letter from Disability Services is received by the instructor (see https://ds.gmu.edu/).
- Students must silence all sound emitting devices during class unless otherwise authorized by the instructor.

Campus Resources

- Support for submission of assignments to VIA should be directed to viahelp@gmu.edu or https://cehd.gmu.edu/aero/assessments Questions or concerns regarding use of Blackboard should be directed to https://its.gmu.edu/knowledge-base/blackboard-instructional-technology-support-for-students/.
- For information on student support resources on campus, see https://ctfe.gmu.edu/teaching/student-support-resources-on-campus

Notice of mandatory reporting of sexual assault, interpersonal violence, and stalking:

As a faculty member, I am designated as a "Non-Confidential Employee," and must report all disclosures of sexual assault, sexual harassment, interpersonal violence, and stalking to Mason's Title IX Coordinator per <u>University Policy 1202</u>. If you wish to speak with someone confidentially, please contact one of Mason's confidential resources, such as <u>Student Support and Advocacy</u>

<u>Center</u> (SSAC) at 703-380-1434 or <u>Counseling and Psychological Services</u> (CAPS) at 703-993-2380. You may also seek assistance or support measures from Mason's Title IX Coordinator by calling 703-993-8730, or emailing titleix@gmu.edu.

For additional information on the College of Education and Human Development, please visit our website https://cehd.gmu.edu/students/.

STUDENT WORK SAMPLES

NCTM Element 4e

Apply mathematical content and pedagogical knowledge in the selection, use, and promotion of instructional tools such as manipulatives and physical models, drawings, virtual environments, presentation tools, and mathematicsspecific technologies (e.g., graphing tools and interactive geometry software)

The description of the student's performance includes all of the following:

- A variety of work samples from the child showing work in the concrete form
- A variety of work samples from the child showing work in the pictorial form
- A variety of work samples from the child showing work in the abstract form
- An explanatory analysis and overview of each of the child's work samples
- Clearly explained connections between student work samples

The description of the student's performance includes four of the following:

- A variety of work samples from the child showing work in the concrete form
- A variety of work samples from the child showing work in the pictorial form
- A variety of work samples from the child showing work in the abstract form
- An explanatory analysis and overview of each of the child's work samples
- Clearly explained connections between student work samples

The description of the student's performance includes three of the following:

- A variety of work samples from the child showing work in the concrete form
- A variety of work samples from the child showing work in the pictorial form
- A variety of work samples from the child showing work in the abstract form
- An explanatory analysis and overview of each of the child's work samples
- Clearly explained connections between student work samples

The description of the student's performance includes two or fewer of the following:

- A variety of work samples from the child showing work in the concrete form
- A variety of work samples from the child showing work in the pictorial form
- A variety of work samples from the child showing work in the abstract form
- An explanatory analysis and overview of each of the child's work samples
- Clearly explained connections between student work samples

- Conclusions about mathematical understandings are based on sources on mathematics development

THE INSTRUCTIONAL PLAN

NCTM Element 4b

Plan, create, and coach/mentor teachers in creating developmentally appropriate, sequential, and challenging learning opportunities grounded in mathematics education research in which students are actively engaged in building new knowledge from prior knowledge and experiences.

The instructional plan includes all of the following:

- A detailed description of developmentally appropriate next steps for instruction
- The next steps for instruction are justified by the child's current level of understanding
- Many specific examples of activities and tasks are provided to support the next steps of instruction
- Mathematical terms specific to the mathematical

The instructional plan includes four of the following:

- A detailed description of developmentally appropriate next steps for instruction
- The next steps for instruction are justified by the child's current level of understanding
- Many specific examples of activities and tasks are provided to support the next steps of instruction
- Mathematical terms specific to the mathematical

The instructional plan includes three of the following:

- A detailed description of developmentally appropriate next steps for instruction
- The next steps for instruction are justified by the child's current level of understanding
- Many specific examples of activities and tasks are provided to support the next steps of instruction
- Mathematical terms specific to the mathematical

The instructional plan includes two or fewer of the following:

- A detailed description of developmentally appropriate next steps for instruction
- The next steps for instruction are justified by the child's current level of understanding
- Many specific examples of activities and tasks are provided to support the next steps of instruction
- Mathematical terms specific to

				., ., ., .
CLINICAL INTERVIEW PA	concept are used to describe next steps of instruction Instructional next steps are supported by information from other sources on mathematics development ART IV: REFLECTION	concept are used to describe next steps of instruction Instructional next steps are supported by information from other sources on mathematics development	concept are used to describe next steps of instruction Instructional next steps are supported by information from other sources on mathematics development	the mathematical concept are used to describe next steps of instruction Instructional next steps are supported by information from other sources on mathematics development
REFLECTION	The reflection	The reflection	The reflection	The reflection
	includes all of the following: Implementing the assessment Describing the clinical interview Learning about assessment techniques Creating questions and tasks for the mathematics concept Adapting the interview for another child Learning about how children learn mathematics Describing how a classroom teacher might use a diagnostic mathematics assessment	includes six of the following: Implementing the assessment Describing the clinical interview Learning about assessment techniques Creating questions and tasks for the mathematics concept Adapting the interview for another child Learning about how children learn mathematics Describing how a classroom teacher might use a diagnostic mathematics assessment	includes five of the following: Implementing the assessment Describing the clinical interview Learning about assessment techniques Creating questions and tasks for the mathematics concept Adapting the interview for another child Learning about how children learn mathematics Describing how a classroom teacher might use a diagnostic mathematics assessment	includes four or fewer of the following: Implementing the assessment Describing the clinical interview Learning about assessment techniques Creating questions and tasks for the mathematics concept Adapting the interview for another child Learning about how children learn mathematics Describing how a classroom teacher might use a diagnostic mathematics assessment
