

George Mason University
College of Education and Human Development
Mathematics Education Leadership

EDCI 646 6M6– Mathematics Education Leadership for School Change
3 Credits, Fall 2024
Wednesdays 4:30-7:10 p.m. Online Synchronous

Faculty

Name: Jennifer Suh PHD
Office Hours: By Appointment
Office Location: Thompson Hall, Room 2201
Office Phone: (703) 993-9119 Cell (703)973-4642
Email Address: jsuh4@gmu.edu

Prerequisites/Corequisites

Admission to the Mathematics Education Leadership Master's Degree program or instructor permission.

University Catalog Course Description

Surveys current literature and large-scale studies in mathematics education. Engages students in research, study, and discussion of factors that affect teaching and learning of mathematics in school settings. Offered by the School of Education. May not be repeated for credit.

Course Overview

This course is designed for master's level students in the Mathematics Education Leadership program.

Course Delivery Method

This course will be delivered online (76% or more) a synchronous format via Mason's Learning Management System (LMS). You will log in to the course site using your Mason email name (everything before @gmu.edu) and email password. The course site will be available on August 26.

- To access your course in Canvas: <https://canvas.gmu.edu/login/canvas>.

Under no circumstances may students participate in online class sessions while operating motor vehicles.

Learning Outcomes

This course is designed to enable students to do the following:

1. Develop skillful and flexible use of different instructional formats – whole group, small group, partner, and individual – in support of learning goals.
2. Design, select, and/or adapt worthwhile mathematics tasks and sequence examples to support a particular learning goal.
3. Construct and evaluate multiple representations of mathematical ideas or processes, establish correspondences between representations, and understand the purposes of doing so.
4. Use questions to effectively probe mathematical understanding and make productive use of responses.
5. Develop learners' abilities to give clear and coherent public mathematical communications in a classroom setting.

6. Manage diversities of the classroom and school –cultural, disability, linguistic, gender socio-economic, developmental – and use appropriate strategies to support the mathematical learning of all students.
7. Analyze and evaluate student ideas and work, and design appropriate responses.
8. Use professional resources such as professional organization networks, journals, and discussion groups to be informed about critical issues related to mathematics teaching and learning, e.g., policy initiatives and curriculum trends.
9. Use leadership skills to improve mathematics programs at the school and district levels.
10. Read, interpret, and discuss methodologies for implementing school change in mathematics education and for coping with the emotional aspects of change.
11. Explore and discuss the various aspects of the work of a mathematics leader including: working with different populations (i.e., new and experienced teachers, administrators, parents, and school cultures); managing discussions; identifying and implementing structures for professional development (i.e., Lesson Study, Content-Focused Coaching, Professional Learning Communities); and transitioning into the role of a mathematics specialist.

(***Outcomes 1-8 are quoted directly from page 6-7 of the AMTE’s *Standards for Elementary Mathematics Specialists: A Reference for Teaching Credentialing and Degree Programs* (2013))

Professional Standards

1. *Council for the Accreditation of Educator Preparation (CAEP)*
2. *National Council of Teachers of Mathematics (NCTM) CAEP Standards (2012) – Elementary Mathematics Specialist (Advanced Preparation)*

This course addresses the following professional standards:

CAEP Standards RA.1 Content and Pedagogical Knowledge The provider ensures that candidates for professional specialties develop an understanding of the critical concepts and principles of their discipline and facilitates candidates’ reflection of their personal biases to increase their understanding and practice of equity, diversity, and inclusion. The provider is intentional in the development of their curriculum for candidates to demonstrate their ability to effectively work with diverse P-12 students and their families.

NCTM CAEP Standard 3: Content Pedagogy

3A. Apply knowledge of curriculum standards for elementary mathematics and their relationship to student learning within and across mathematical domains in teaching elementary students and coaching/mentoring elementary classroom teachers.

3C. Plan and assist others in planning lessons and units that incorporate a variety of strategies, differentiated instruction for diverse populations, and mathematics-specific and instructional technologies in building all students’ conceptual understanding and procedural proficiency.

3E. Implement and promote techniques related to student engagement and communication including selecting high quality tasks, guiding mathematical discussions, identifying key mathematical ideas, identifying and addressing student misconceptions, and employing a range of questioning strategies.

3F. Plan, select, implement, interpret, and assist teachers in using formative and summative assessments to inform instruction by reflecting on mathematical proficiencies essential for all students.

NCTM CAEP Standard 4: Mathematical Learning Environment

4B. Plan, create, and coach/mentor teachers in creating developmentally appropriate, sequential, and challenging learning opportunities grounded in mathematics education research in which students are actively engaged in building new knowledge from prior knowledge and experiences.

4D. Demonstrate and encourage equitable and ethical treatment of and high expectations for all students.

4E. Apply mathematical content and pedagogical knowledge in the selection, use, and promotion of instructional tools such as manipulatives and physical models, drawings, virtual environments, presentation tools, and mathematics-specific technologies (e.g., graphing tools and interactive geometry software); and make and nurture sound decisions about when such tools enhance teaching and learning, recognizing both the insights to be gained and possible limitations of such tools.

NCTM CAEP Standard 5: Impact on Student Learning

5B. Engage students and coach/mentor teachers in using developmentally appropriate mathematical activities and investigations that require active engagement and include mathematics-specific technology in building new knowledge.

5C. Collect, organize, analyze, and reflect on diagnostic, formative, and summative assessment evidence and determine the extent to which students' mathematical proficiencies have increased as a result of their instruction or their efforts in coaching/mentoring teachers

Required Texts

West, L. & Cameron, A. (2013). *Agents of change*. Heinemann.

Aguilar, E. (2020). *Coaching for equity*. Wiley.

Recommended Texts:

American Psychological Association (2020). *Publication Manual of the American Psychological Association* (7th edition). American Psychological Association.

National Council of Teachers of Mathematics. (2014). *Principles to actions: Ensuring mathematical success for all*. NCTM.

National Council of Teachers of Mathematics. (2020). *Catalyzing Change in Early Childhood and Elementary: Initiating Critical Conversation*. NCTM.

National Council of Teachers of Mathematics. (2020). *Catalyzing Change in Middle School Mathematics: Initiating Critical Conversation*. NCTM.

Technical Requirements

To participate in this course, students will need to satisfy the following technical requirements:

- High-speed internet access with updated browsers.
 - Canvas supported browsers: <https://guides.instructure.com/a/7203291>
- Consistent and reliable access to GMU email and the course LMS, as these are the official methods of communication for this course.
- Speakers and a microphone or a microphone-enabled headset for use with the synchronous web conferencing tools.
- Note that students may be asked to create logins and passwords on supplemental websites and/or to download trial software to their computer or tablet as part of course requirements.

Expectations

- Course Week:
Our course week will begin on the day that our synchronous meetings take place as indicated on the Schedule of Classes.
- Log in Frequency:
Students must actively check the course LMS site and their GMU email for communications from the instructor, class discussions, and/or access to course materials at least 3 times per week. In addition, students must log in for all scheduled online synchronous meetings, if any.
- Participation:
Students are expected to actively engage in all course activities throughout the semester, which includes viewing all course materials, completing course activities and assignments, and participating in course discussions and group interactions.
- Technical Competence:
Students are expected to demonstrate competence in the use of all course technology. Students who are struggling with technical components of the course are expected to seek assistance from the instructor and/or College or University technical services.
- Technical Issues:
Students should anticipate some technical difficulties during the semester and should, therefore, budget their time accordingly. Late work will not be accepted based on individual technical issues.
- Workload:
Please be aware that this course is **not** self-paced. Students are expected to meet *specific deadlines* and *due dates* listed in the **Class Schedule** section of this syllabus. It is the student's responsibility to keep track of the weekly course schedule of topics, readings, activities and assignments due.

- **Instructor Support:**
Students may schedule a one-on-one meeting to discuss course requirements, content or other course-related issues. Those unable to come to a Mason campus can meet with the instructor via telephone or web conference. Students should email the instructor to schedule a one-on-one session, including their preferred meeting method and suggested dates/times.
- **Netiquette:**
The course environment is a collaborative space. Experience shows that even an innocent remark typed in the online environment can be misconstrued. Students must always re-read their responses carefully before posting them, so as others do not consider them as personal offenses. *Be positive in your approach with others and diplomatic in selecting your words.* Remember that you are not competing with classmates but sharing information and learning from others. All faculty are similarly expected to be respectful in all communications.

Course Performance Evaluation

Students are expected to submit all assignments on time in the manner outlined by the instructor.

- **Assignments and/or Examinations**
The assignments across the semesters are intended to develop skills in implementing, leading, and evaluating school change in mathematics teaching and learning. All assignments are to be completed on time so that class members might benefit from the expertise and contributions of their colleagues. ***Additional details and rubrics for all assignments will be posted on Canvas. Please review these materials.***

Coaching Project (40%)

- *CAEP Standards RA.1*
- *NCTM CAEP Standards – EMS Advanced Preparation 3c, 3f, 5c*

This is a Performance-Based Assessment (PBA). For this assignment, participants will plan and **videotape or audiotape** a coaching cycle (one pre-conference and one post-conference) with a classroom teacher. Participants should **not** videotape the actual lesson that is taught by the classroom teacher. In addition to writing a summary report, participants will choose one uninterrupted clip from each conference and present these clips to a small group of their classmates. This Performance-Based Assessment will be posted to VIA for the final evaluation. Additional details for this assignment (project description & rubric) are provided at the end of the syllabus and in Canvas/Assignments.

Lesson Study Project (40%)

- *CAEP Standards RA.1*
- *NCTM CAEP Standards – EMS Advanced Preparation 3a, 3e, 3f, 4b, 4d, 4e, 5b, 5c*

This is a Performance-Based Assessment (PBA). Students will work with a small group to conduct a lesson study. This will include selecting research goals for the lesson, planning the lesson, teaching the lesson (by at least one person in the team), and reviewing artifacts from the lesson. This Performance-Based Assessment will be posted to VIA for the final evaluation. Additional details for this assignment (project description & rubric) are provided at the end of the syllabus and in Canvas/Assignments.

Reading, Participation, Collaboration & Attendance (20%)

Attendance: It is your responsibility to attend all class sessions. Please report your reasons for any absences to the instructor in writing.

Tardiness: It is your responsibility to be on time for each class session. Please report your reasons for any tardiness to the instructor in writing.

A commitment to participation in class discussions and course depends heavily and primarily on the regular attendance and participation of all involved. Participation will include taking part in discussions informed by critical reading and thinking, leading discussions about selected mathematics problems, and sharing with the class the products of various writing, reflection, lesson planning, and field experience assignments. The expectations, demands, and workload of this course are professional and high.

A commitment to reading reflectively and critically the assigned readings. The readings will be used to provide a framework and coherent theme to the course content. They have been selected to introduce themes in curricular development as well as research and critical commentary on mathematics curriculum.

	LEVEL OF PERFORMANCE			
ELEMENT	<i>Distinguished</i> (10 points)	<i>Proficient</i> (7 - 9 points)	<i>Basic</i> (5 - 6 points)	<i>Unsatisfactory</i> (0 - 4 points)
Attendance & Participation	The student attends all classes, is on time, is prepared and follows outlined procedures in case of absence. The student actively participates and continually supports the members of the learning group and the members of the class. Presentations demonstrate a deep knowledge of content as well as implications for teaching.	The student attends most classes, is on time, is prepared and follows outlined procedures in case of absence. The student makes active contributions to the learning group and class. Presentations demonstrate sufficient knowledge of content as well as implications for teaching.	The student is absent for multiple classes and follows outlined procedures in case of absence. At times the student is not prepared for class. Presentations demonstrate minimal knowledge of content and/or implications for teaching.	The student is frequently late for class or absences are not documented by following the outlined procedures. The student is frequently not prepared for class and does not actively participate in discussions. Presentations are lacking knowledge of content and connections to teaching.

- **Other Requirements**

All assignments require APA formatting:

American Psychological Association (2020). Publication manual of the American psychological association. Washington, DC.

Specifically, the following aspects of APA formatting should be addressed in any submission:

- . 12 point, Times New Roman font
- . Double spaced
- . Page headers/Running head
- . Cover page with title, author's name and professional affiliation
- . References
- . Headings
- . Citations
- . Clearly organized, grammatically correct, coherent and complete
- . Professional language (i.e. no jargon)

● **Grading**

All assignments are to be turned in to your instructor on time. **Late work will not be accepted for full credit.** Assignments turned in late will receive a 10% deduction from the grade per late day or any fraction thereof (including weekends and holidays).

Coaching Project (40%)

Lesson Study Project (40%)

Reading, Participation, Collaboration & Attendance (20%)

The final evaluation criteria utilizes the graduate grading scale and is as follows:

A	93%-100%	B+	87%-89%	C	70%-79%
A-	90%-92%	B	80%-86%	F	Below 70%

● **For Master's Degrees:**

Candidates must have a minimum GPA of 3.00 in coursework presented on the degree application, which may include no more than 6 credits of C. (Grades of C+, C-, or D do not apply to graduate courses. The GPA calculation excludes all transfer courses and Mason non-degree studies credits not formally approved for the degree).

● **For Endorsement Requirements**

Candidates must have a grade of B or higher for all licensure coursework (endorsement coursework).

The Virginia math specialist endorsement is attached directly to the state teacher licensure with three pathways:

1. Elementary math specialist endorsement added onto elementary licensure
2. Elementary and middle math specialist endorsement added onto an elementary licensure with Algebra I add on
3. Elementary and middle mathematics specialist endorsements added onto a 6-12 secondary license.

The Mason Mathematics Specialist Program covers competencies for all three pathways. You can find more information on the Virginia mathematics specialist endorsement for elementary and middle education here:

<https://law.lis.virginia.gov/admincode/title8/agency20/chapter23/section650/>

Student and Faculty Names and Pronouns

Name and pronoun use: If you wish, please share your name and gender pronouns with me and indicate how best to address you in class and via email. I use [faculty insert your specific pronouns here] for myself and you may address me as “[YOUR NAME]”, “Dr./Prof. [NAME]” or “Mr./Ms./Mx. [NAME]” in email and verbally. I encourage students to use tools Mason provides to change your name and pronouns on Mason records, if you so choose:

<https://registrar.gmu.edu/updating-chosen-name-pronouns/>

Diversity and Inclusion Statement

The College of Education and Human Development, an intentionally inclusive community, promotes and maintains an equitable and just work and learning environment. We welcome and value individuals and their differences including race, economic/class status, gender expression and identity, sex, sexual orientation, ethnicity, national origin, first language, religion, age, and ability status, among other characteristics.

- We value our diverse student body and desire to increase the diversity of our faculty and staff.
- We commit to supporting students, faculty and staff who have been the victims of bias and discrimination.
- We promote continuous learning and improvement to create an environment that values diverse points of view and life experiences.
- We believe that faculty, staff, and students play a role in creating an environment that engages diverse points of view.
- We believe that by fostering their willingness to hear and learn from a variety of sources and viewpoints, our students will gain competence in communication, critical thinking and global understanding, and become aware of their biases and how they affect their interactions with others and the world.

Land Acknowledgement Statement

Land acknowledgment engages all present in an ongoing indigenous protocol to enact meaningful, reciprocal relationships with ancestors and contemporary tribal nations. As a state university, we have a responsibility to include and support indigenous communities and sovereign tribes in our work.

At the place George Mason University occupies, we give greetings and thanksgivings to these Potomac River life sources, to the Doeg ancestors, who Virginia annihilated in violent campaigns while ripping their lands apart with the brutal system of African American enslavement, to the recognized Virginia tribes who have lovingly stewarded these lands for millennia, including the Rappahannock, Pamunkey, Upper Mattaponi, Chickahominy, Eastern Chickahominy, Nansemond, Monacan, Mattaponi, Patawomeck, and Nottaway, past, present, and future, and to the Piscataway tribes, who have lived on both sides of the river from time immemorial.

Use of Generative AI

Use of Generative AI tools should be used following the fundamental principles of Mason's Academic Standards. This includes being honest about the use of these tools for submitted work and including citations when using the work of others, whether individual people or Generative AI tools.

Professional Dispositions (CEHD Student Guide)

Throughout study in the College of Education and Human Development, students are expected to demonstrate behaviors that reflect the positive dispositions of a professional. See <https://cehd.gmu.edu/current-students/cehd-student-guide>.

This course will require students to audiotape, videotape, or use the audio/video conferencing feature. Students should dress professionally, speak professionally, and aware of their recording surroundings and backgrounds. Background noise (such as television, music, conversations, etc.) and inappropriate background video are distracting, unprofessional, and not allowed in this course.

Class Schedule

Note: Faculty reserves the right to alter the schedule as necessary, with notification to students.

CEHD Commitments

The College of Education and Human Development is committed to fostering collaboration and community, promoting justice and equity, and advancing research-informed practice. Students are expected to adhere to, and contribute to, these commitments, the CEHD Mission, and Core Values of George Mason University. More information can be found here:

<https://cehd.gmu.edu/about/culture/>

GMU Policies and Resources for Students

Policies

- Students must adhere to Mason's Academic Standards (see <https://catalog.gmu.edu/policies/academic-standards/>)
- Students must follow the university policy for Responsible Use of Computing (see <https://universitypolicy.gmu.edu/policies/responsible-use-of-computing/>).
- Students are responsible for the content of university communications sent to their Mason email account and are required to activate their account and check it regularly. All communication from the university, college, school, and program will be sent to students **solely** through their Mason email account.
- Students with disabilities who seek accommodations in a course must be registered with George Mason University Disability Services. Approved accommodations will begin at the time the written letter from Disability Services is received by the instructor (see <https://ds.gmu.edu/>).
- Students must silence all sound emitting devices during class unless otherwise authorized by the instructor.

Campus Resources

- Support for submission of assignments to VIA should be directed to viahelp@gmu.edu or <https://cehd.gmu.edu/aero/assessments>.
- Questions or concerns regarding use of your LMS should be directed to:
 - Canvas: <https://its.gmu.edu/service/canvas/>
- For information on student support resources on campus, see:
 - TimelyCare: <https://caps.gmu.edu/timelycare-services/>
 - Writing Center: <https://writingcenter.gmu.edu/>

Notice of mandatory reporting of sexual assault, sexual harassment, interpersonal violence, and stalking:

As a faculty member, I am designated as a “Non-Confidential Employee,” and must report all disclosures of sexual assault, sexual harassment, interpersonal violence, and stalking to Mason’s Title IX Coordinator per [University Policy 1202](#). If you wish to speak with someone confidentially, please contact one of Mason’s confidential resources, such as [Student Support and Advocacy Center](#) (SSAC) at 703-380-1434 or [Counseling and Psychological Services](#) (CAPS) at 703-993-2380. You may also seek assistance or support measures from Mason’s Title IX Coordinator by calling 703-993-8730, or emailing titleix@gmu.edu.

Coaching Project Description

Course Performance Based Assessment

CAEP STANDARDS

- RA.1 Content and Pedagogical Knowledge

NCTM CAEP Standards

- Content Pedagogy (Standards 3c, 3f)
- Impact on Student Learning (Standard 5c)

This is a Performance-based Assessment. For this assignment, the student will plan and videotape or audiotape a coaching cycle (one pre-conference and one post-conference) with a classroom teacher. Students should **not** videotape the actual lesson that is taught by the classroom teacher. In addition to writing a summary report, students will choose one uninterrupted clip from each conference and present these clips to a small group of their classmates. After discussing the clips with the small group, students will develop a written summary of the important ideas related to mathematical pedagogy and mathematical content that surfaced during their own pre- and post-conferences. Each small group will also choose a representative clip (one pre- or post-conference clip) to discuss with the entire class.

The final product should include the following: 1) coaching plan; 2) video clips; and 3) reflection paper. This Performance-Based Assessment will be posted to VIA for the final evaluation. For a complete rubric and grading criteria please see the rubric at the end of the syllabus.

PROJECT COMPONENTS

- Teacher Interview
- Coaching Plan
- Pre-Conference
- Co-Teach or Observe the implemented lesson
- Post-Conference
- Group Presentation
- Coaching Project Paper

Lesson Study Project Description

Course Performance Based Assessment

CAEP STANDARDS

- RA.1 Content and Pedagogical Knowledge

NCTM CAEP Standards

- Content Pedagogy (Standards 3a, 3e, 3f)
- Mathematical Learning Environment (Standards 4b, 4d, 4e)
- Impact on Student Learning (Standard 5b, 5c)

This is a Performance-based Assessment. For this assignment, the student will work in small groups and complete the lesson study process. Groups will be expected to meet regularly, establish their goal, and review their progress toward their goal. Groups will provide evidence or documentation that supports their progress as artifacts of 1) lesson development, 2) implementation, and 3) reflection. Together the group will develop the first round of the research lesson and one group member will teach the lesson to his/her students. Group members should observe this teaching live or via recording, depending on what contexts allow. Next, group members will discuss and debrief the lesson's implementation and consider revisions to improve the mathematical learning.

For round two of the lesson study, individuals will revise the research lesson, based on the groups' debrief of round one and needs for individual contexts, and implement the revised lesson within his/her own context. A final individual reflection will include reflection of the second round of the research lesson

The final group project of this process should include the following: 1) Final Group Paper; 2) Group Meeting Notes as Appendix A; 3) Group Introductory Interview as Appendix B; 4) Group Action Plan as Appendix C; and 5) Group Lesson Plan as Appendix D.

The final individual project of this process should include the following: 1) Individual Reflection Paper; 2) Revised Lesson Plan as Appendix A; and 3) Individual Journal of Coaching Actions as Appendix B

This Performance-Based Assessment will be posted to VIA for the final evaluation. For a complete rubric and grading criteria please see the rubric at the end of the syllabus.
